# Note for Coaches, Parents, Teachers, and Trainers

This collection of problems opens a series of a new kind of problem books. Some of the problems in it may seem absurdly simple to experienced chessplayers or coaches. But that isn't the case – the simplicity of our problems is superficial. If the required attention hasn't been paid in the past to the development of these kinds of simple problems, that highlights the fact that there are still many blank spots in the matter of how to begin teaching the game of chess. This has to do with the fact that, in every country in the world, these problem books are written by strong practical players, for whom certain subjects seem too simple to be worth any attention at all. Such authors don't take into account the fact that the earliest stage of instruction deserves closer attention.

As a result, in previously published problem collections, a large stratum of useful chess exercises has remained unrevealed. The main goal of our series of problem books is to correct this omission.

In order for the beginning chessplayer to learn to play chess well later on, the coach should first help him or her to establish a solid foundation. To this end, beginning players should first get the feel of the possibilities of each piece separately, and also familiarize themselves with the comparative strengths of the pieces. Our series of thematic exercises with a small number of pieces on the board serves this purpose.

Problem books are written by strong practical players for whom certain subjects seem too simple, leaving many useful chess exercises unrevealed...

At the same time problems from the so-called "pre-checkmate" period play a very important role in the initial stage of instruction. Very often there aren't even kings in these diagrams, such that in order to win you simply have to eliminate or immobilize all your opponent's pawns or pieces (as in checkers – play for a wipeout).

The point of these exercises isn't to deliver mate, but to acquire various chess skills, to master the simplest methods of attacking and defending. The purpose is to teach the student to see the chess board, to find hidden threats and connections between different pieces, and to understand how to coordinate the pieces to achieve one goal or another.

By using our problem book, in the course of initial study beginning chessplayers can: 1) familiarize themselves with the possibilities and comparative strengths of each piece; 2) learn to attack one piece with another piece; 3) learn how to restrict the mobil-

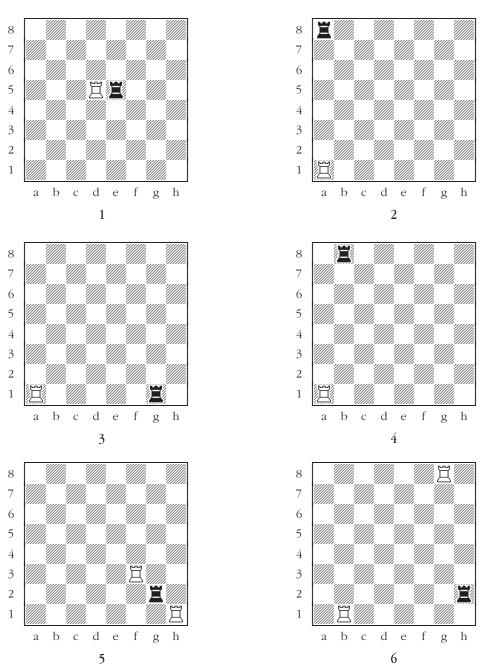

ity of their opponents' pieces; 4) learn to see guarded and unguarded pieces on the board; 5) learn to deliver double attacks; 6) learn to find defensive moves; 7) learn to use pins for attack and defense; 8) learn to choose the best capture from several possibilities; 9) master the typical methods of fighting with the various pieces against pawns; 10) learn to see opportunities to announce check in any position; and 11) completely master the rules of the game.

In general, in order to achieve success in chess three stages of instruction need to be covered thoroughly: 1) the "pre-checkmate" stage – here, students should develop a feel for the "pre-checkmate" harmony of the pieces in both attack and defense; 2) the stage of giving mate in one – here students should get a feel for the harmony of the pieces when checkmating; 3) the checkmate stage – here students should get a feel for the harmony of the pieces when using a mate threat. Having said that, the younger the student, the longer the first two stages should last.

This first problem book allows us to work through the first ("pre-checkmate") stage, while the second and third books focus on working through the second stage (giving mate in one). Subsequent collections will help students and coaches to work through the third (mating) stage.

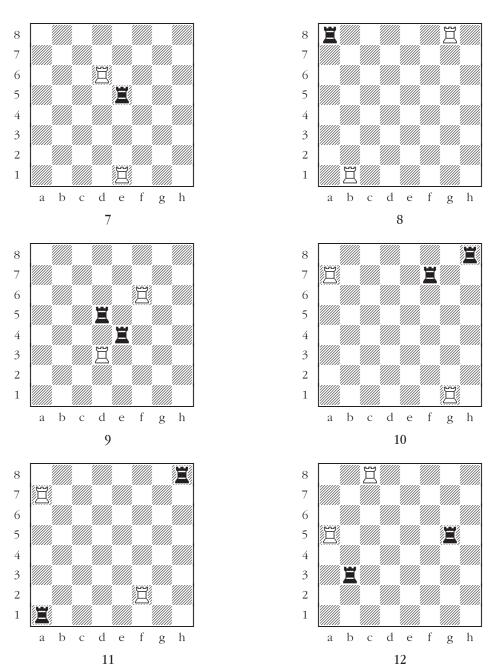

## Capturing

White to move: Can White take Black's rook?

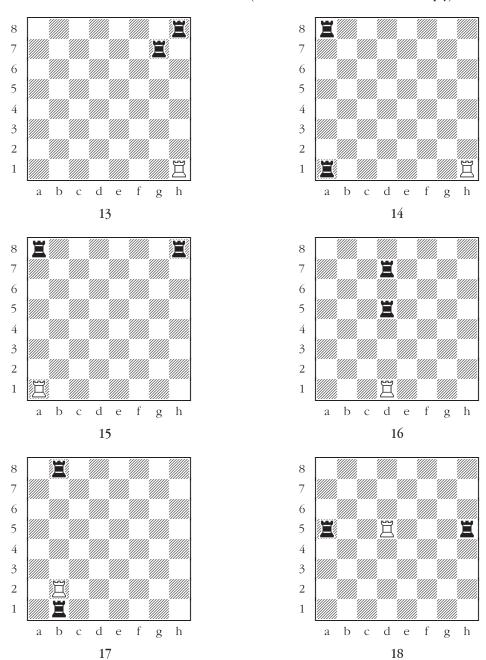

#### Pieces under attack

**Black to move:** Take one of the white rooks.

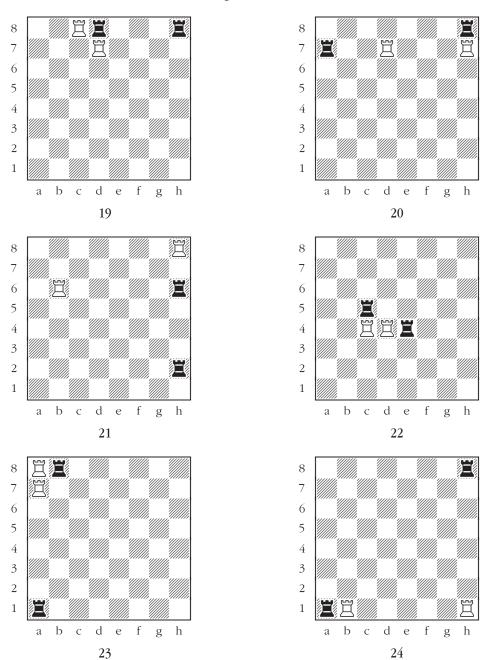

#### To take or not to take?

White to move: Should White take (will Black take the white rook in reply)?

#### The best move

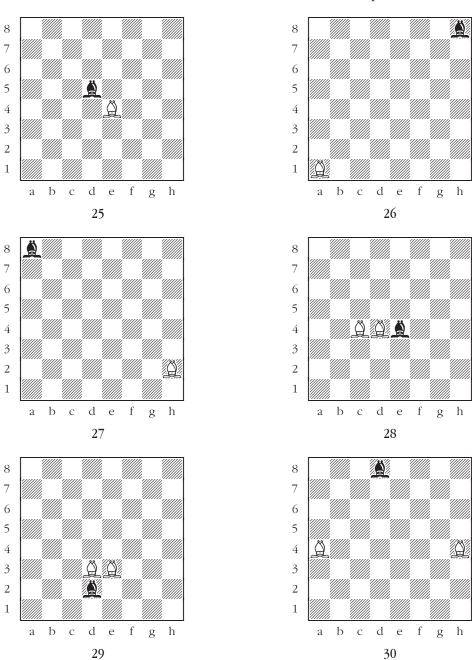

**Black to move:** Which rook should Black take, so that after the exchanges Black has more rooks than White?

# The Bishop

## Capturing

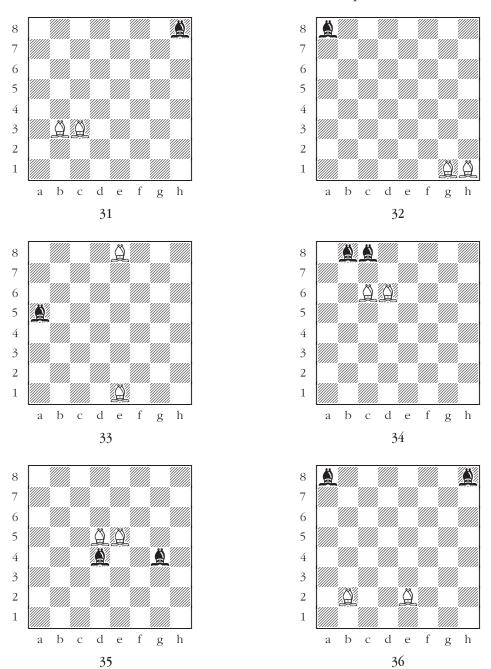

White to move: Can White take the black bishop?

# The Bishop

#### Under attack

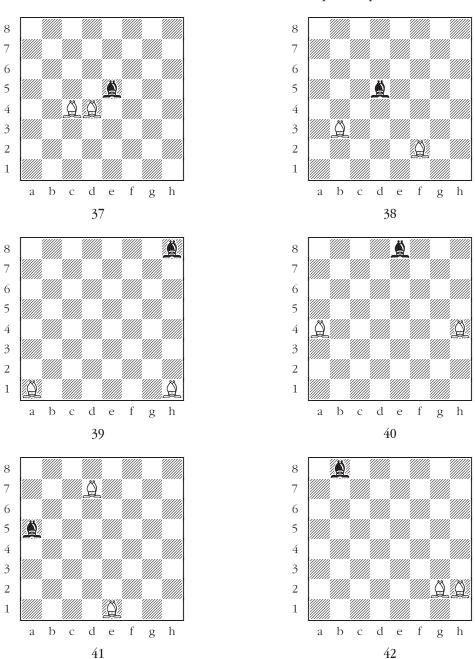

Black to move: Take the white bishop.

# The Bishop

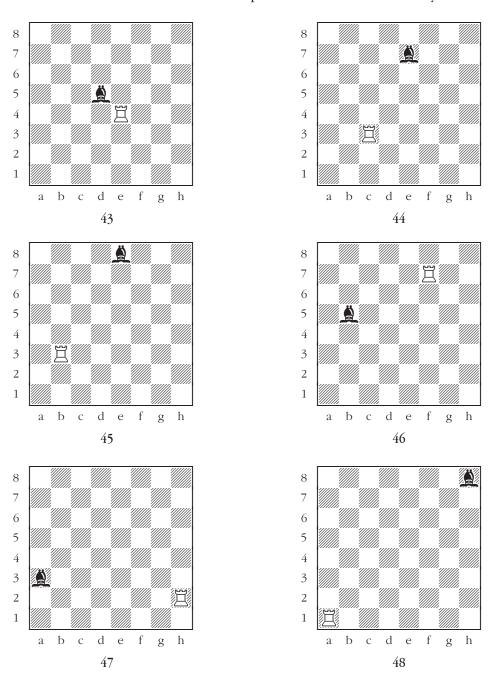

#### A choice

White to move: Which of the white bishops can capture?

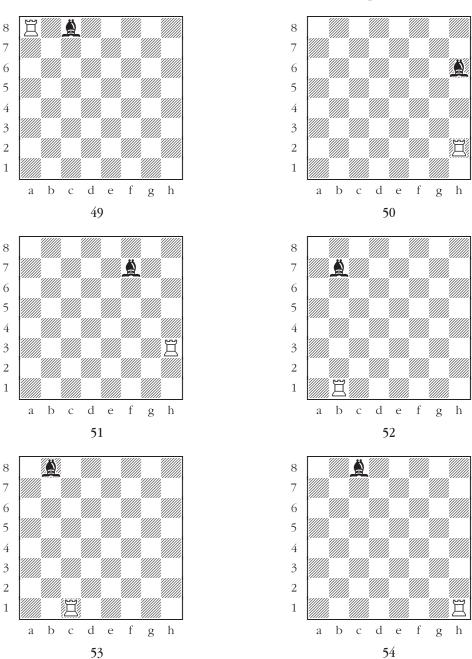

#### Attacks by the rook

White to move: Attack the bishop with the rook in two different ways.

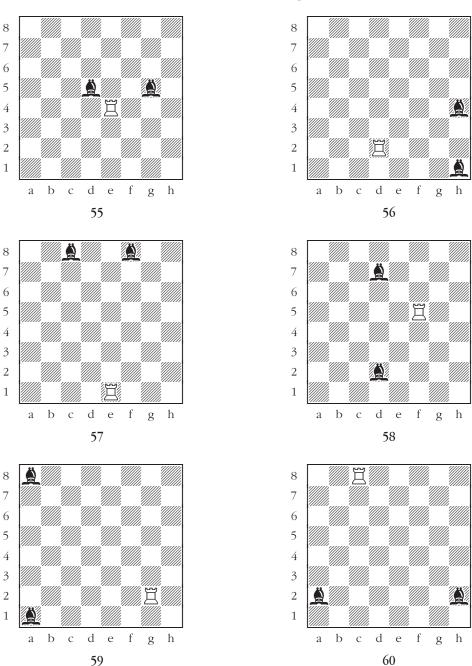

## Bishop attacks

Black to move: Attack the rook with the bishop.

#### Double attack by the rook

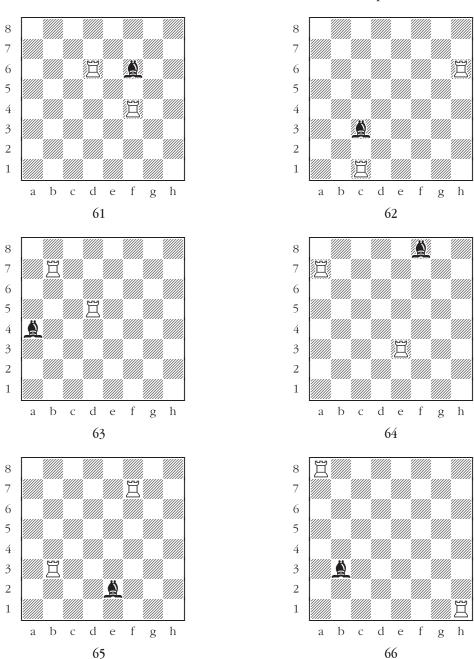

White to move: Attack both bishops with the rook.

59

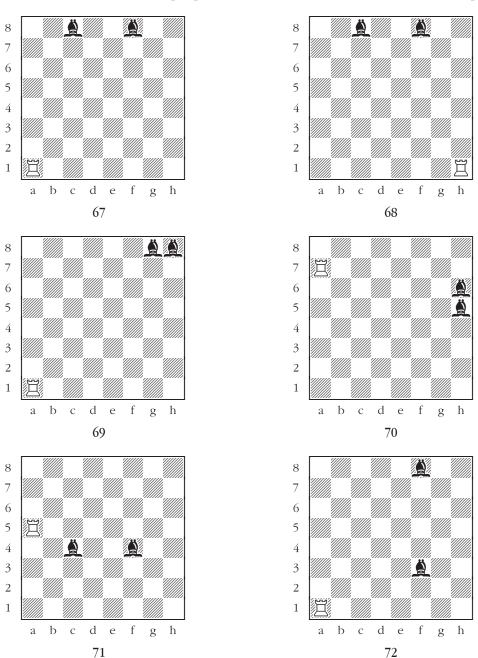

#### Double attack by the bishop

Black to move: Attack both rooks with the bishop.

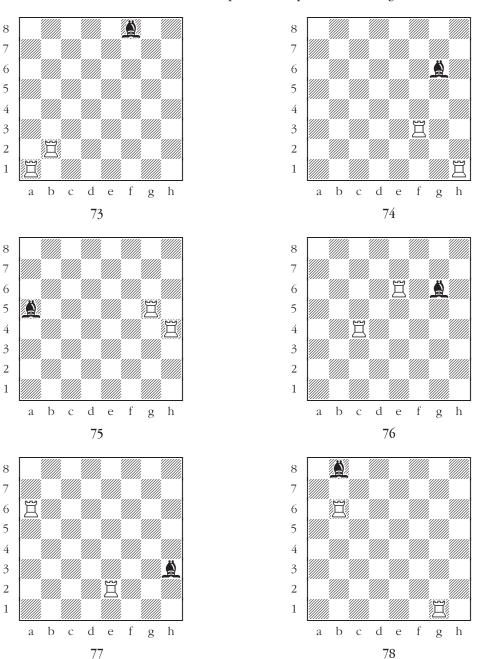

## Laser attack by the rook

**White to move:** Win a bishop — put the rook on the same rank or file as the two bishops.

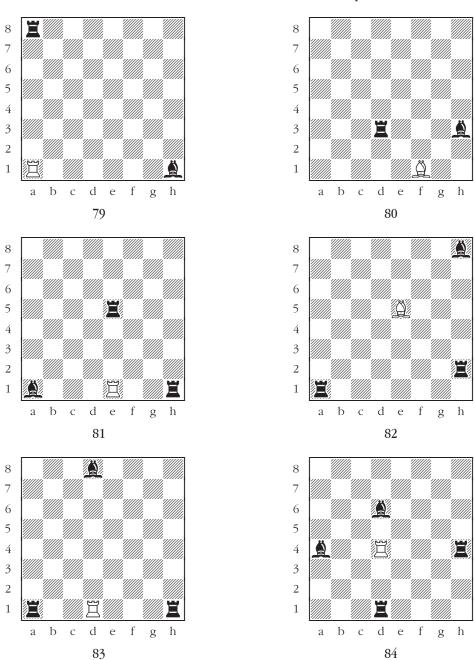

## Laser attack by the bishop

**Black to move:** Deliver a laser attack — put the bishop on the same diagonal as the rooks.

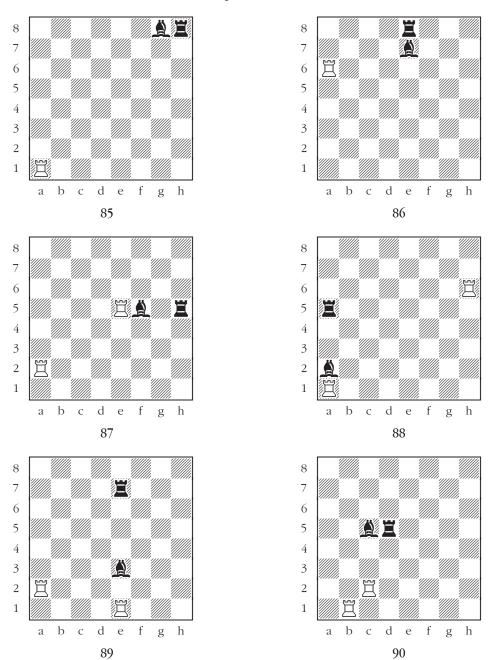

## Capturing

White to move: Take the undefended black piece.

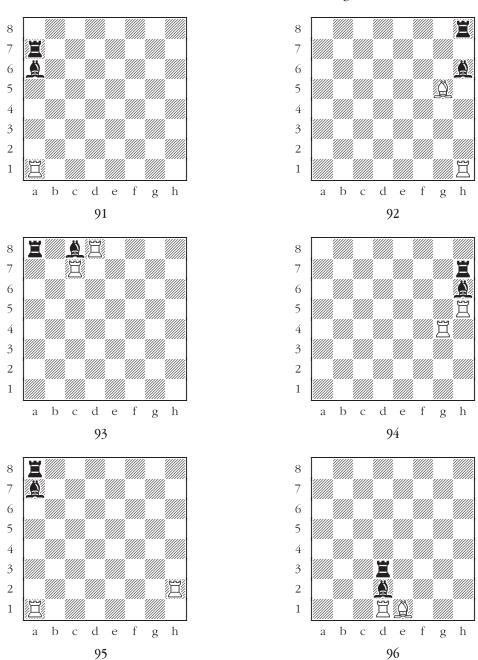

## The pin

White to move: After which move by White does Black lose either the bishop or the rook, no matter what?

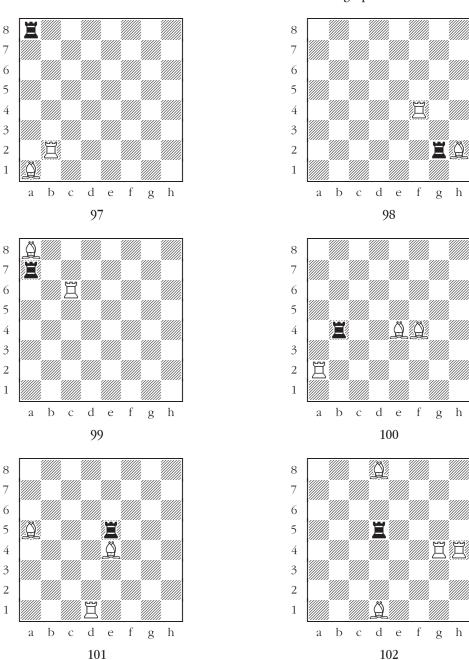

## Escapes

Black to move: How does Black avoid losing material?

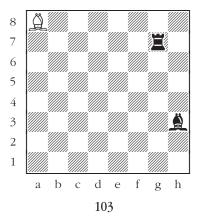

## Defending

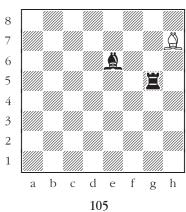

White to move: How does White avoid losing a piece?

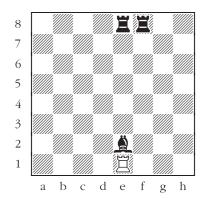

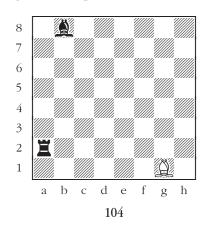

## Exchanging

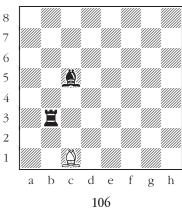

Black to move: Force the exchange of a white piece.

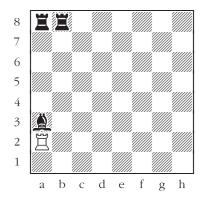

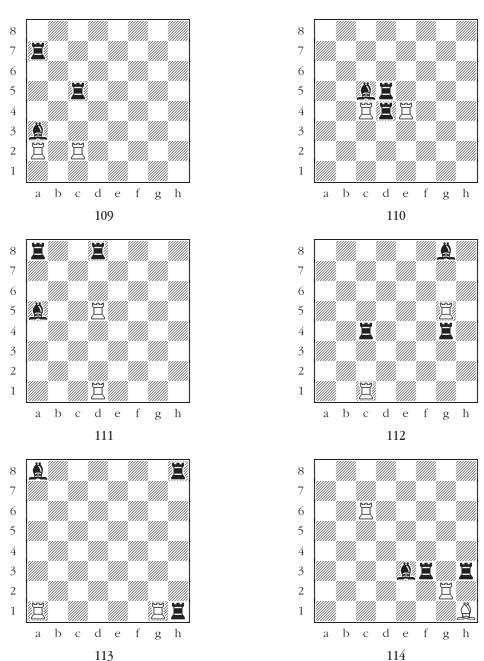

107

#### Combinations

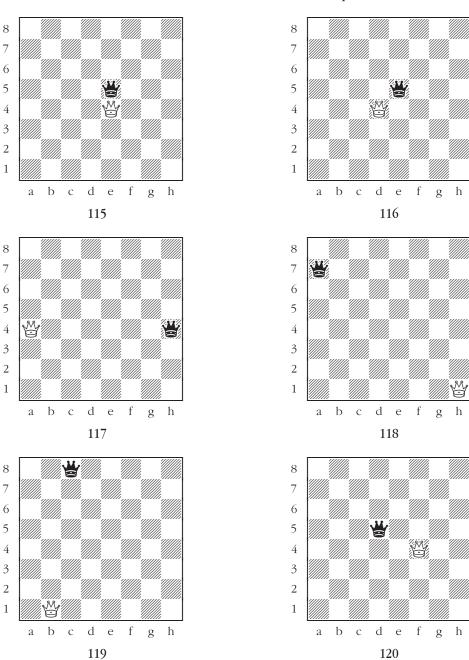

White to move: Find the best maneuver.

# The Queen

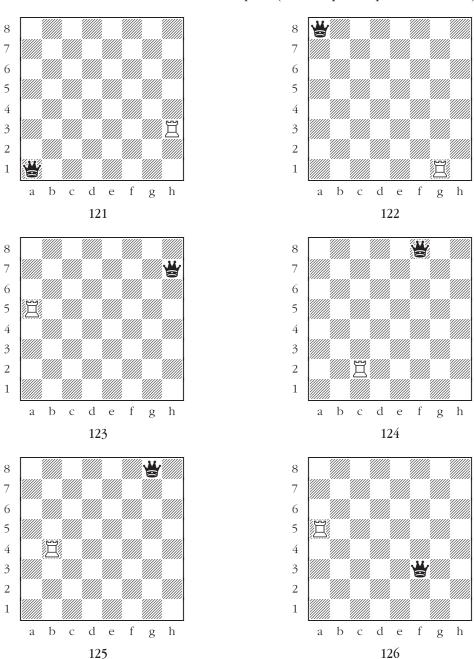

## Capturing

White to move: Can White take Black's queen?

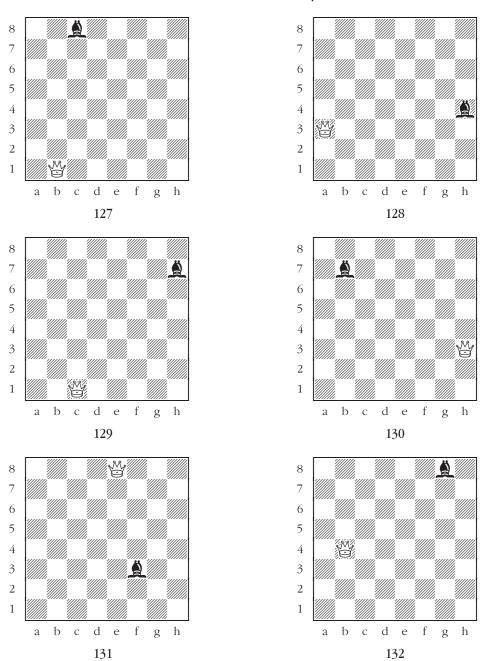

#### Attack on the rook

Black to move: Attack the rook with the queen (but don't put the queen under attack).

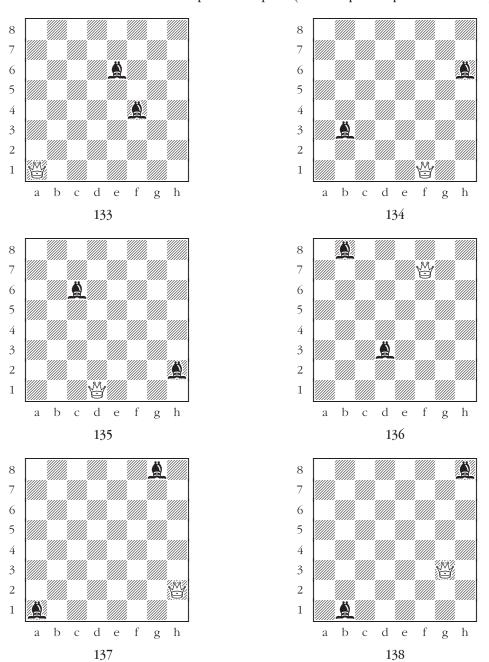

#### Attack on the bishop

**White to move:** Attack the bishop with the queen (but don't put the queen under attack). Find three different ways.

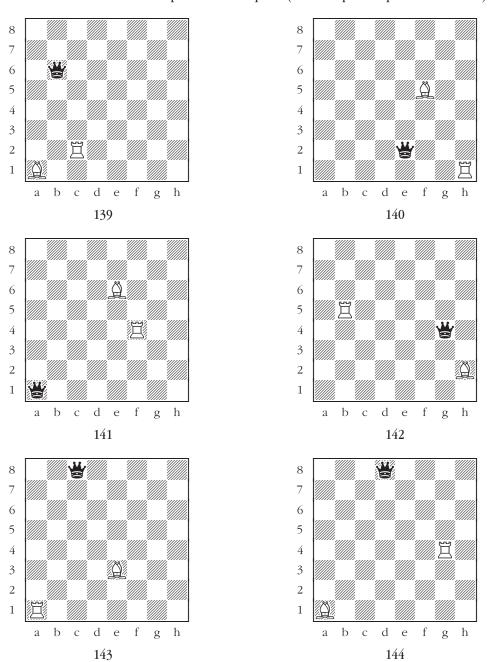

#### Double attack

White to move: Attack both bishops with the queen (but don't put the queen under attack).

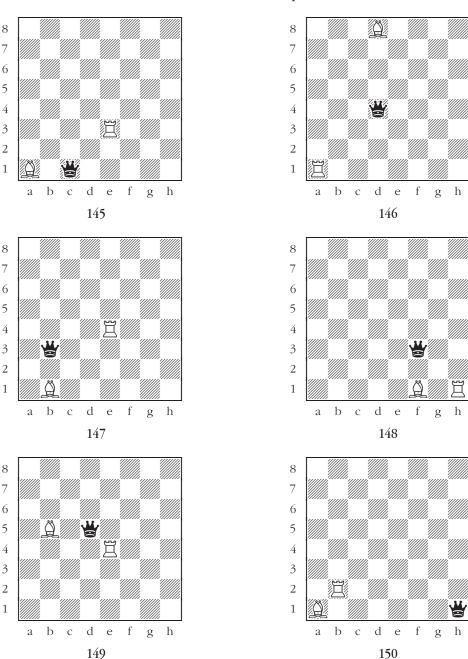

#### Double attack

Black to move: Attack two pieces with the queen (but don't put the queen under attack).

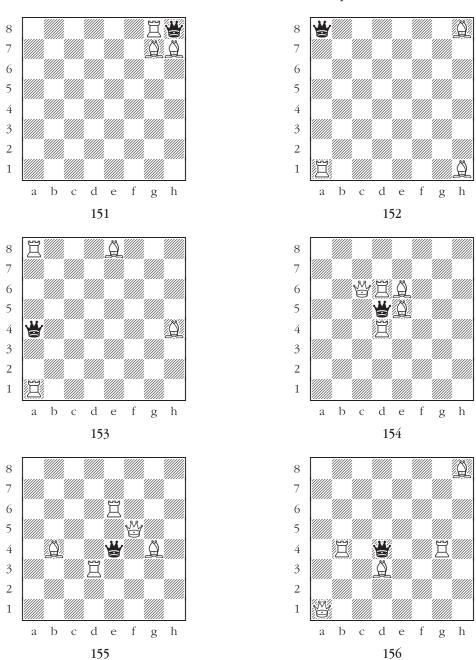

## Defending

White to move: How can both pieces be saved?

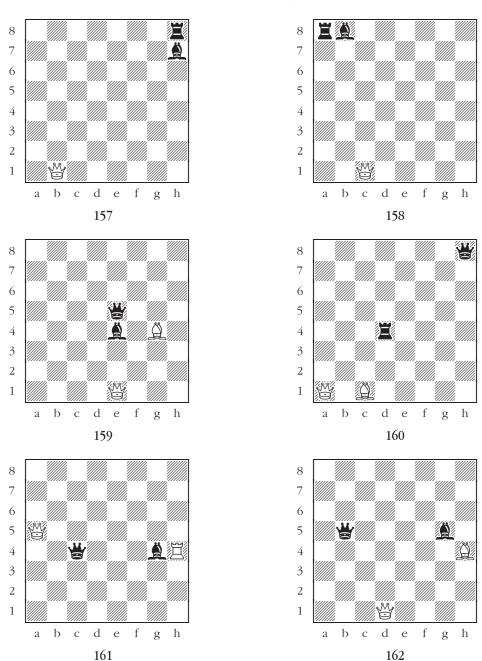

## Capturing

Black to move: Take the undefended piece.

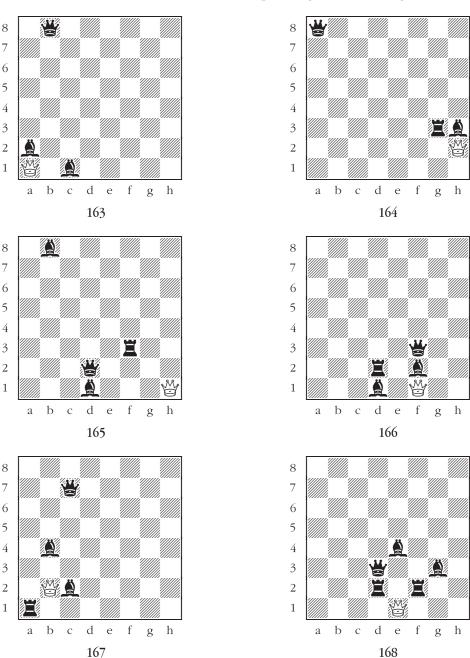

## The pin

White to move: Find the best chance.

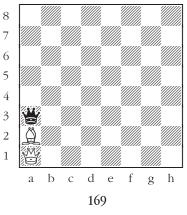

#### Restricting mobility

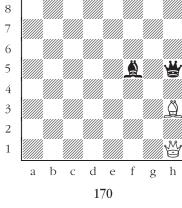

**Black to move:** Force the white queen to go into an exchange.

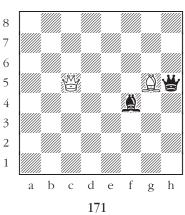

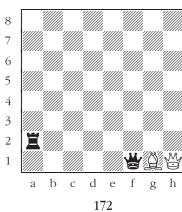

#### Escapes

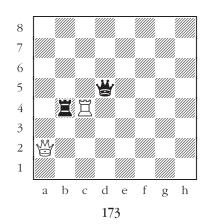

White to move: Find the best move.

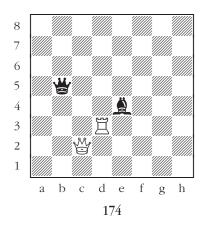

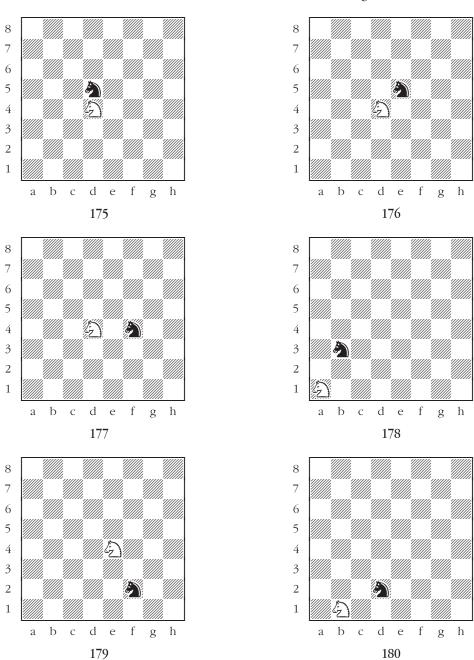

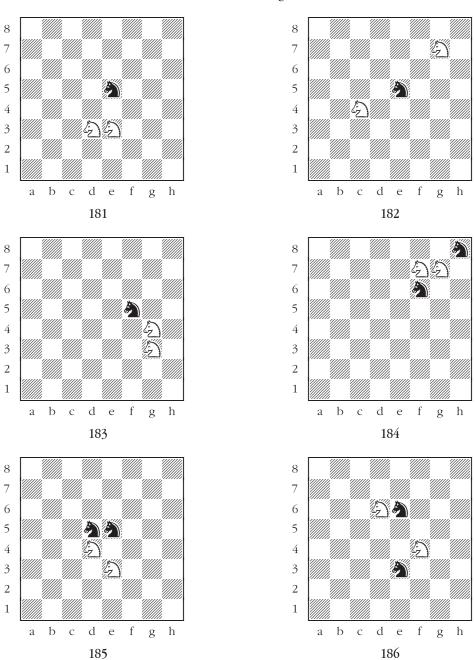

## Capturing

White to move: Can White take the black knight?

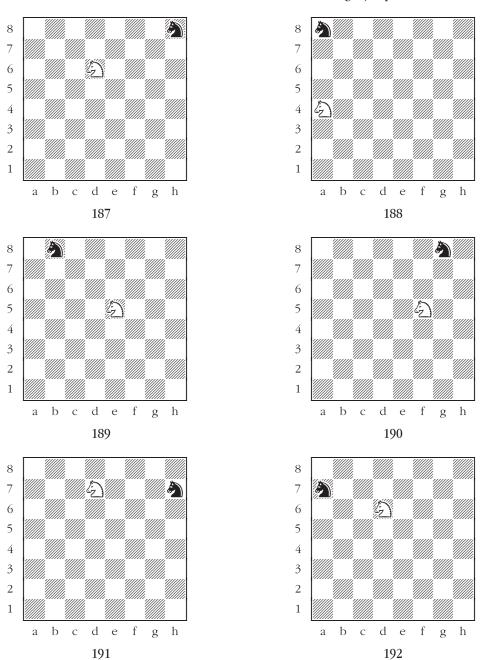

## The knight under attack

Black to move: Which knight can be taken?

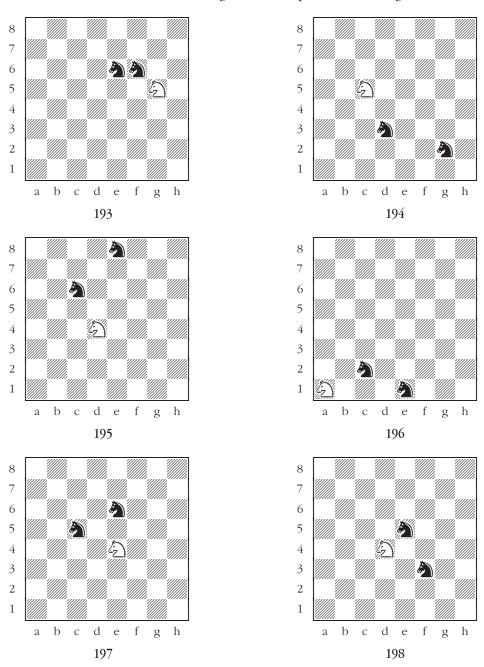

## Running past the guard

Black to move: Where should the black knight jump?

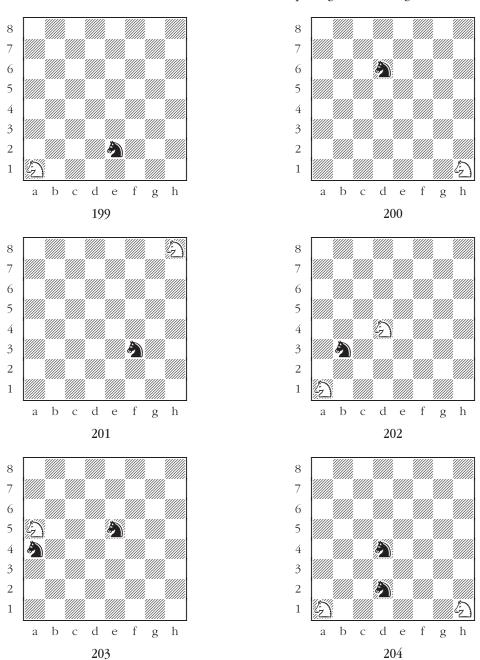

#### To take or not to take?

White to move: Is it a good idea to capture the black knight?

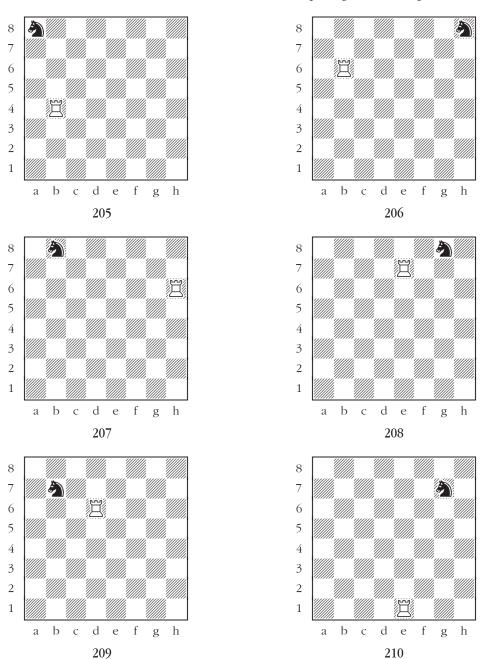

## Restricting mobility

Black to move: Which move leads to capturing the white knight?

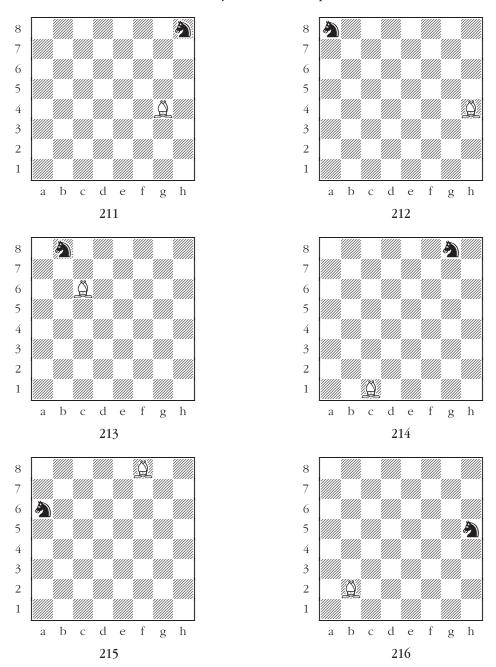

#### The rook tames the knight

White to move: Which maneuver leads to capturing the black knight?

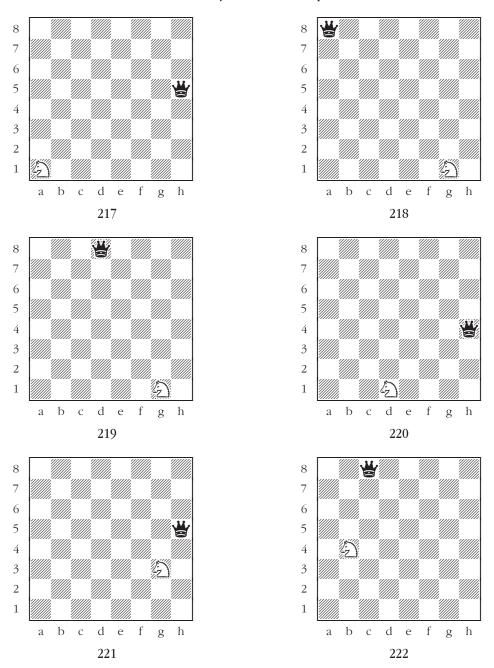

#### The bishop tames the knight

**White to move:** Catch the black knight in a trap — in one move, take away all of its retreat squares.

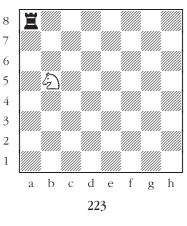

### The queen tames the knight

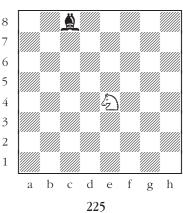

**Black to move:** Catch the white knight in a trap — in one move, take away all of its retreat squares.

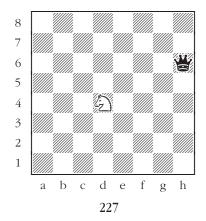

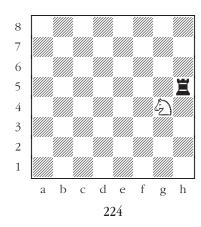

### Attacks by the knight

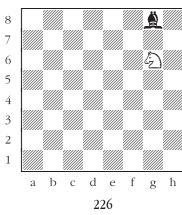

White to move: Attack an enemy piece with the knight.

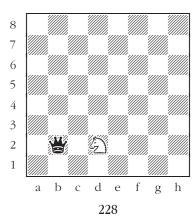

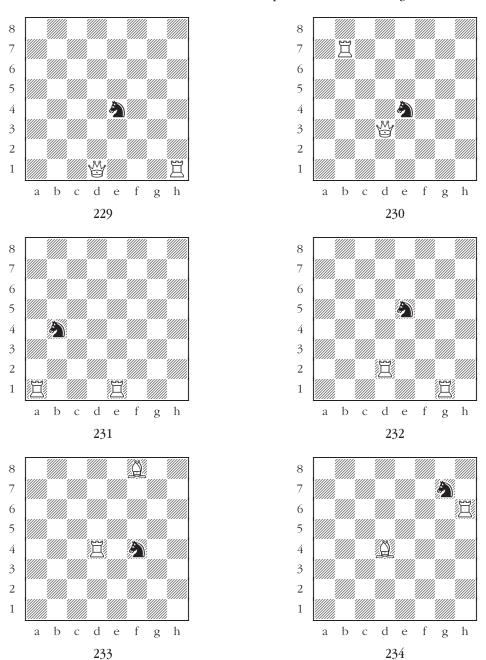

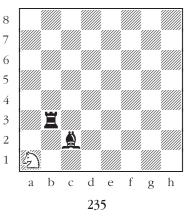

#### Double attack

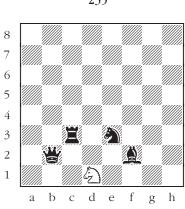

Black to move: Attack two white pieces with the black knight.

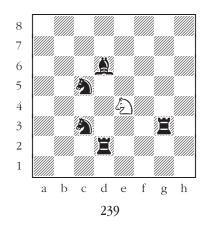

#### Capturing an undefended piece

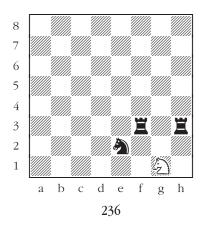

White to move: Take an undefended piece with the knight.

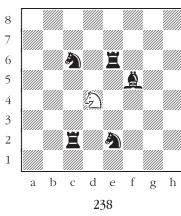

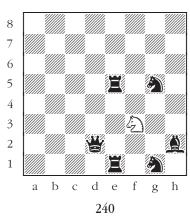

237

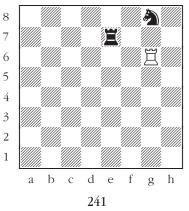

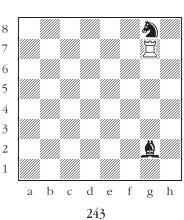

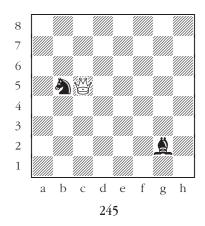

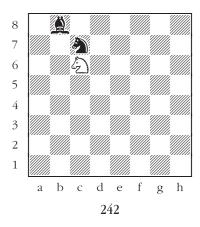

#### Defending

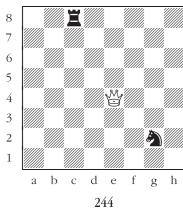

Black to move: How to save the piece?

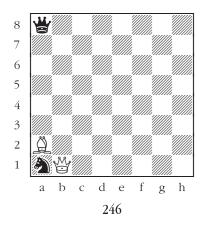

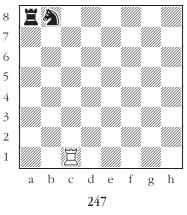

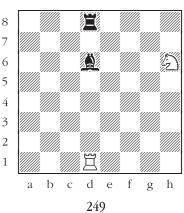

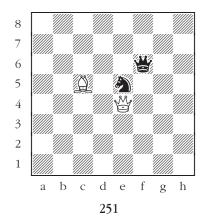

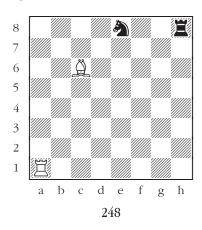

#### The pin

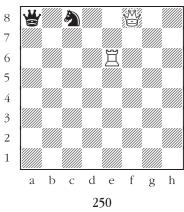

White to move: Win a piece.

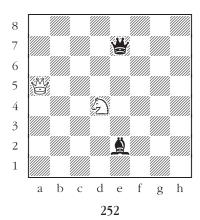

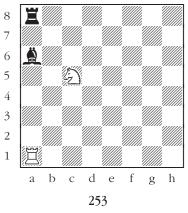

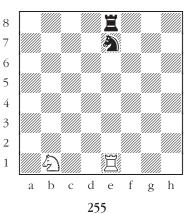

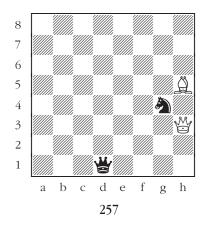

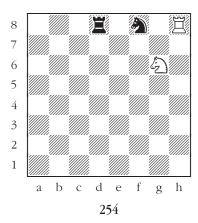

#### Escapes

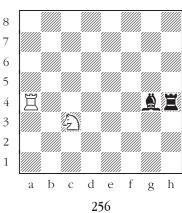

Black to move: Find the best chance.

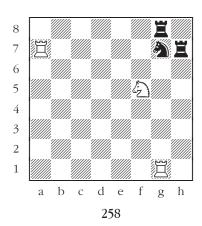

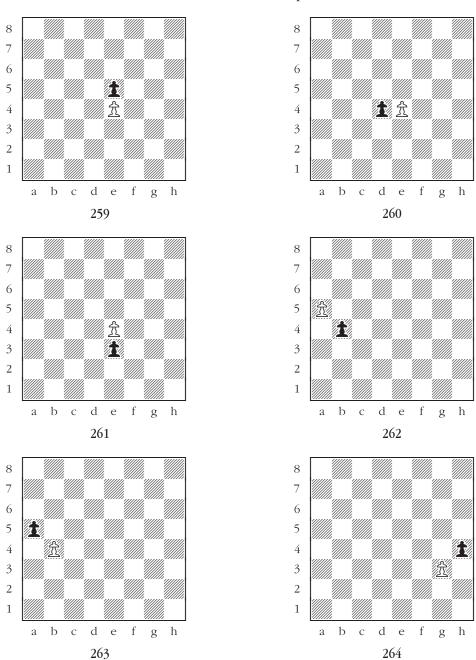

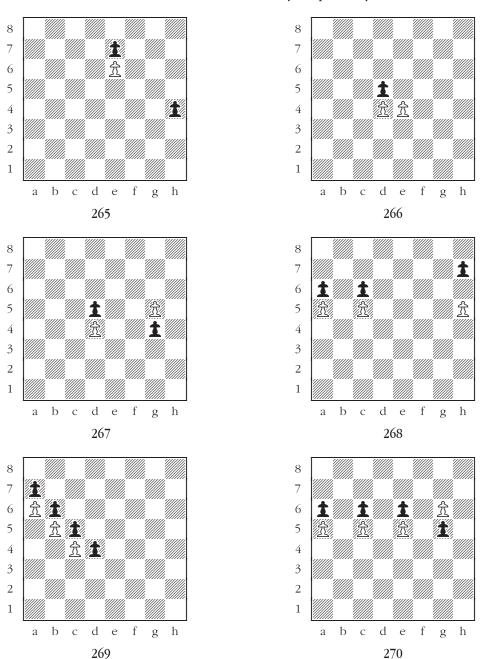

## Capturing

White to move: Can the black pawn be taken?

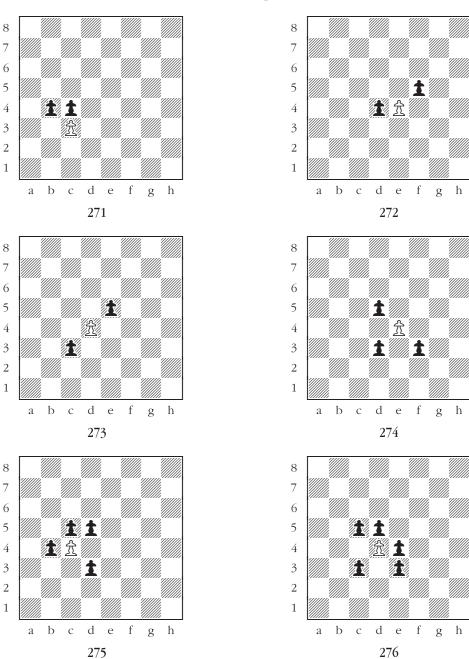

### The only move

Black to move: There is only one possibility.

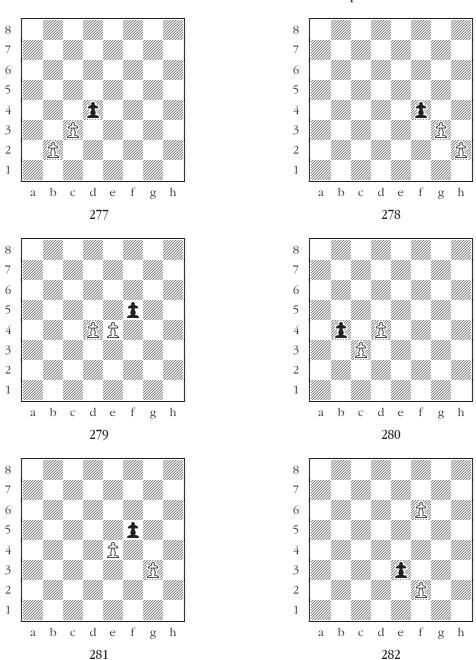

## Captures

White to move: Which pawn can be taken?

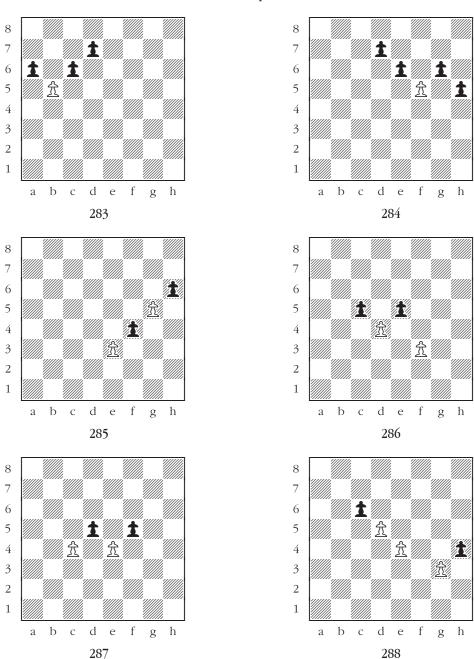

#### To take or not to take?

Black to move: Should Black take White's pawn?

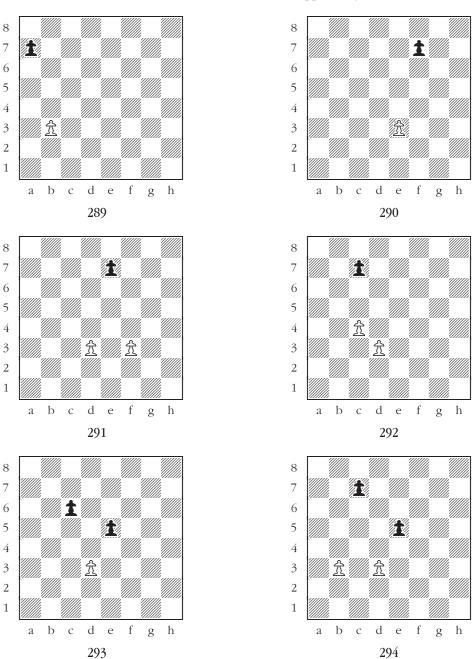

### The best capture

White to move: Which pawn is better to take?

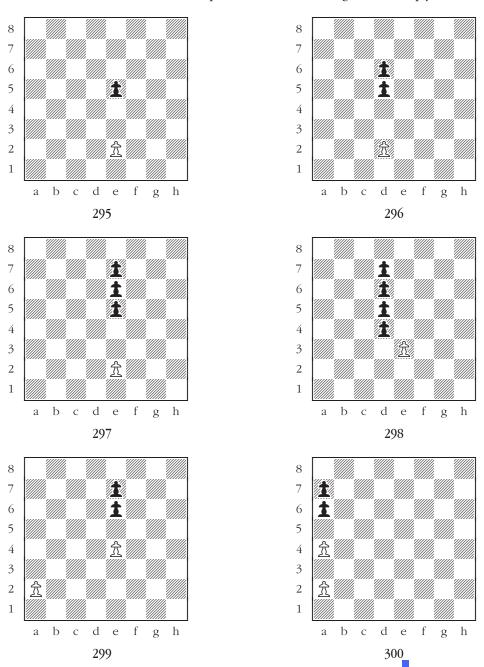

## Restricting mobility

Black to move: Find the best opportunity.

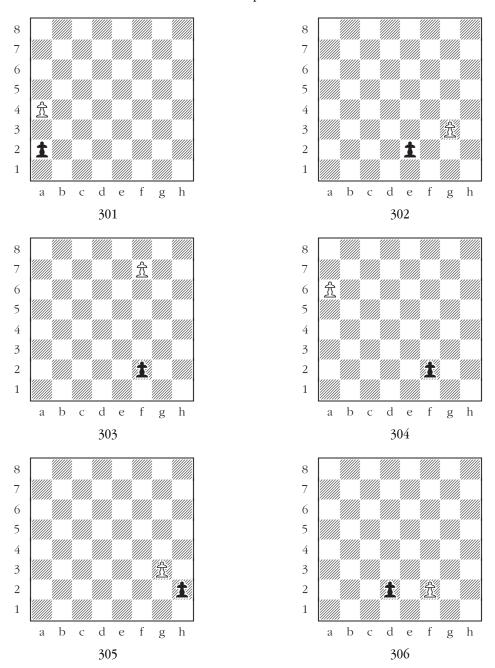

#### The blockade

White to move: How to prevent Black from making a move in reply?

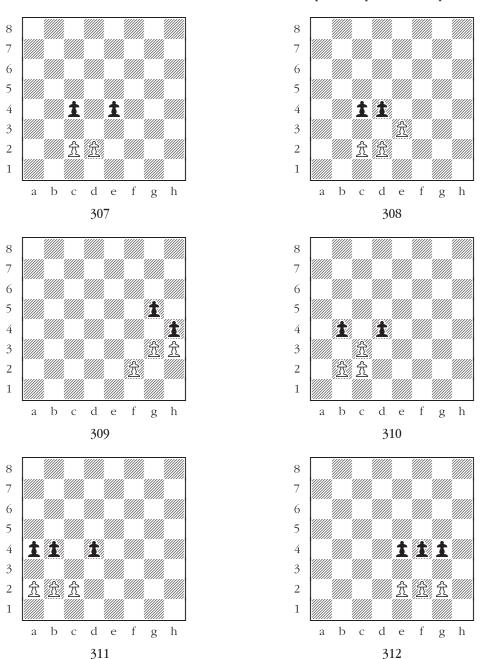

### Pawn promotion

**Black to move:** Which piece should the black pawn be promoted to, so that the white pawn is under attack?

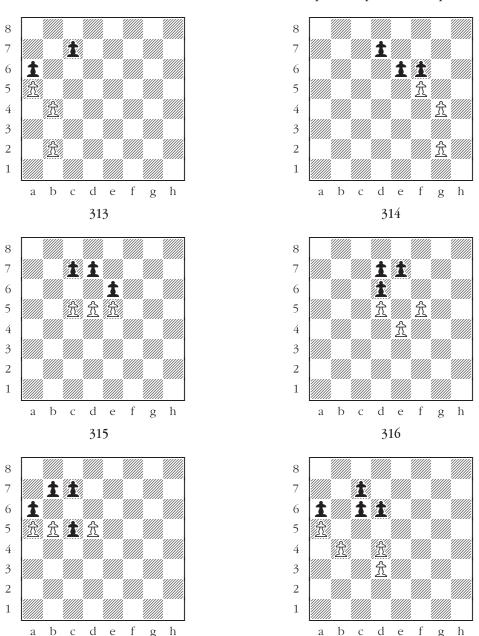

#### The breakthrough

Black to move: Which maneuver allows one of the black pawns to promote to a queen first?

#### The breakthrough

White to move: Which maneuver allows one of the white pawns to promote to a queen first?

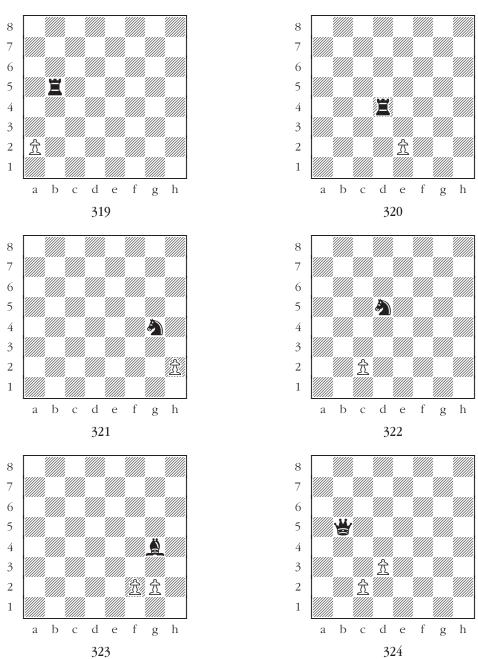

318

317

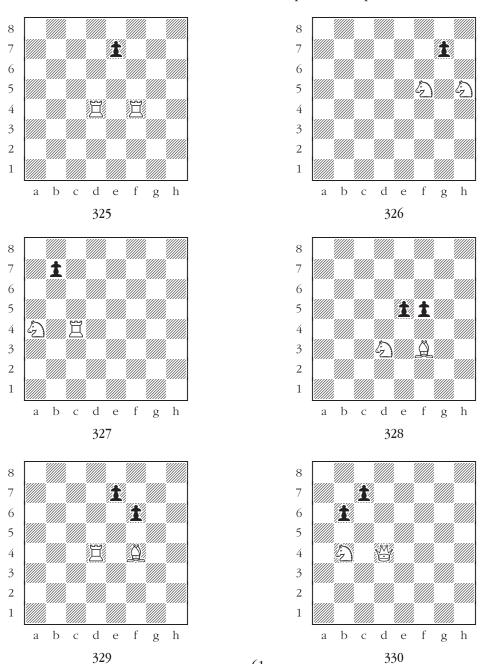

#### Attacking

White to move: Attack a black piece with a pawn.

#### Double attack

Black to move: Attack two white pieces with a pawn.

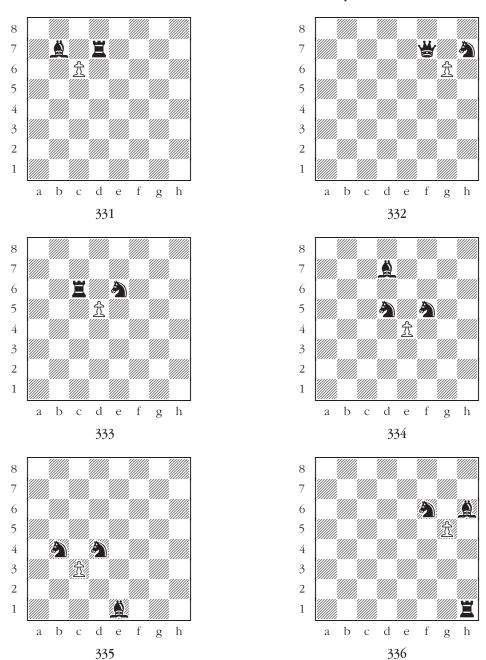

61

330

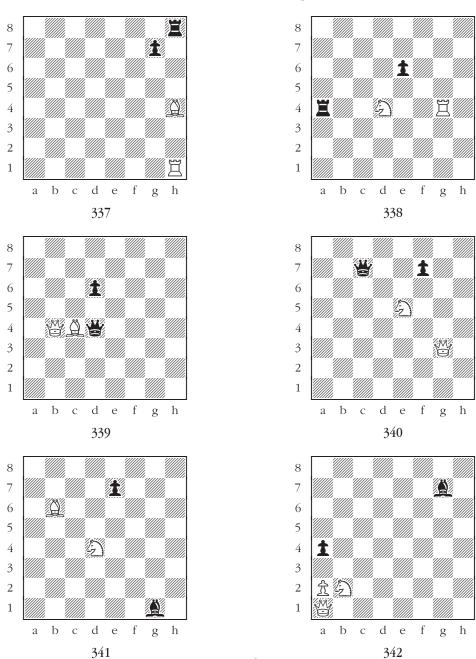

### Capturing an undefended piece

White to move: Take an undefended piece.

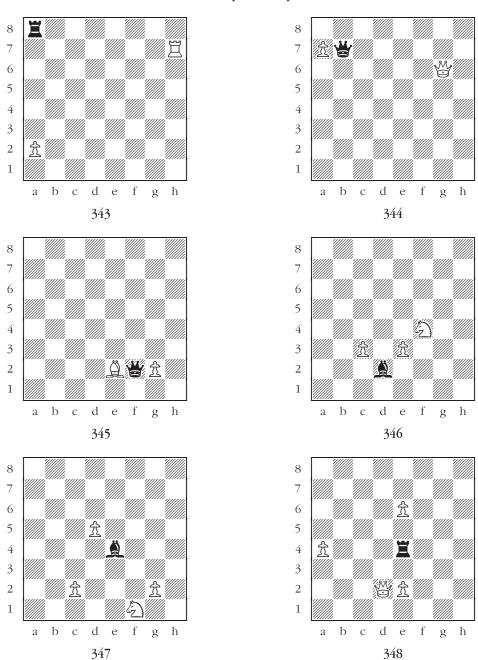

#### The pin

Black to move: Win a piece.

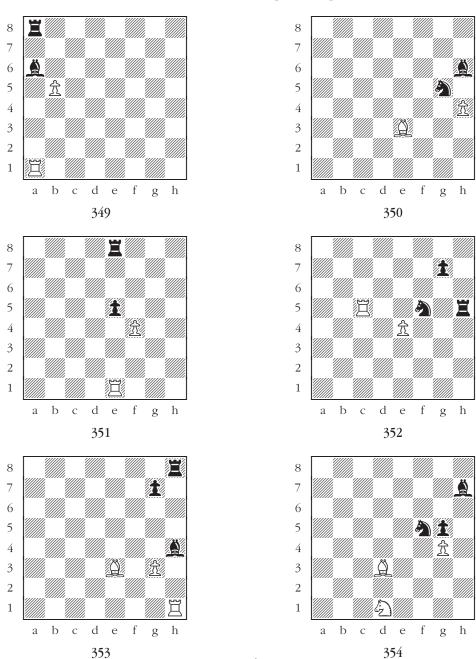

### Defending

White to move: Defend a pawn or a piece that is under attack.

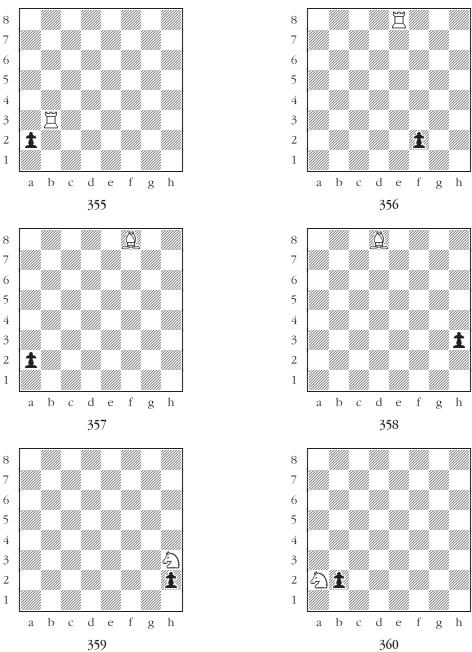

#### **Escapes**

Black to move: Save a pawn or a piece.

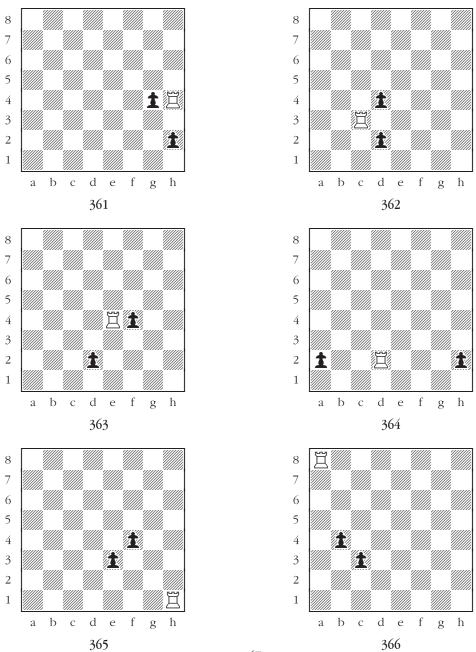

### Restricting mobility

White to move: How to stop the black pawn?

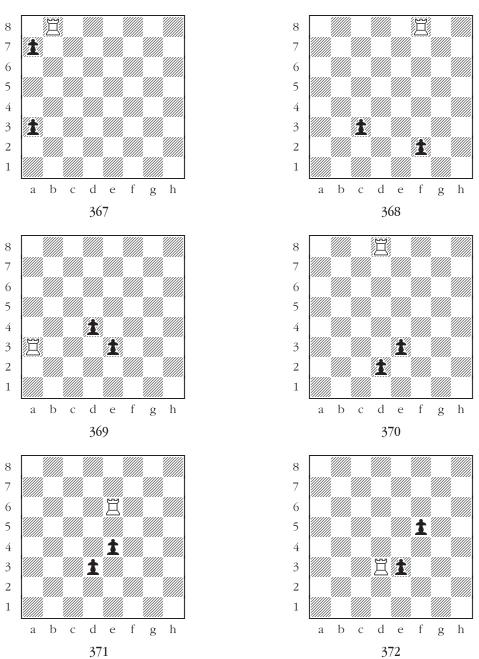

#### Rook against two pawns

White to move: Find the way to defeat the pawns.

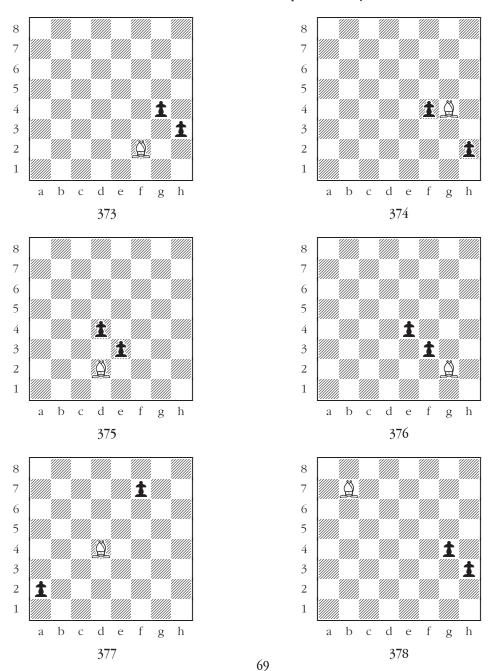

Two pawns against a rook

Black to move: Promote at least one of the pawns to a queen.

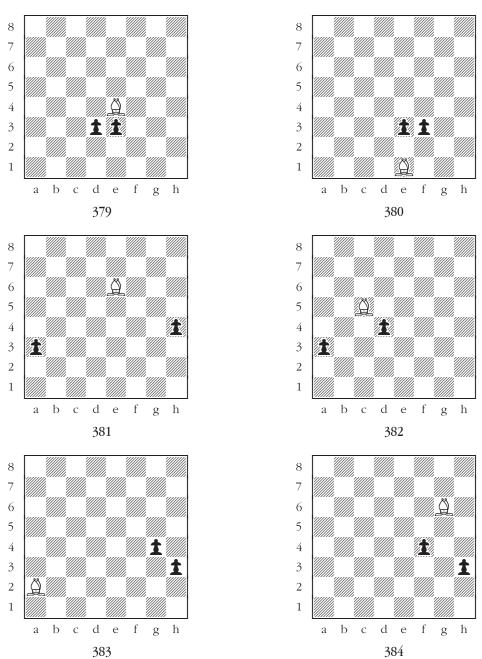

#### Bishop against two pawns

White to move: Find the path to victory.

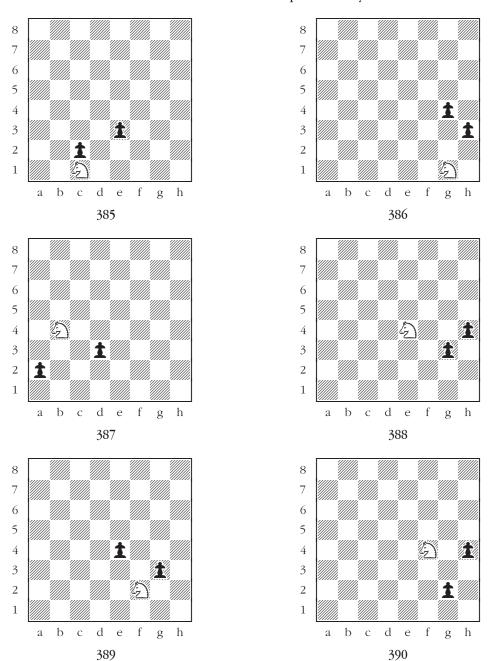

Two pawns against a bishop

Black to move: Promote at least one of the pawns to a queen.

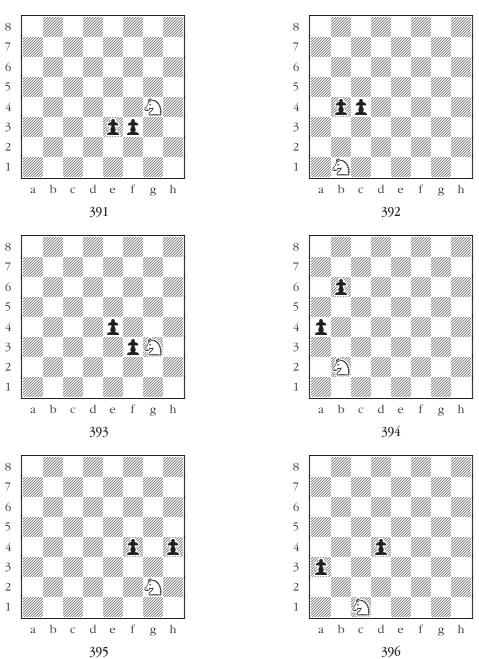

### Knight against two pawns

White to move: Find the path to victory.

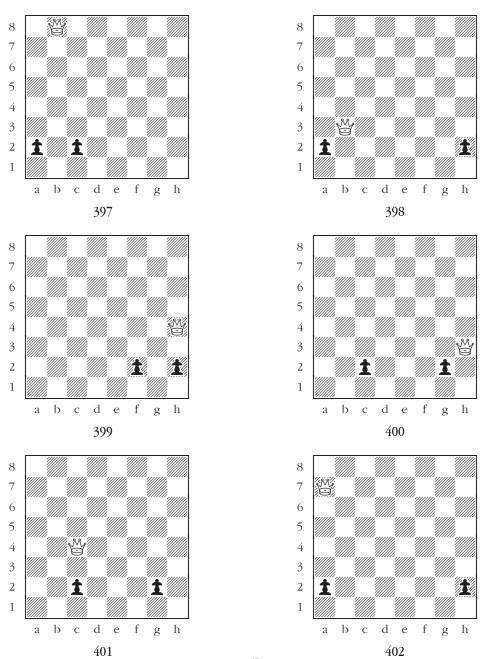

#### Two pawns against a knight

Black to move: Promote at least one of the pawns to a queen, or trap the knight.

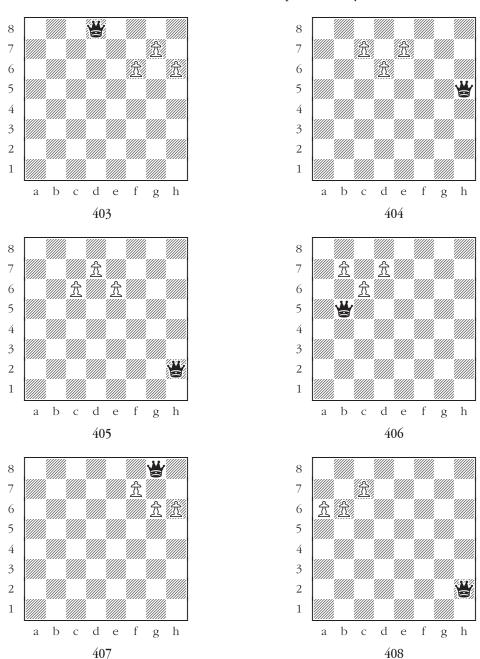

Queen against two pawns

White to move: Find the path to victory.

### Queen against three pawns

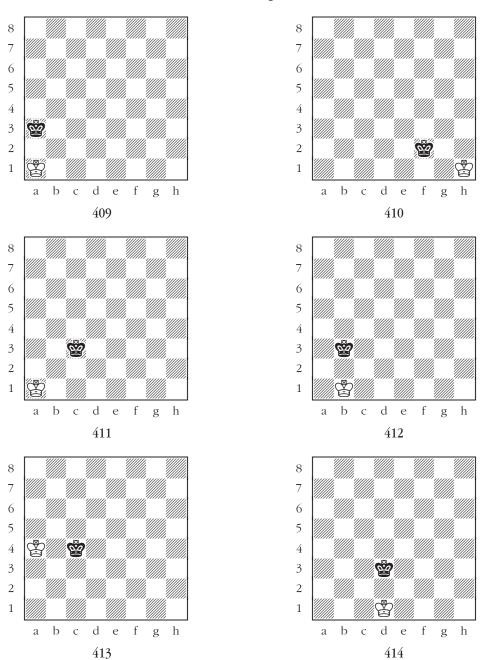

**Black to move:** Find the path to victory.

# The King

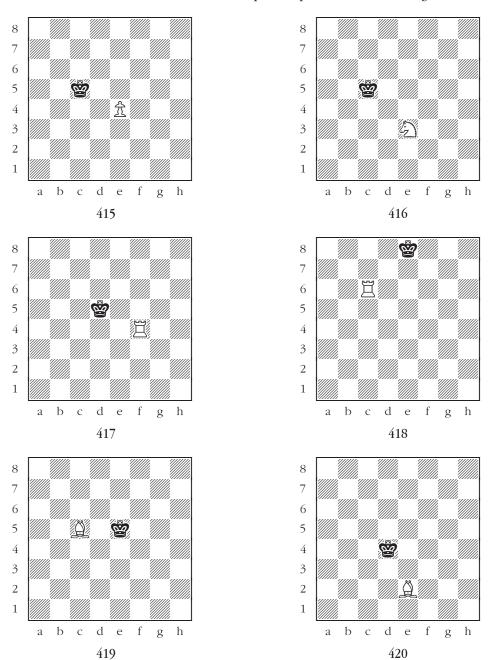

### Safe squares

White to move: Where can the white king go? Find one or two possibilities.

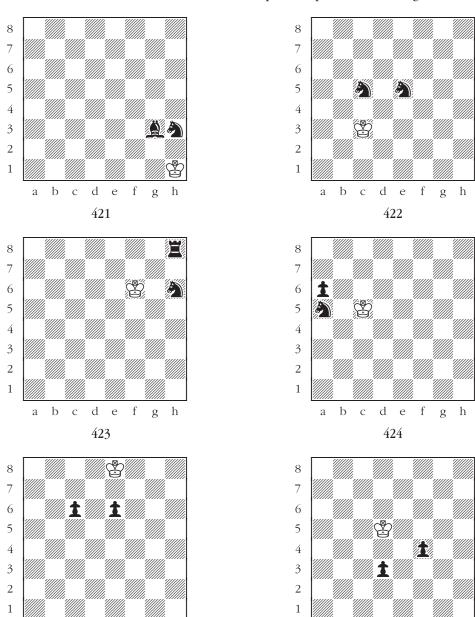

#### Attacking

Black to move: Attack a white pawn or piece with the black king.

#### Double attack

White to move: Attack two black pieces or pawns with the king.

#### King against two pawns

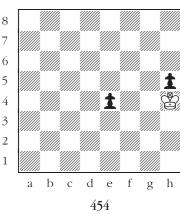

White to move: Find the best move.

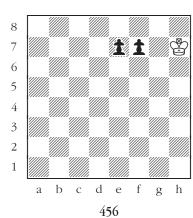

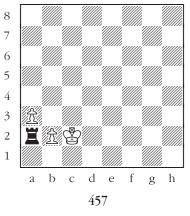

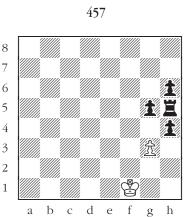

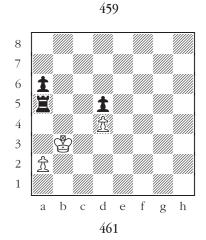

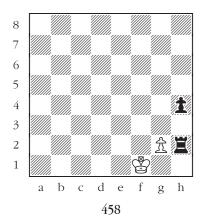

### Trapping the rook

White to move: Catch the rook.

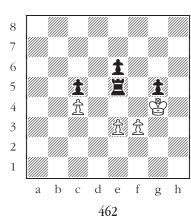

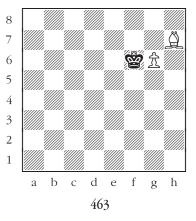

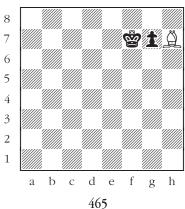

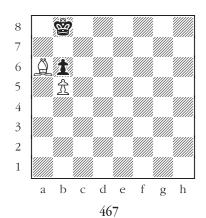

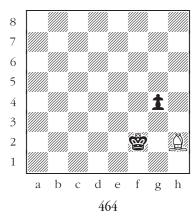

Trapping the bishop

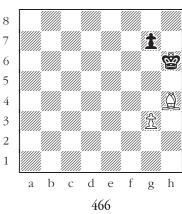

Black to move: Catch the bishop.

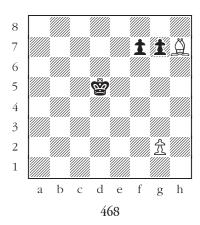

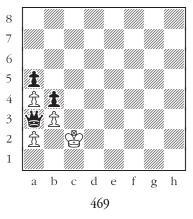

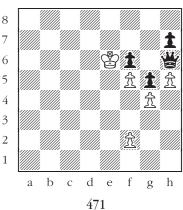

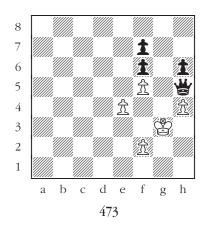

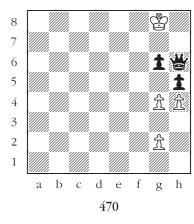

## Trapping the queen

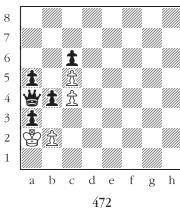

White to move: Catch the queen.

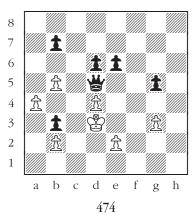

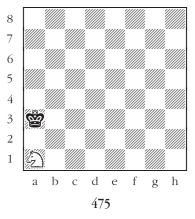

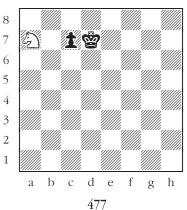

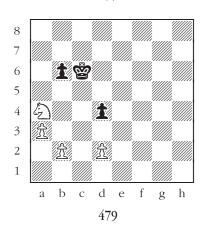

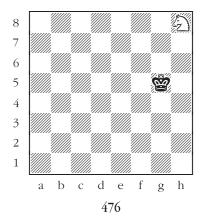

#### Trapping the knight

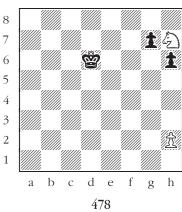

Black to move: Catch the knight.

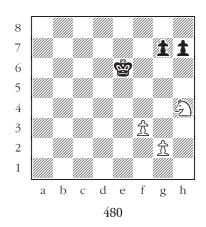

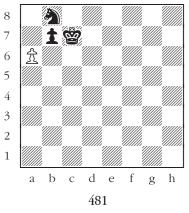

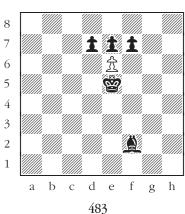

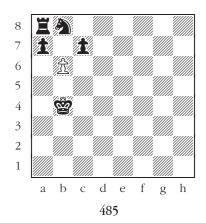

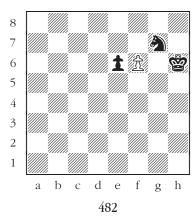

The pawn is desperate to become a queen

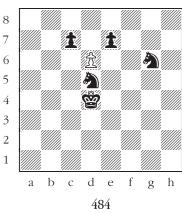

White to move: Find the best opportunity.

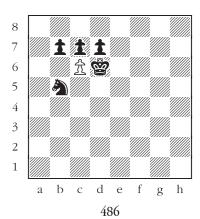

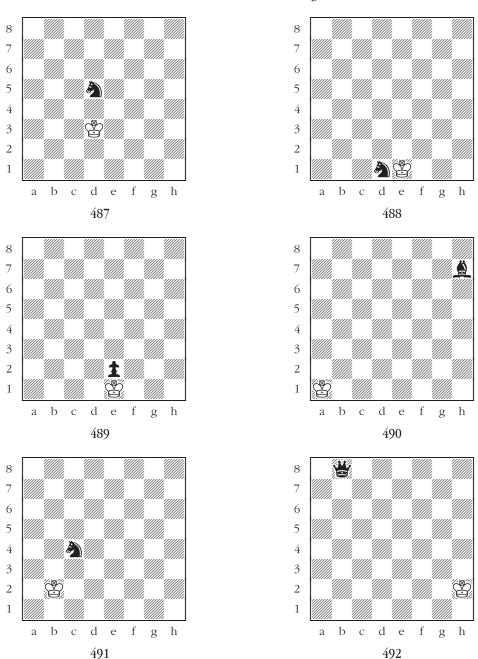

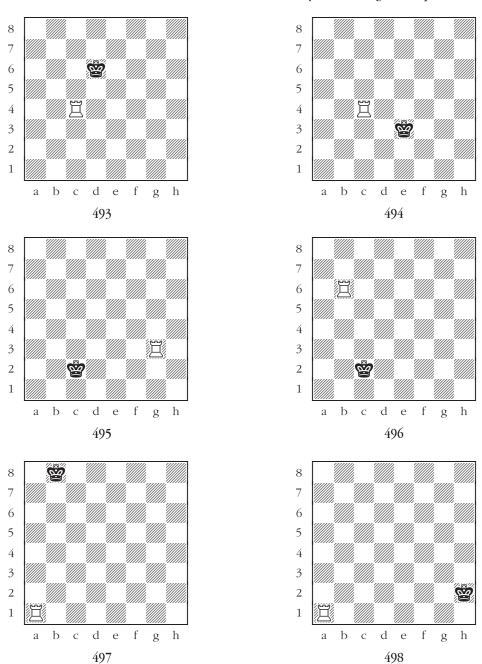

#### Is it check or not?

White to move: Is the white king in check?

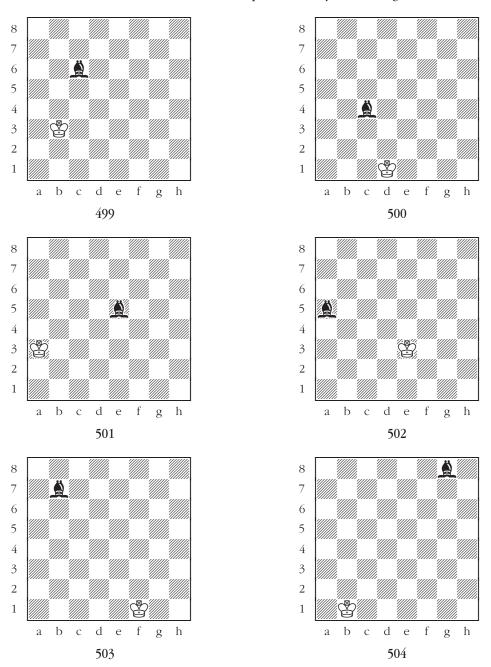

#### Rook checks

White to move: Check with the rook in such a way that the king can't capture it.

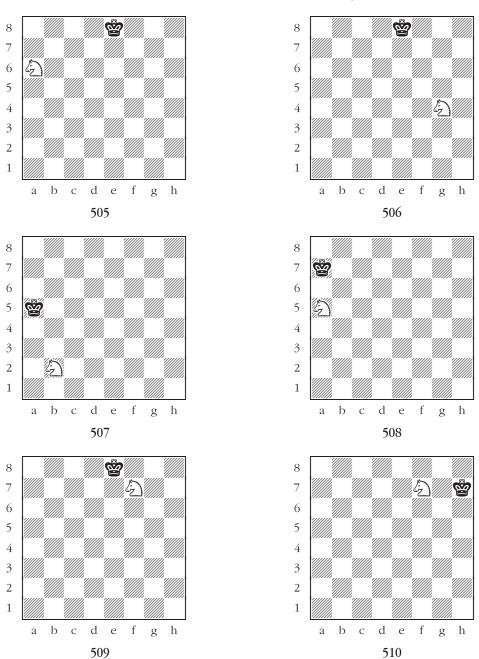

### Bishop checks

Black to move: Check with the bishop in such a way that the king can't take it.

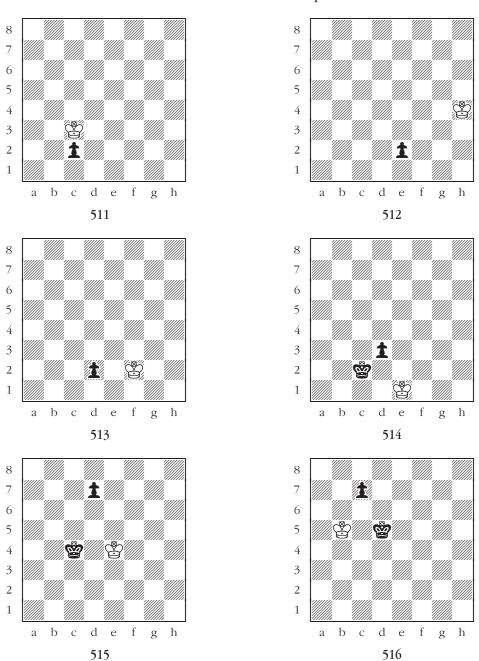

### Knight checks

White to move: Give check with the knight.

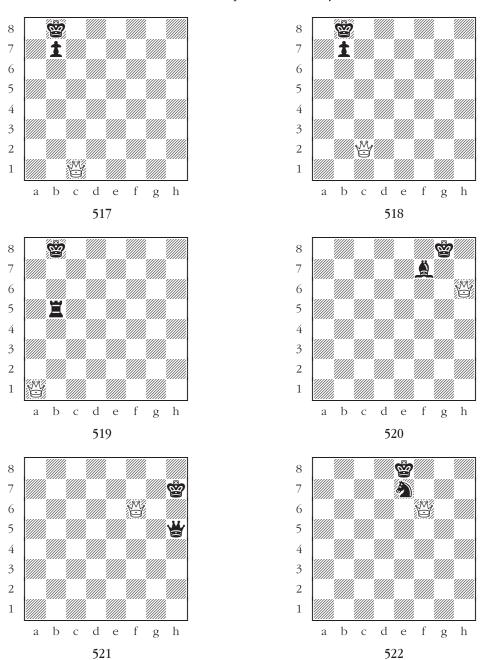

#### Pawn checks

Black to move: Give check with a pawn move.

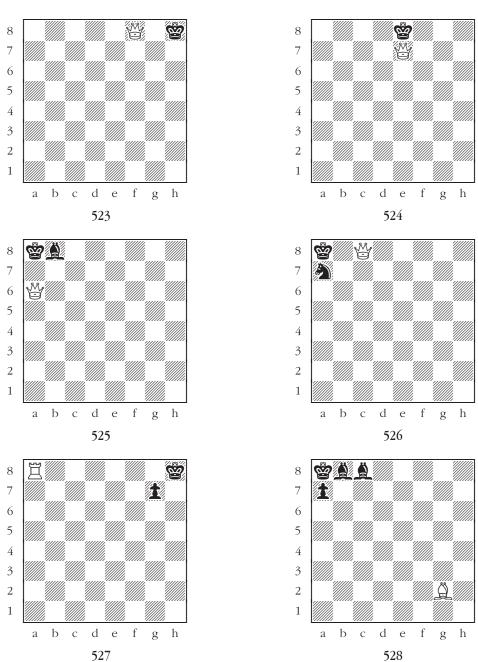

#### Queen checks

White to move: Check with the queen in such a way that Black can't take it.

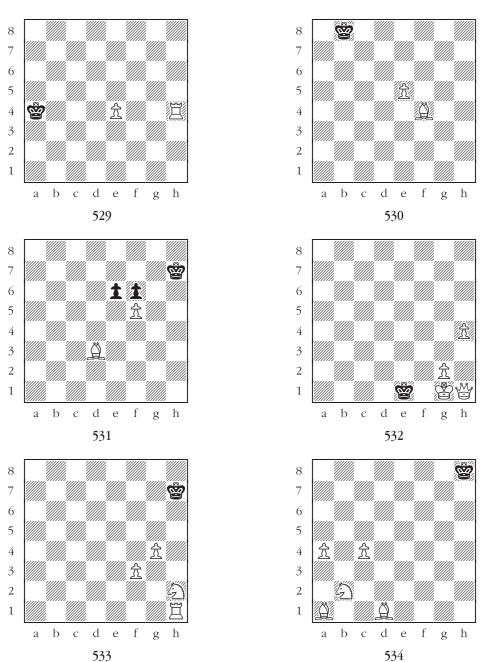

## Defending against check

Black to move: Find a defense.

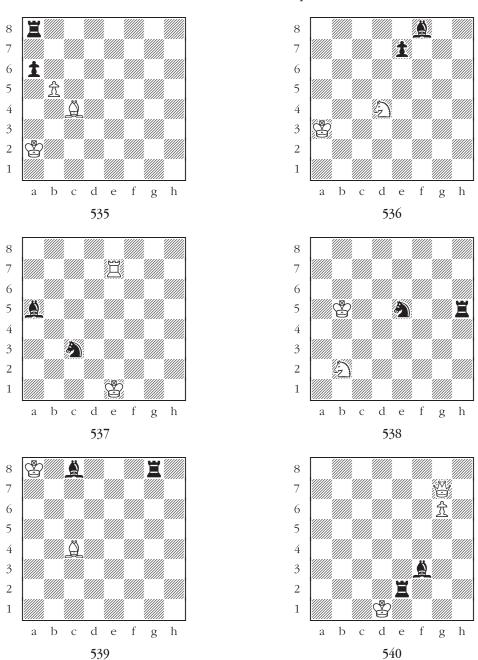

#### Discovered check

White to move: Give a discovered check.

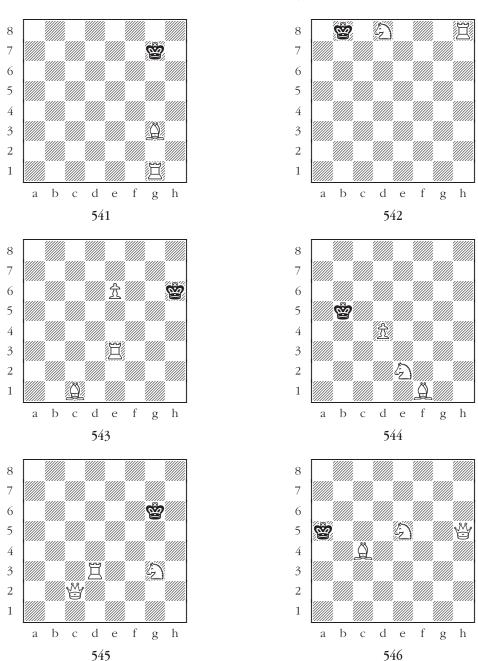

## Discovered check winning a piece

Black to move: Win a piece.

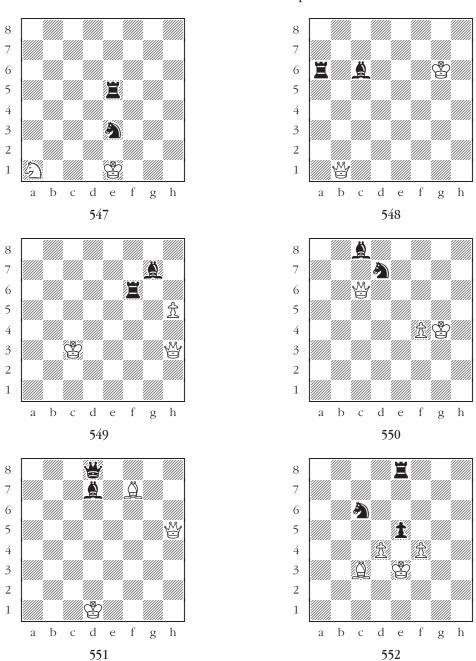

#### Double check

White to move: Give double check.

### Double check winning a piece

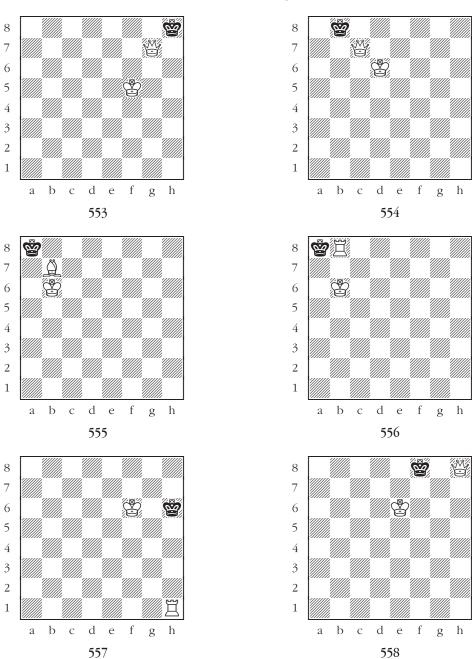

Black to move: Win a piece.

## Checkmate

#### Is it checkmate or not?

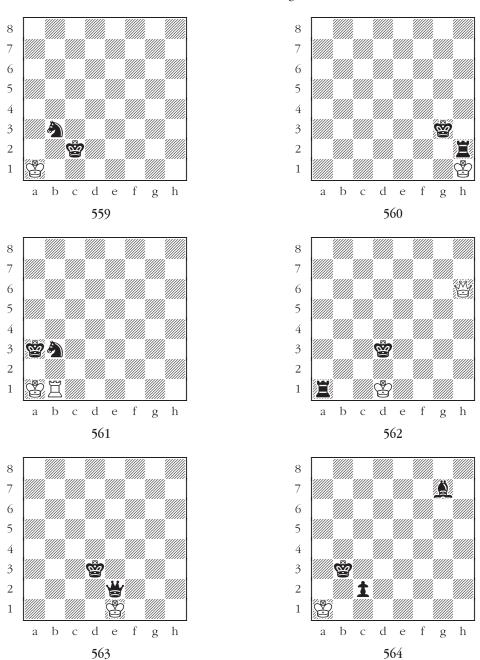

Black to move: Has Black's king been checkmated?

## Checkmate

#### Is it checkmate or not?

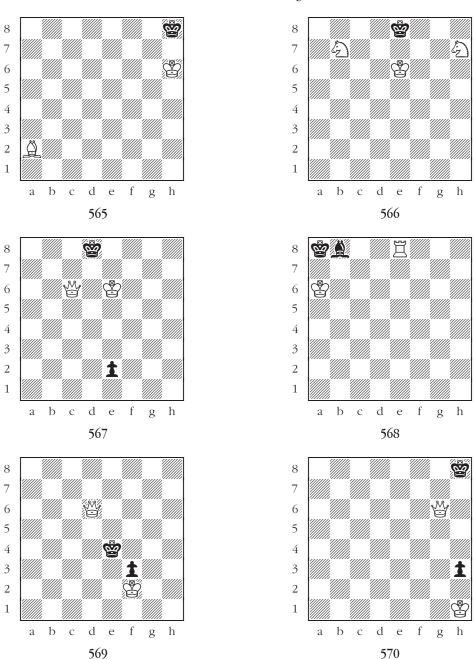

White to move: Has White's king been checkmated?

# **Stalemate**

#### Is it stalemate or not?

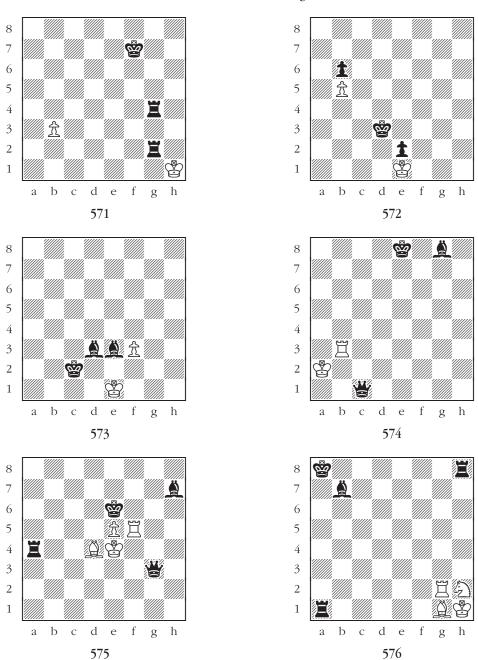

Black to move: Is Black's king stalemated?

## **Stalemate**

#### Is it stalemate or not?

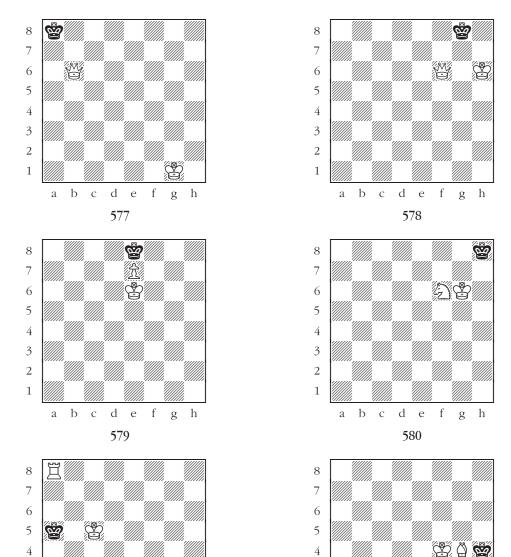

White to move: Is White's king stalemated?

### **Checkmate and Stalemate**

#### Is it checkmate or stalemate?

Black to move.

# Note for Coaches, Parents, Teachers, and Trainers

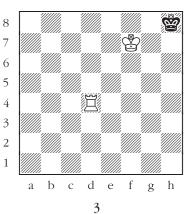

The ability to deliver mate is the foundation of the art of chess. But in the mass of chess literature little attention is usually paid to this extremely important stage of learning – problems where you give checkmate in just one move. Books that do include exercises on this theme have three faults: a) the positions aren't classified; b) in the descriptions they tell you which piece will deliver mate, a circumstance which doesn't correspond to the reality of a chess game; and c) there are less than 300 problems, which isn't enough to acquire the skill of checkmating.

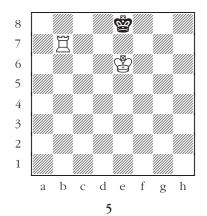

Our collection doesn't have those deficiencies. It contains 540 precisely-structured three-, four-, and five-piece positions that cover the typical mating setups for that particular number of pieces. There is also a practice section in the book (54 five-piece positions) and a section of entertaining puzzles (24 positions). After solving all 618 problems, the beginning chessplayer will master the typical mating patterns and gain a solid basis for further improvement.

# **Fun Puzzles**

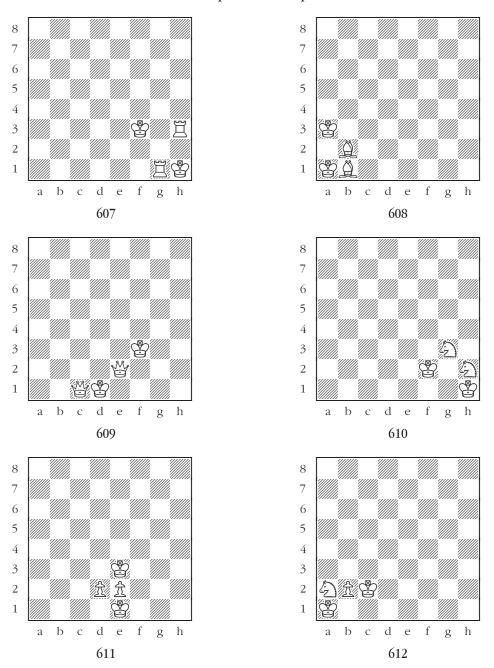

The king fell off the board! Black declared checkmate, but the white king got knocked off the board! Where was White's king?

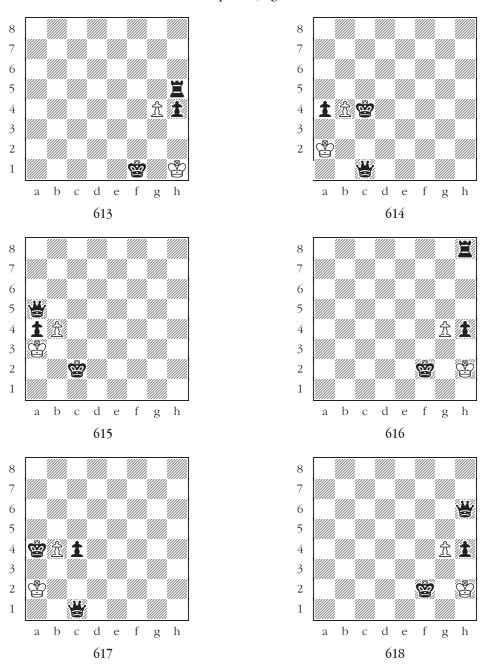

Stolen piece! White declared checkmate, but Black took the mating piece off the board. Where was the white piece that gave checkmate?

**Fill in the color of the pieces:** Black checkmated White, but the designer forgot to add color to the black pieces. Which pieces should be black?

*En passant:* Black to move and checkmate White in one move. It looks impossible, but there is a solution. To solve the puzzle, figure out what was White's last move.

# Note for Coaches, Parents, Teachers, and Trainers

By solving the problems in the first volume of this series, students reinforced their basic knowledge of the rules of the game and got a feel for the relative strengths of the pieces. By solving the problems in the second collection, students acquired their first skills at checkmating the king, and learned to quickly give mate in one in simple positional setups.

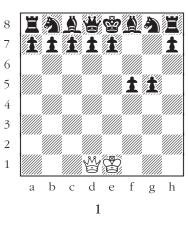

With the problems in the third collection, we aim to: 1) help students to see patterns in multi-piece positions in the opening and the middlegame; 2) teach students to use important tactical tools such as pins, discovered checks, and double checks to deliver mate; 3) familiarize them with the typical mating scenarios that arise no later than the 16<sup>th</sup> move of the game in various chess openings – primarily in those that beginners play at first (mainly the open and half-open games); 4) teach them to develop a feel for the smallest changes in the position of the pieces (to this end, we offer pairs of middlegame and endgame situations in which a slight difference in the initial position leads to different mechanisms for achieving mate); and 5) provide practice in giving mate in six-and seven-piece pawn, minor-piece and major-piece endings.

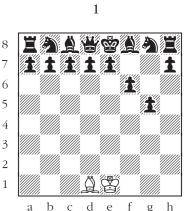

Mate-in-one problems are still an underestimated theme in the training of novice chessplayers. The inability to quickly find an opportunity to give mate in one in any position has a negative effect on a player's development. The majority of modern games end with both players short on time (in time trouble), and in those conditions the one whose skill at giving mate in one has become automatic enjoys a serious advantage. But not knowing just one of the typical mating setups, or being unable to see it in a complicated piece arrangement, often leads to defeat even for the experienced player.

# Mate in One in the Opening

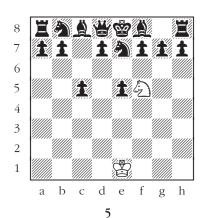

# Approaching the Opening Two Pieces Against a Whole Army

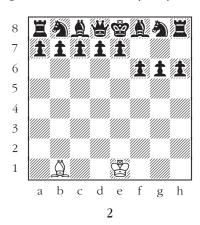

White to move: Black has all of his troops on the board, and aside from the king, White has just one piece. But this piece turns out to be stronger than the whole enemy army.

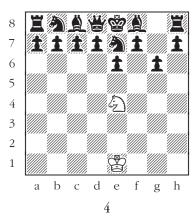

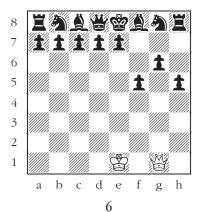

3

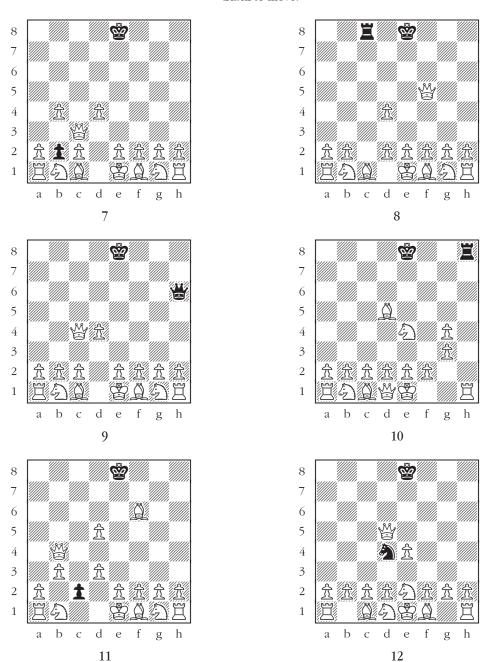

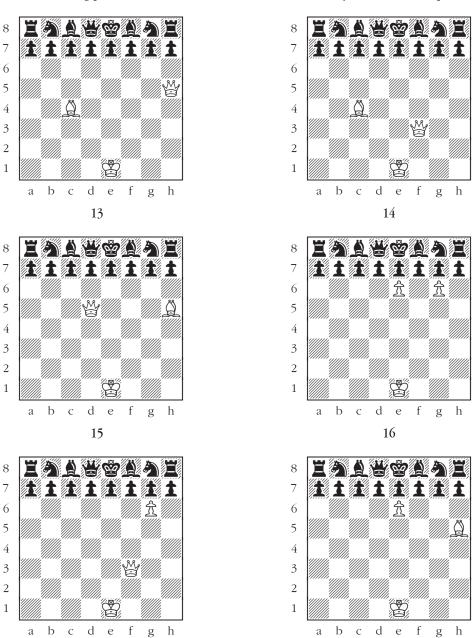

7

# Two Pieces Against a Whole Army

# Three Pieces Against a Whole Army

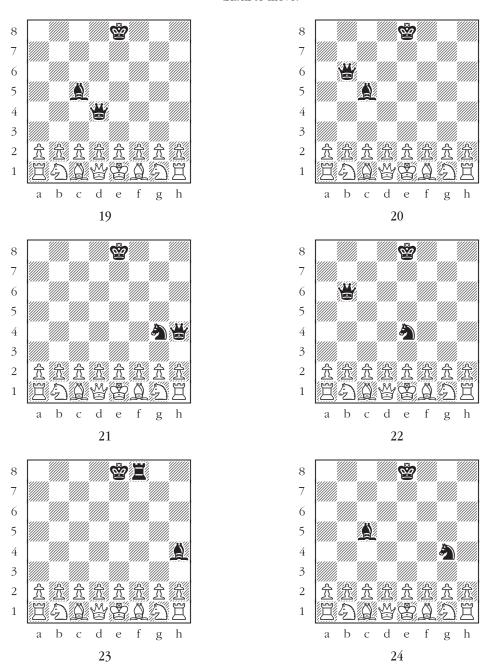

White to move: Besides the king, White only has two pieces, and Black has his whole army frozen in its starting position. White mates him, and there are two ways to do it in each position.

17

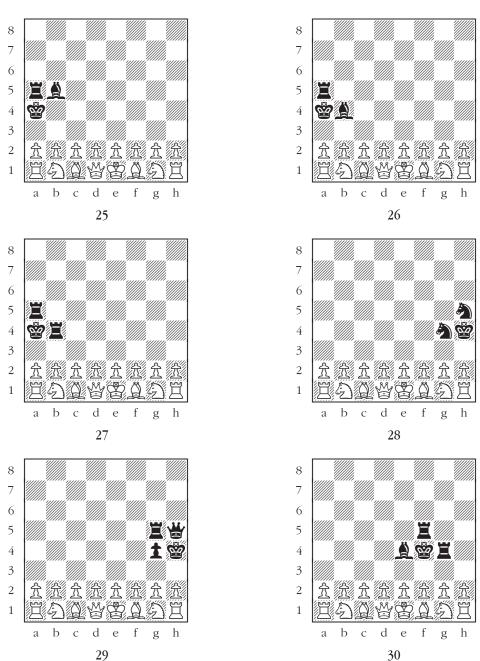

18

# Three Pieces Against a Whole Army

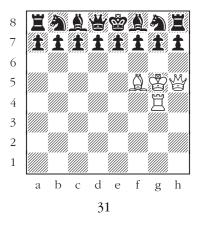

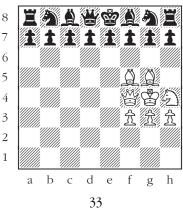

# Strength in Numbers

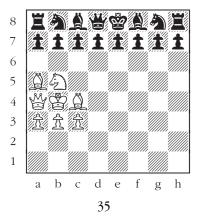

White to move: All of White's pieces are still on their starting squares. How to win in one move?

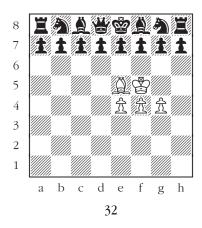

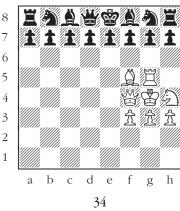

#### Strength in Numbers

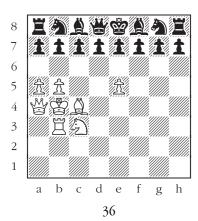

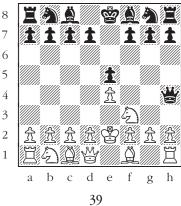

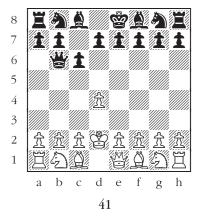

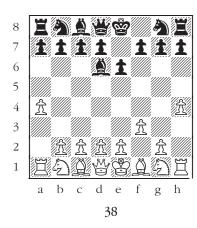

# **Silly Games**

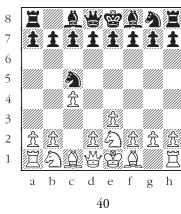

#### Catastrophe on Move 3

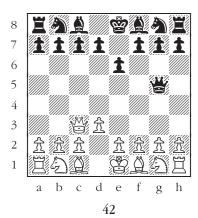

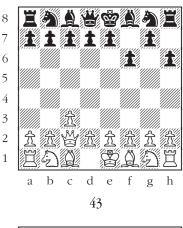

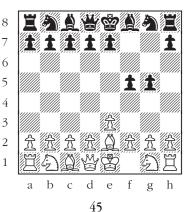

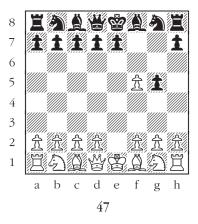

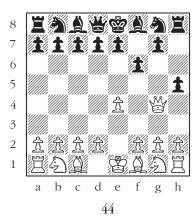

#### Catastrophe on Move 3

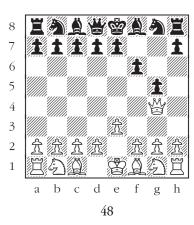

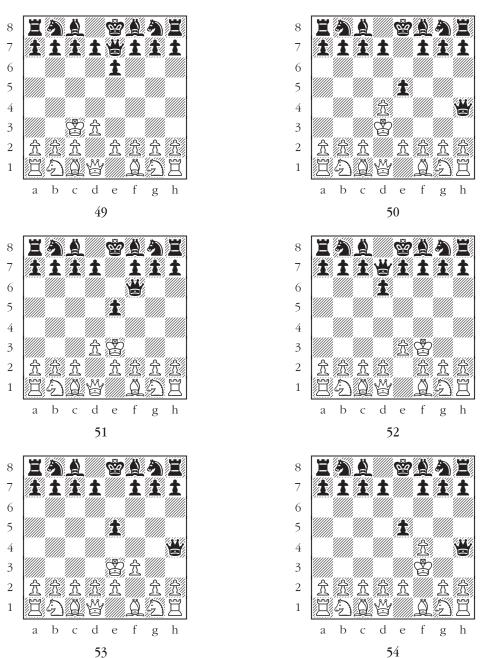

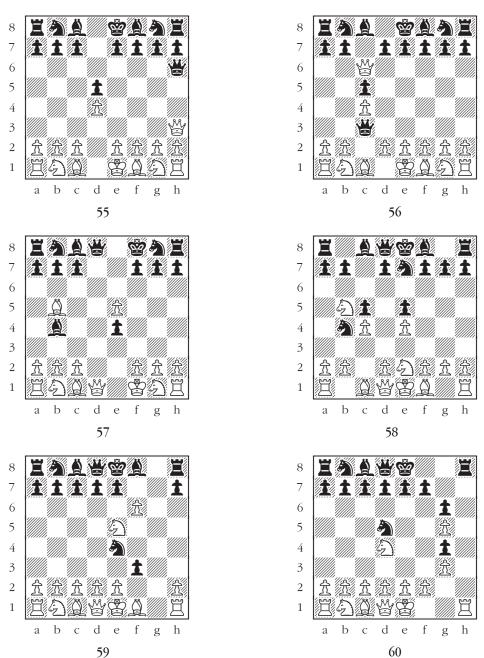

#### Catastrophe on Move 3

Black to move: For some reason, White's king has come out to the third rank. Punish him!

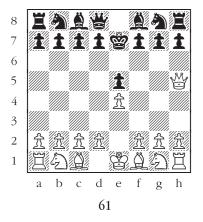

#### Copycats

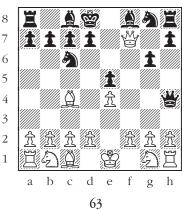

White to move: Black wants to draw the game by copying White's moves. Punish him!

# Note for Coaches, Parents, Teachers, and Trainers

It is impossible to become a competent chessplayer without the ability to play elementary endgames. Even though there are many books on endgames, those books often disregard the simplest endings. This book has been written to cure this deficiency.

The present volume is dedicated to the most important three- and four-piece endgames. In the majority of the problems the first move is relatively easy to find.

Positions where the white pieces fight against the black ones comprise the biggest part of this book. Such positions teach the student to keep an eye out for checkmate, stalemate, and a variety of other tactics.

Other goals for this book include the following:

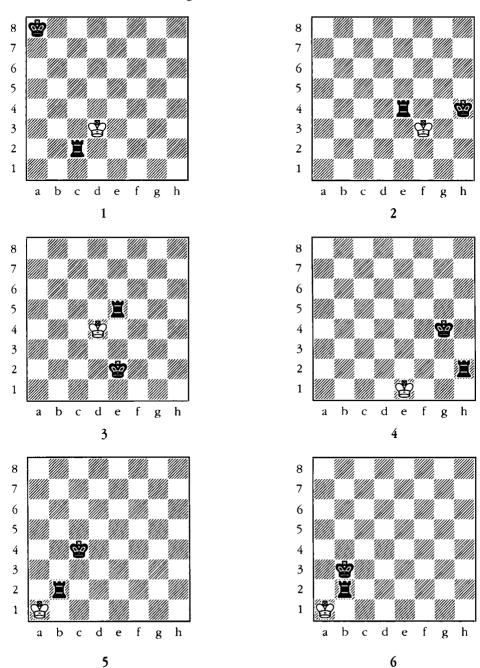

- enabling the student to learn the skills needed to play elementary endgames;
- revisiting the skills of attack and defense learned from previous *Chess Camp* volumes;
  - gaining an understanding of the coordination between pieces; and
  - discovering the hidden potential of the pieces in attack and defense.

Many authors underestimate the importance of solving elementary problems for the development of young chessplayers. That is why most of the problems the student will encounter are original and were created specifically for this book.

# **Endgames with Three Pieces**

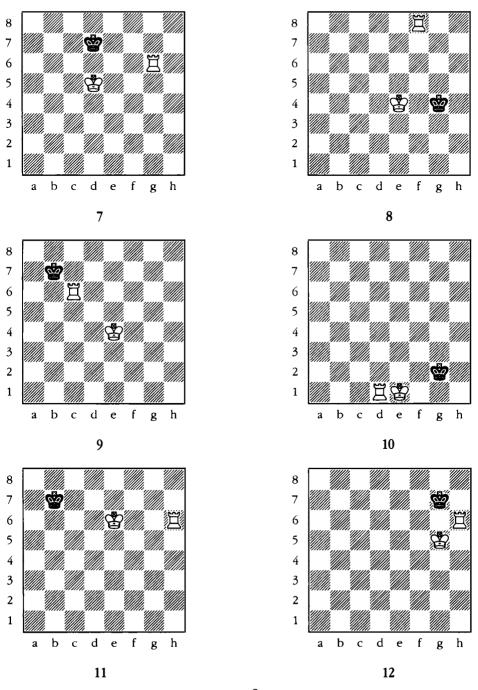

King + rook vs. king

**Black to move.** Should Black move the king? Watch out for king moves that lose a rook or deliver stalemate.

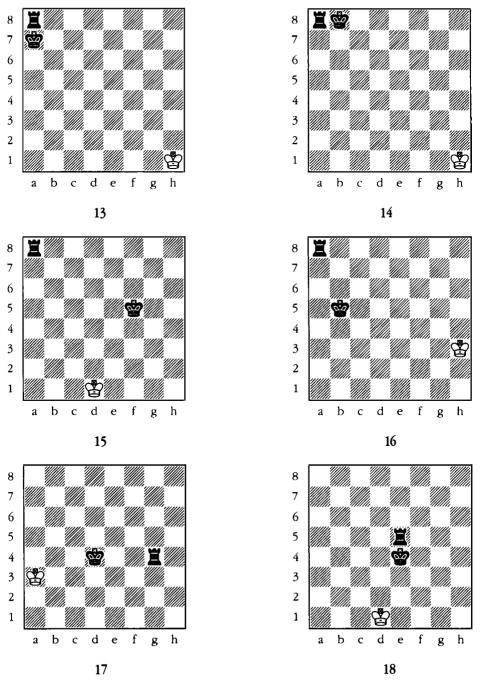

# King + rook vs. king

White to move. Force the black king to retreat to the last rank or the last file.

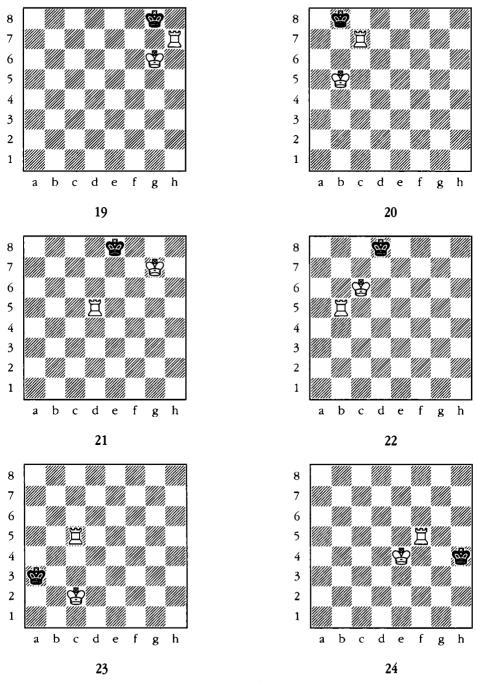

# King + rook vs. king

Black to move. Stop the white king from leaving the last rank or the last file.

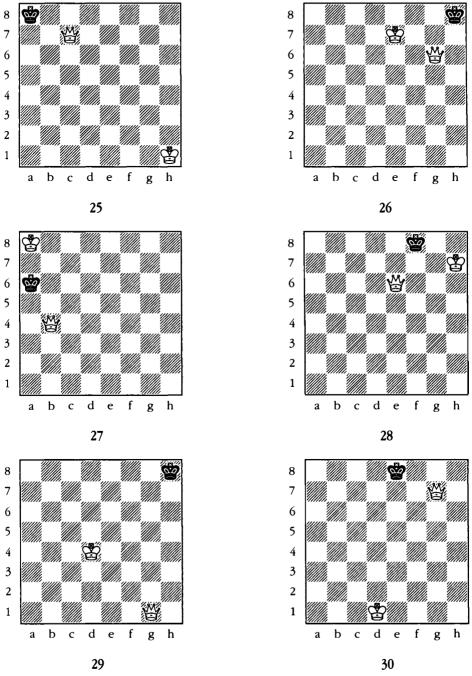

# King + rook vs. king

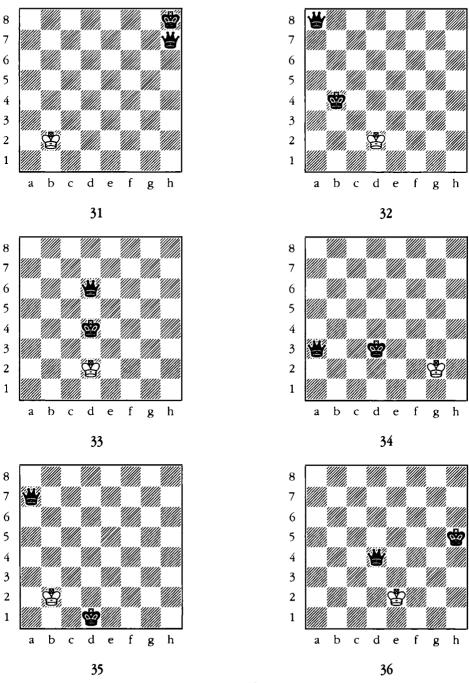

White to move. Checkmate in two moves.

White to move. Is it best for White to move the king?

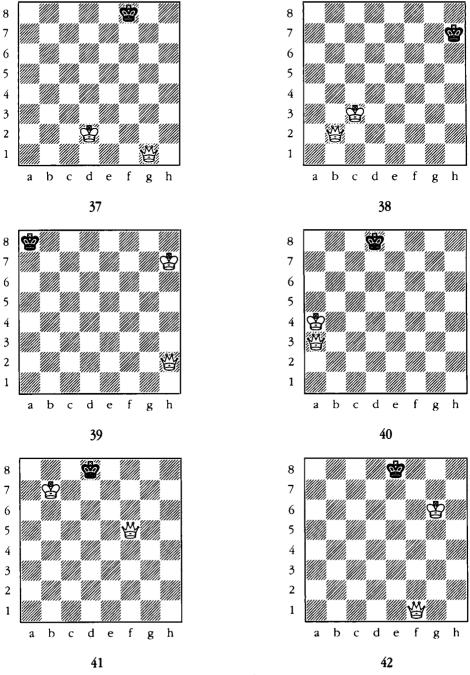

Black to move. Force White's king to retreat to the last rank or the last file.

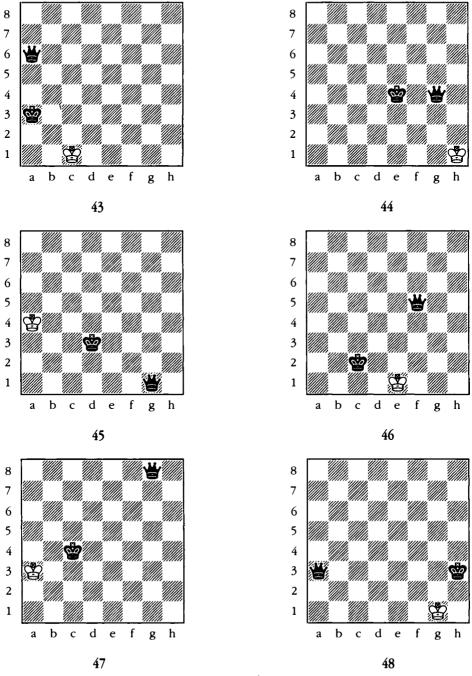

White to move. Stop the black king from leaving the last rank or the last file.

Watch out for stalemate.

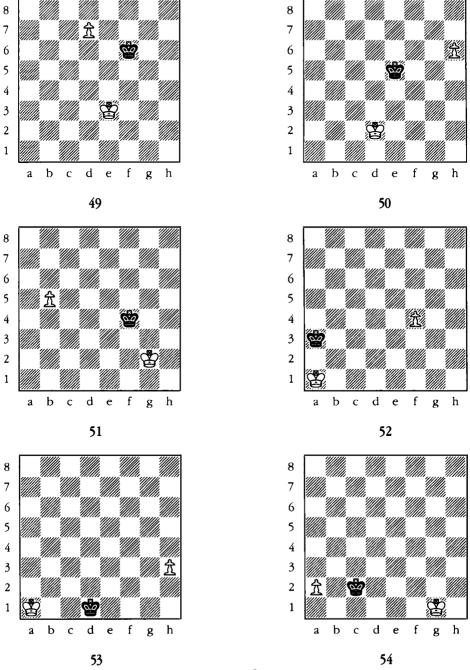

Black to move. Checkmate in two moves.

# King + pawn vs. king

Black to move. Can the black king catch the white pawn?

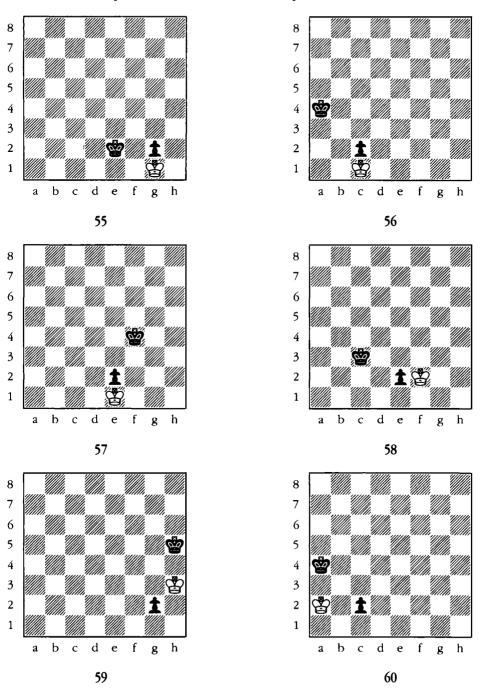

15

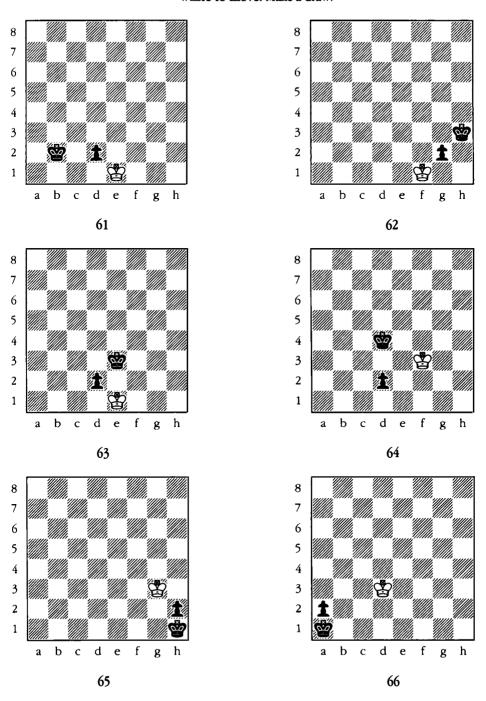

# King + pawn vs. king

#### Black to move and win.

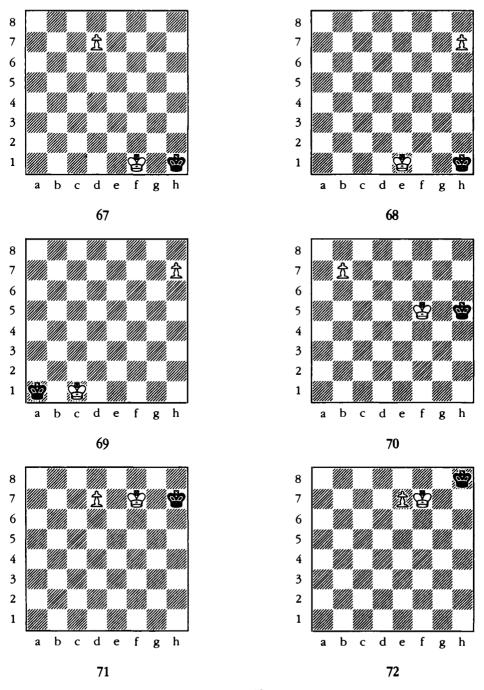

Black pawn on the second rank or white pawn on the seventh rank.

White to move. Make a draw.

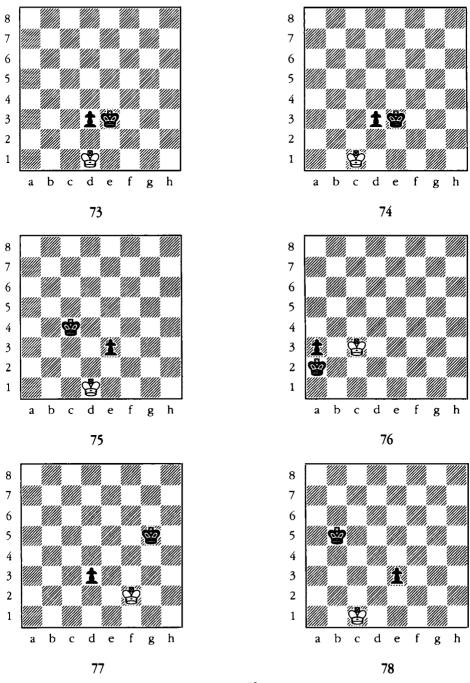

White to move. Checkmate in two moves.

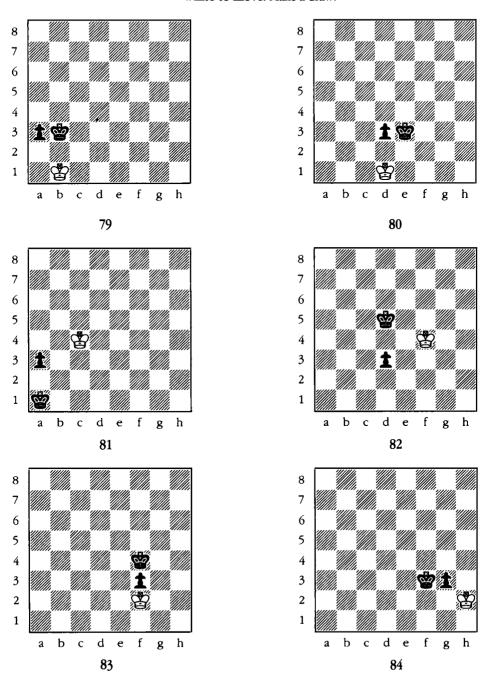

#### Black to move and win.

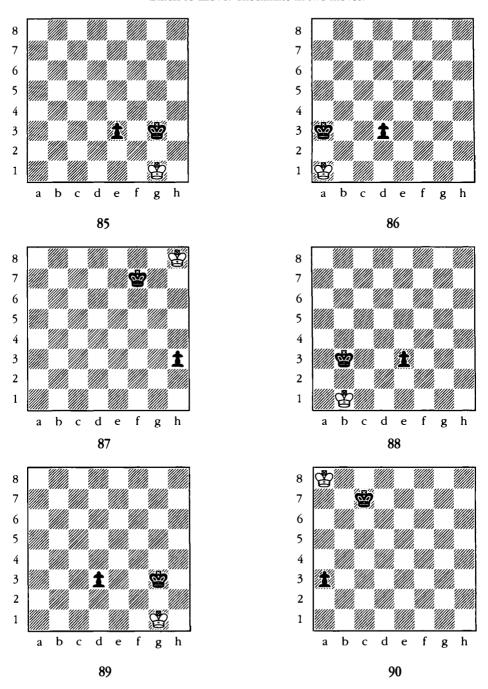

Black pawn on the third rank or white pawn on the sixth rank.

White to move. Make a draw.

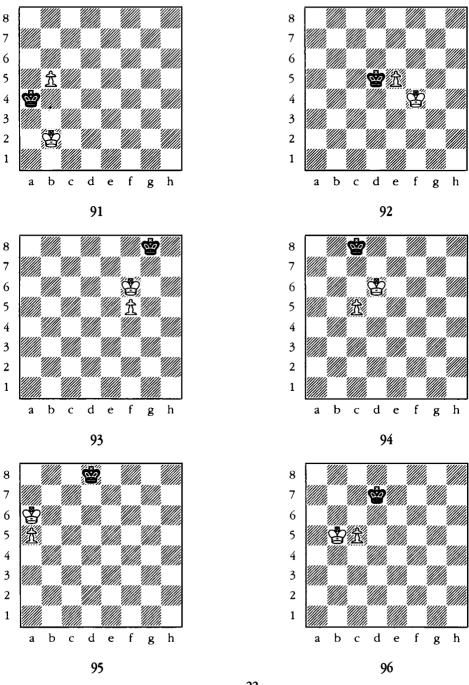

Black to move. Checkmate in two moves.

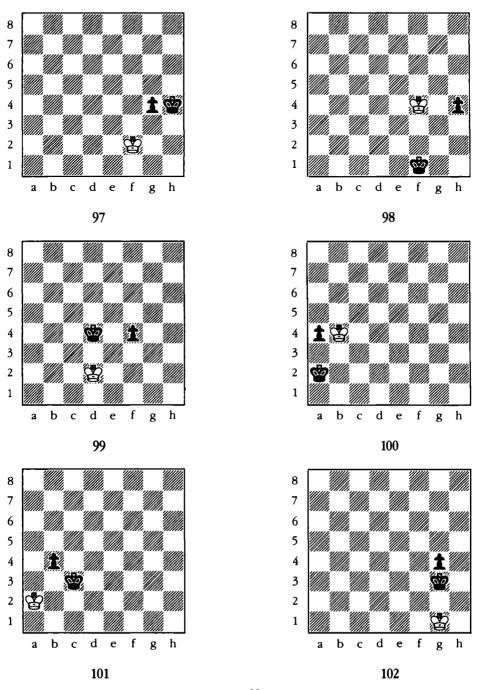

#### White to move and win.

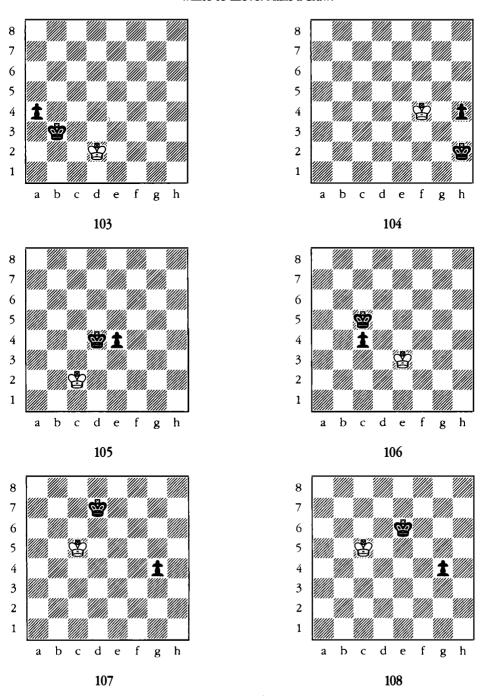

Black pawn on the fourth rank or white pawn on the fifth rank.

Black to move and win.

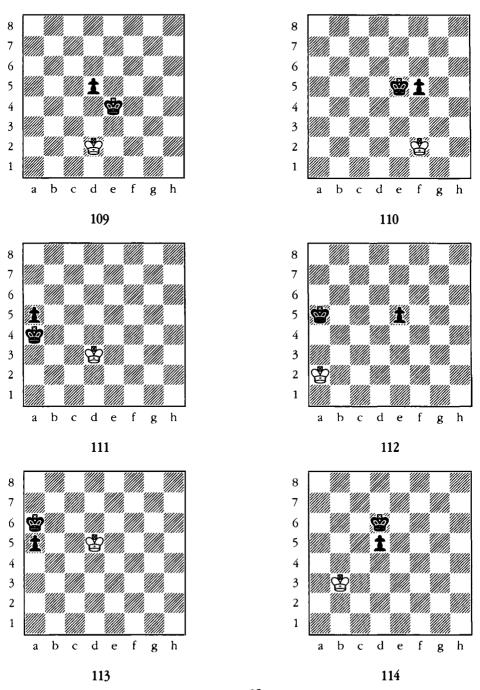

White to move. Make a draw.

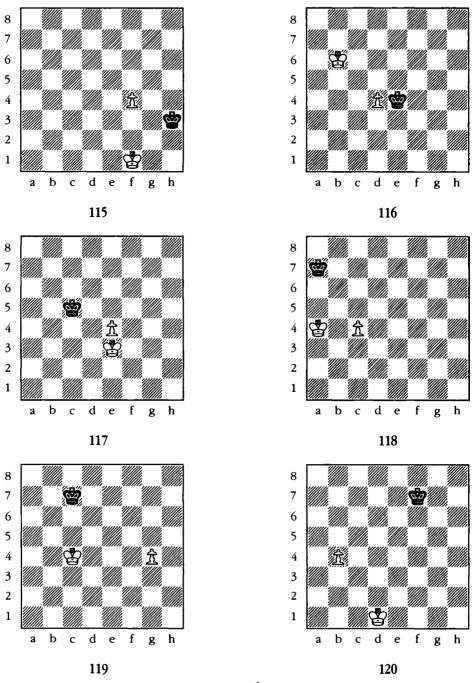

#### Black to move.

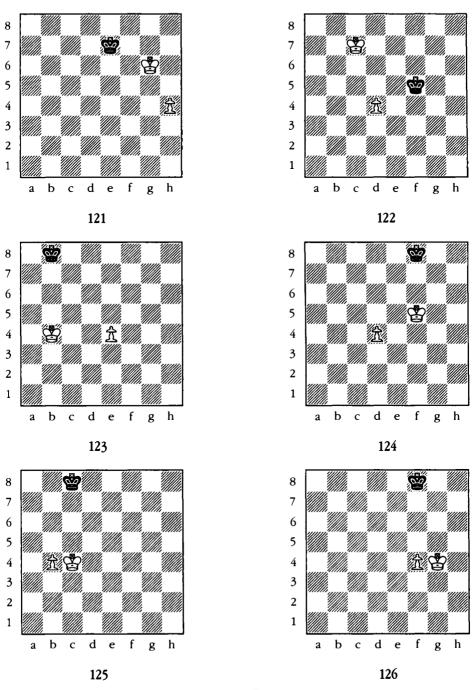

Black pawn on the fifth rank or white pawn on the fourth rank. Find the best move.

#### White to move and win.

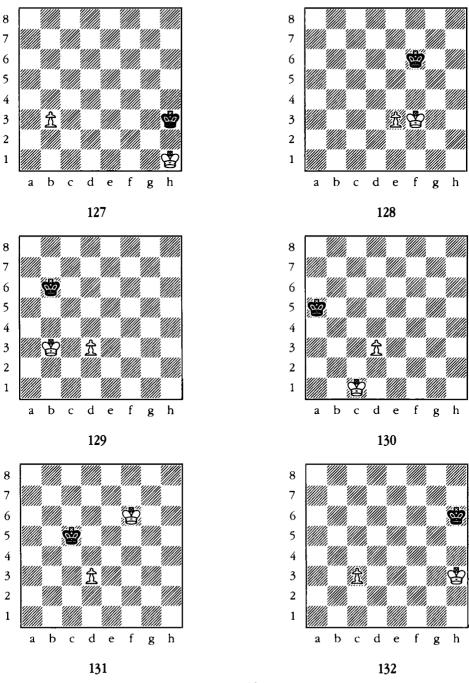

Black to move. Make a draw.

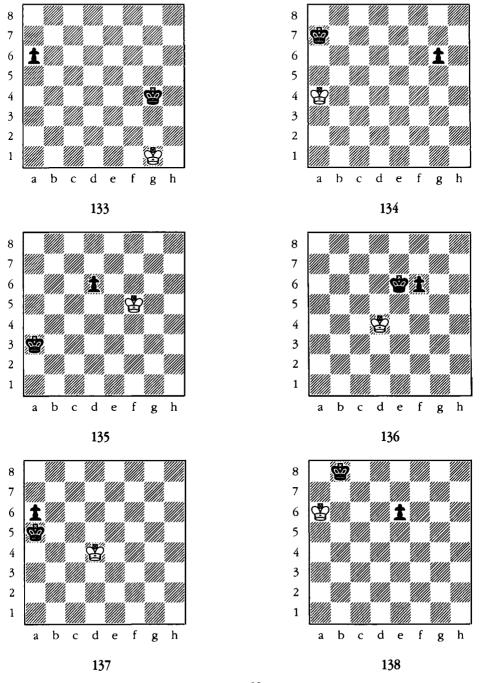

#### White to move and win.

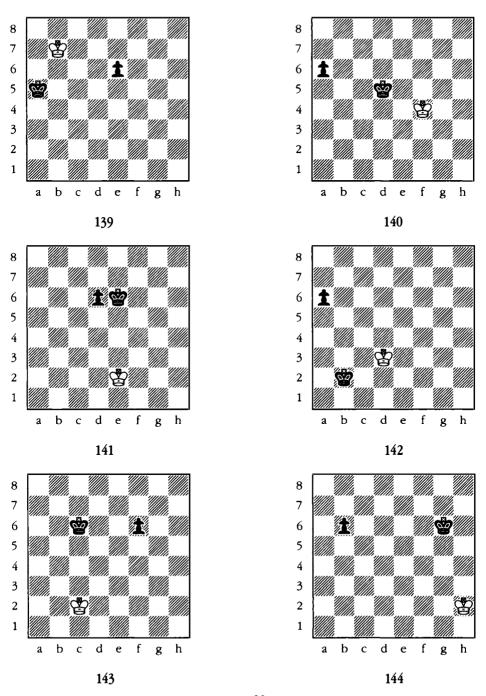

Black pawn on the sixth rank or white pawn on the third rank.

#### Black to move and win.

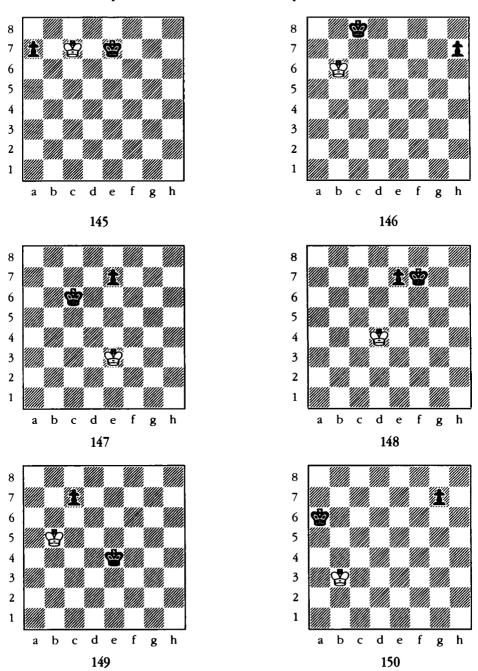

White to move. Make a draw.

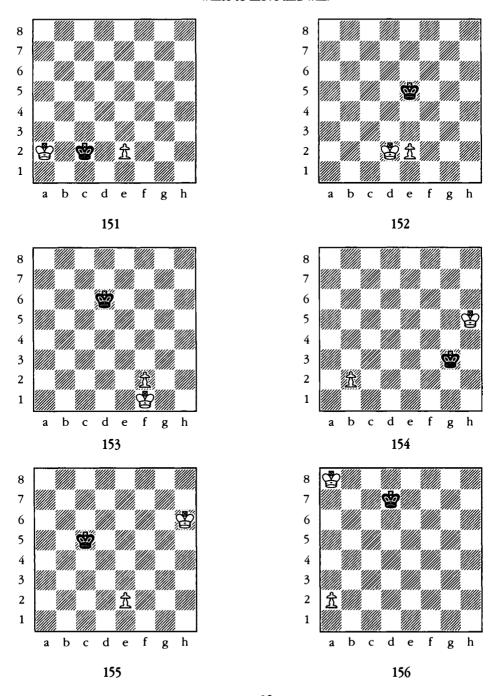

#### Black to move and win.

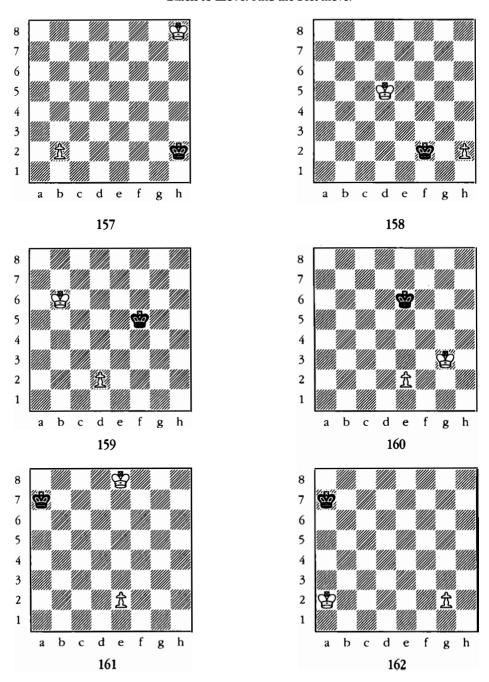

Black pawn on the seventh rank or white pawn on the second rank.

#### White to move and win.

Black to move. Find the best move.

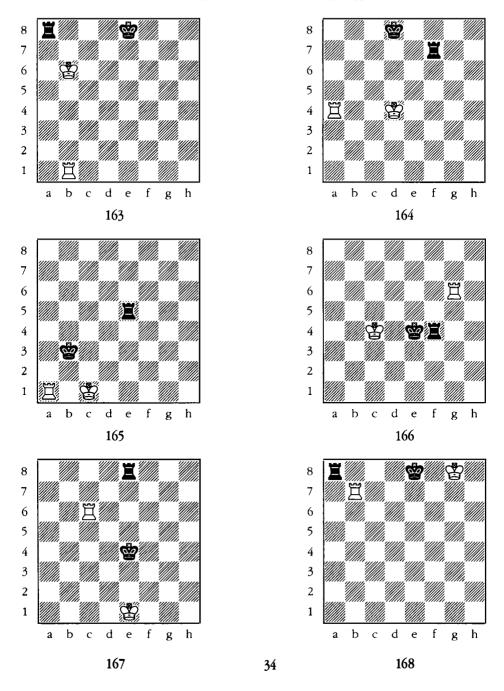

#### **Endgames with Four Pieces**

## King + one piece vs. king + one piece

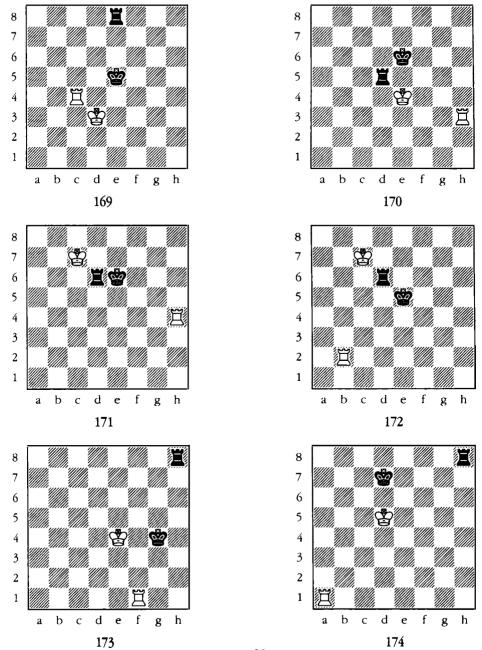

#### King + rook vs. king + rook

Black to move. Black wins White's rook.

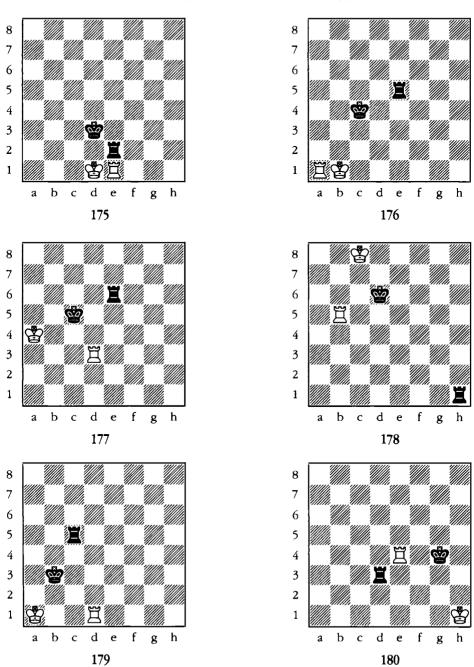

## King + rook vs. king + rook

White to move. White wins Black's rook.

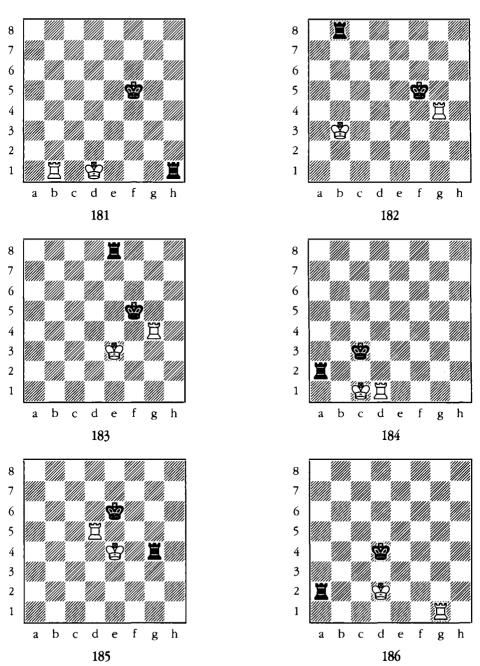

#### King + rook vs. king + rook

Black to move. Black wins White's rook.

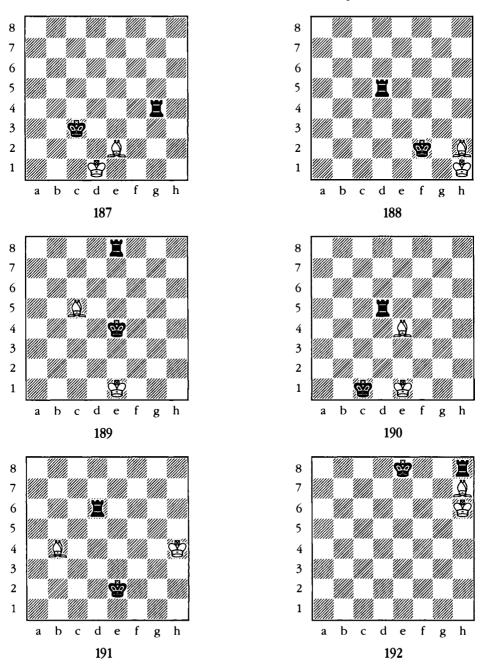

#### King + rook vs. king + rook

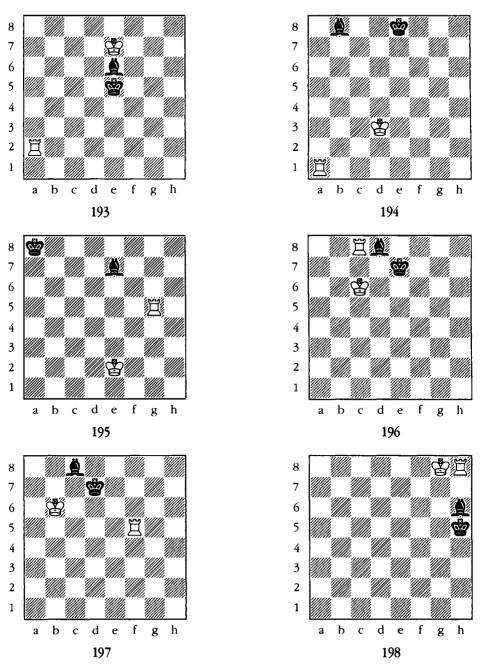

White to move. Make a draw.

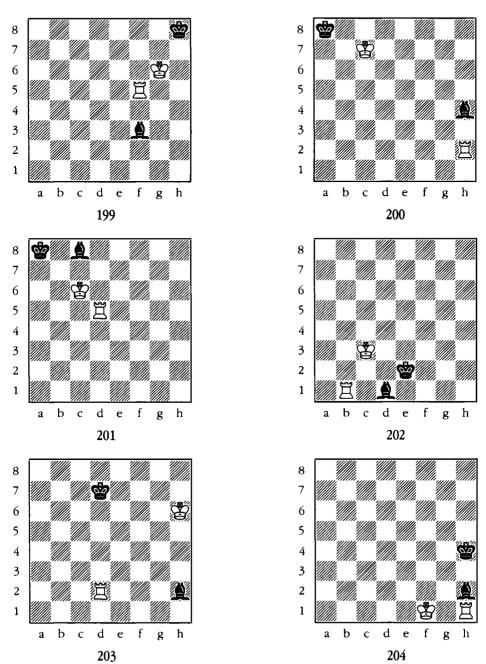

Black to move. Black wins the bishop.

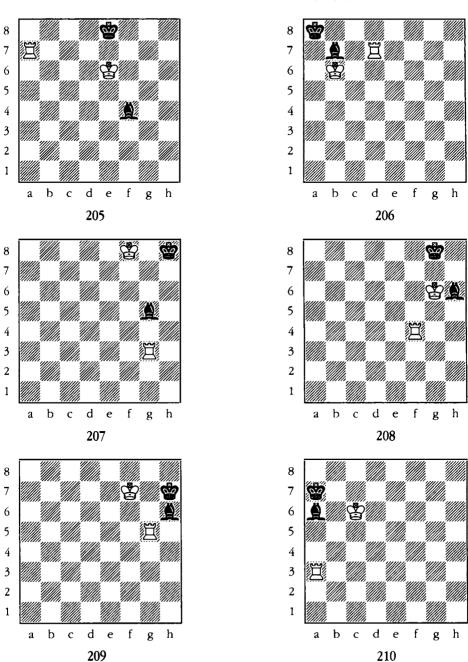

White to move. White wins the bishop.

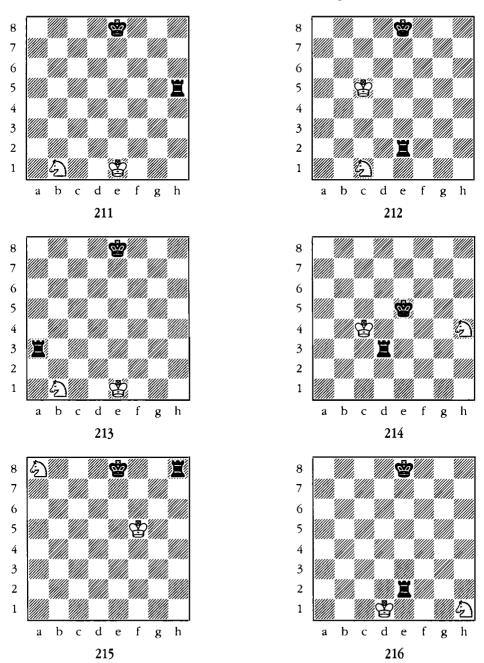

Black to move. Make a draw.

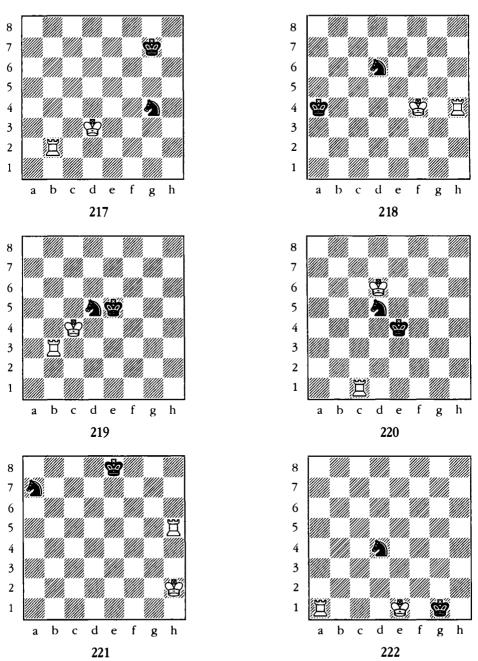

White to move. Checkmate in two moves.

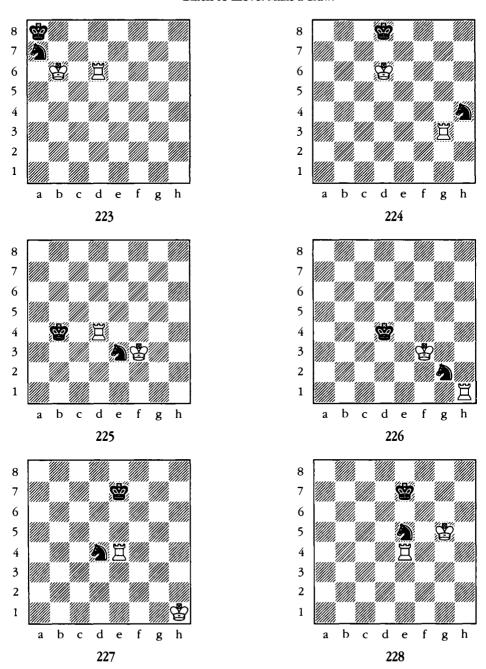

Black to move. Black wins the knight.

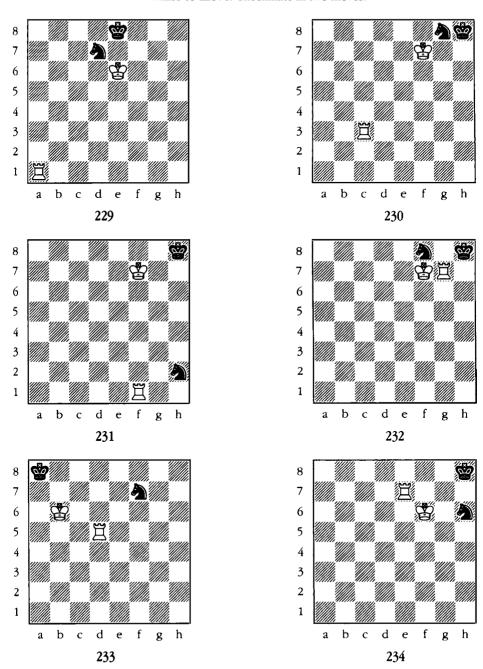

White to move. White wins the knight.

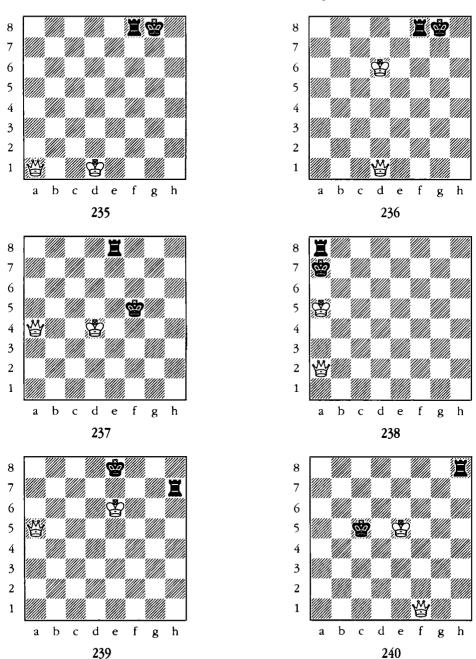

Black to move. Make a draw.

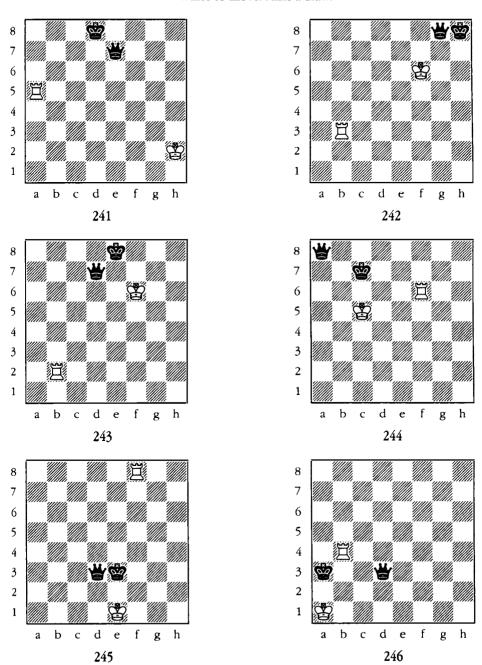

White to move. Checkmate in two moves.

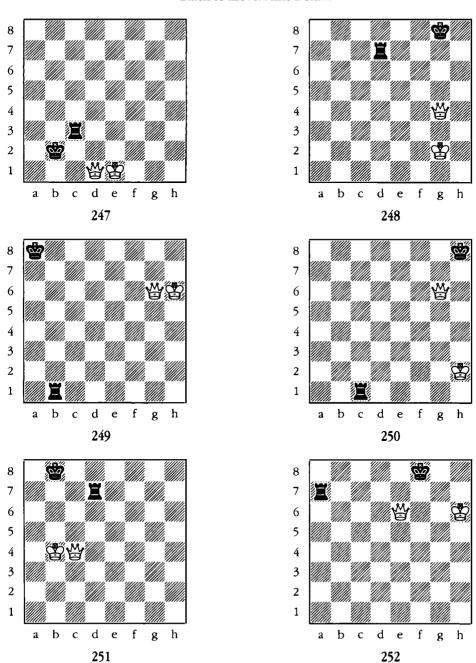

Black to move. Black wins the queen.

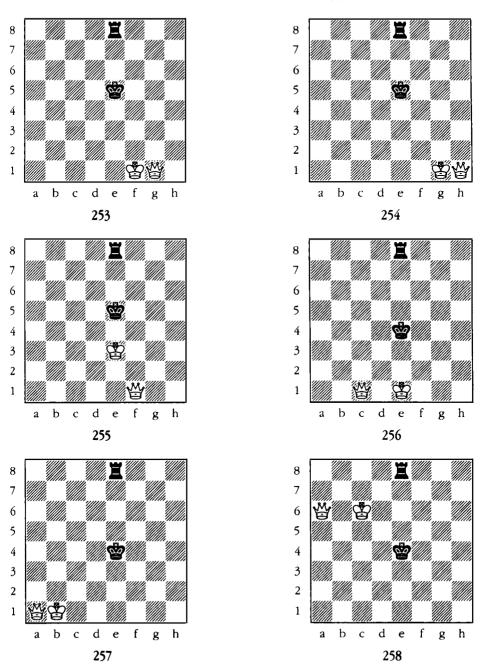

White to move. Make a draw.

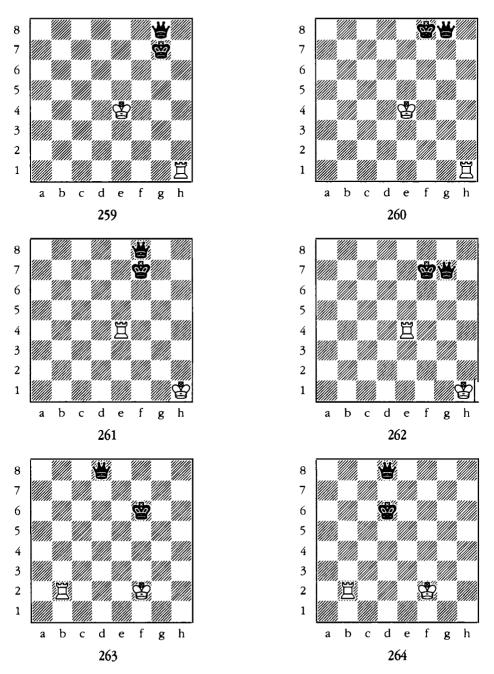

Black to move. Make a draw.

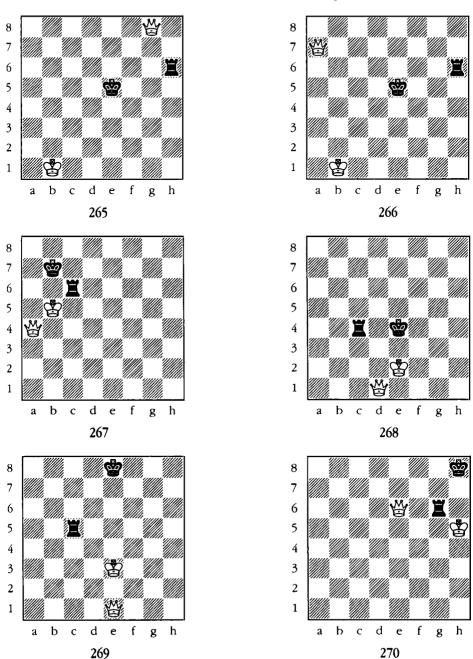

White to move. White wins the rook.

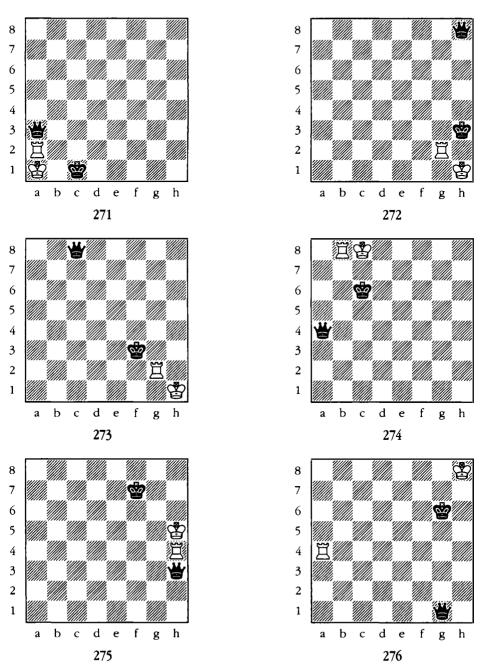

Black to move. Black wins the rook in two moves.

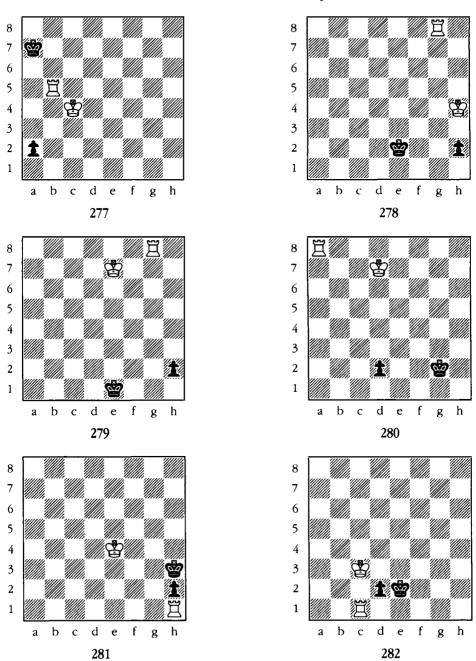

White to move. Win Black's rook in the fewest possible moves.

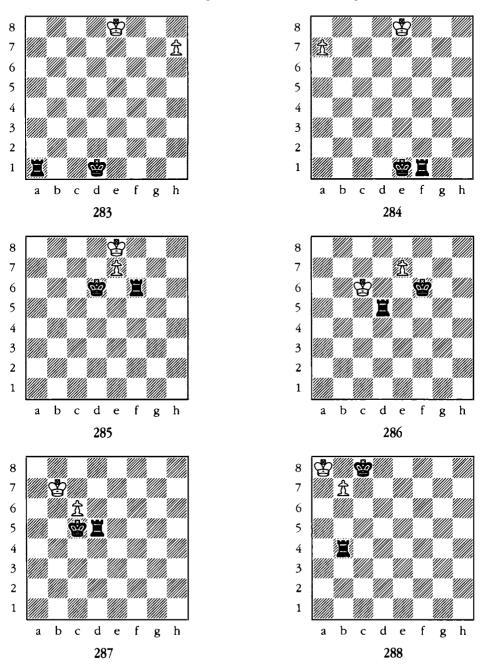

Black to move. Checkmate in two moves.

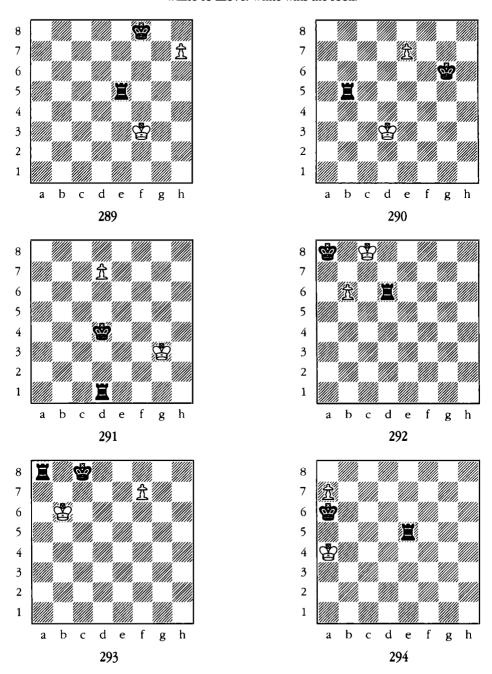

White to move. White wins the pawn.

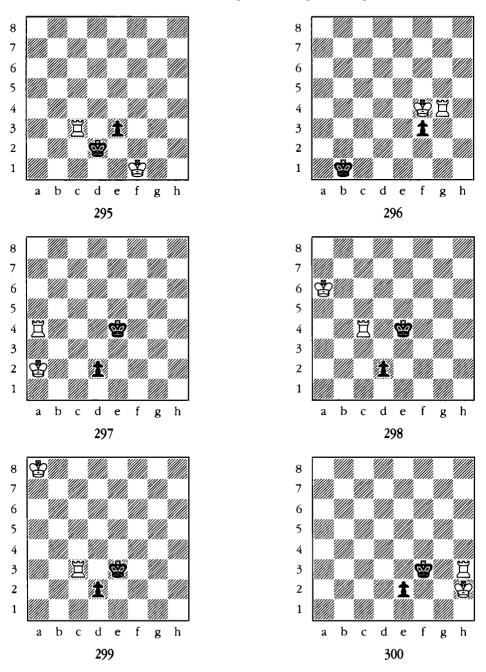

Black to move. Win the pawn for Black in the fewest possible moves.

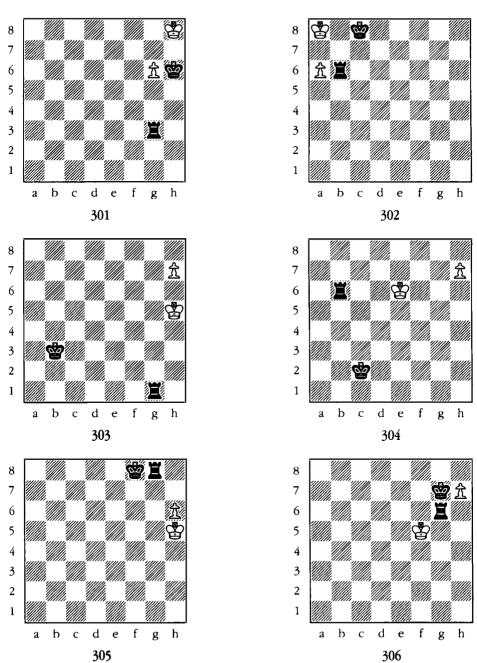

White to move. White wins the rook.

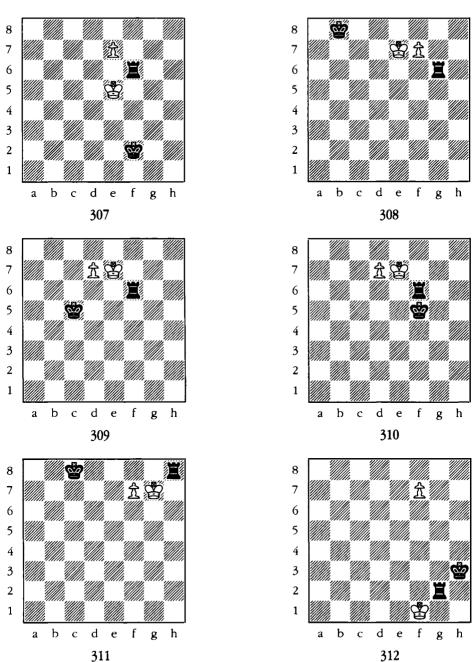

Black to move. Black promotes his pawn to a queen.

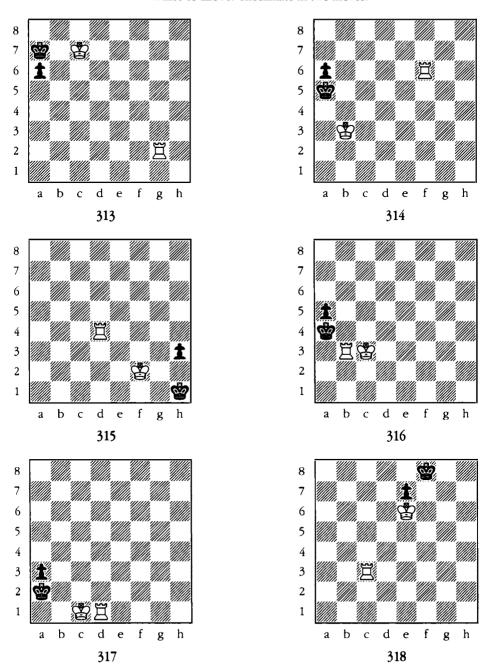

White to move. Make a draw.

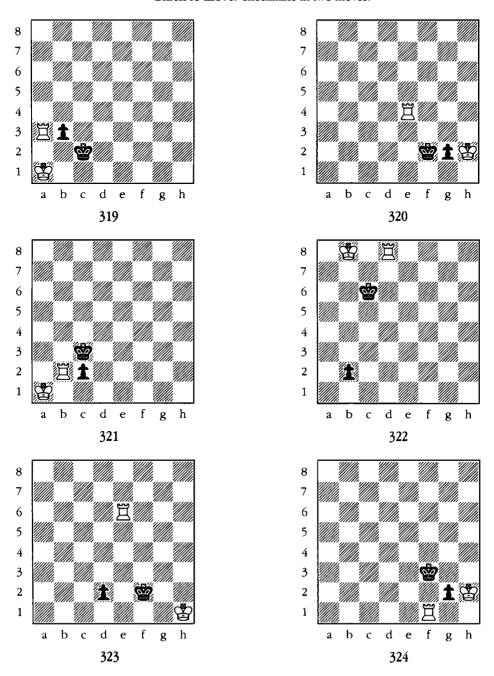

Black to move. Make a draw.

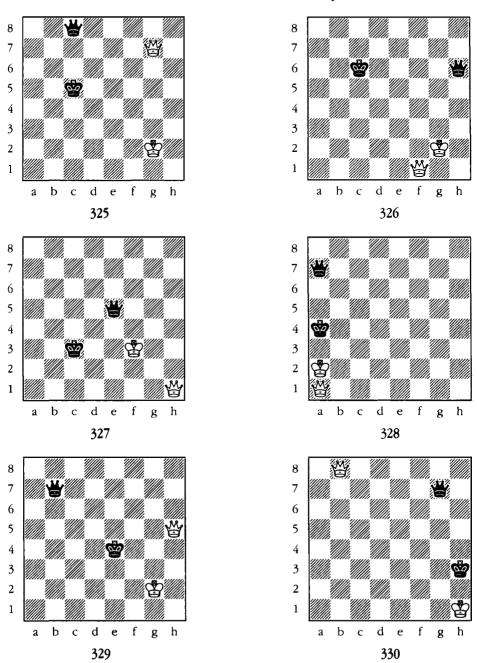

White to move. Checkmate in two moves.

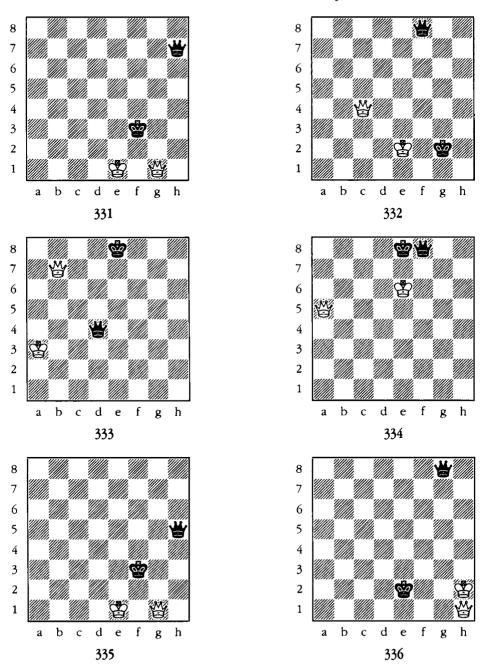

Black to move. Checkmate in two moves.

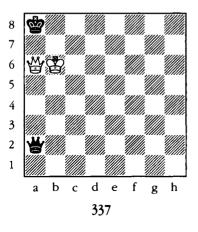

White to move. White wins Black's queen.

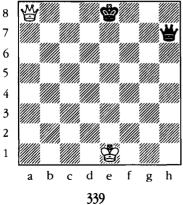

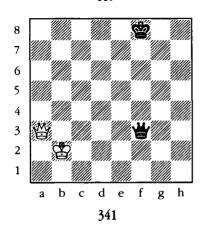

Black to move. Black wins White's queen.

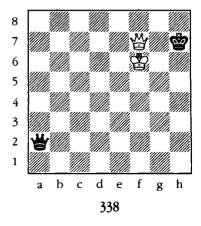

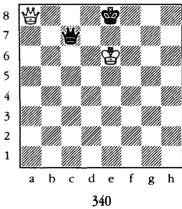

Black to move. Make a draw.

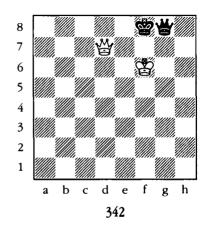

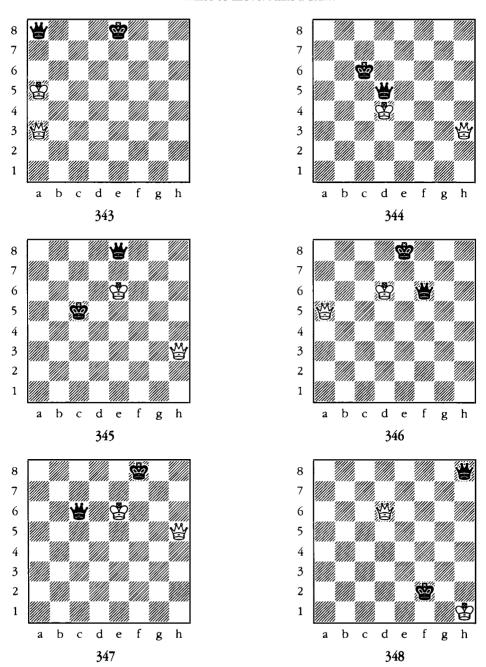

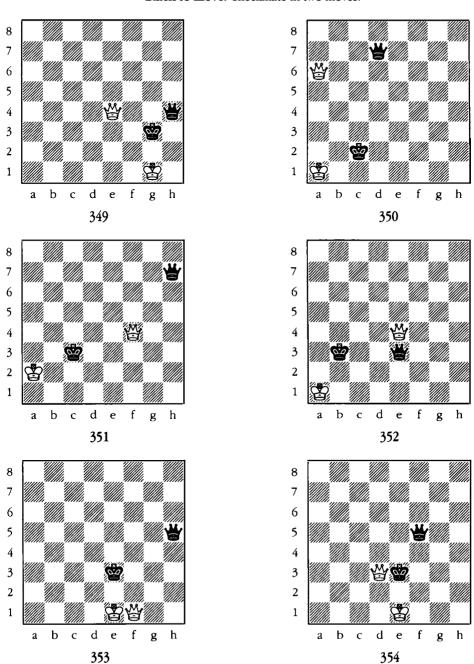

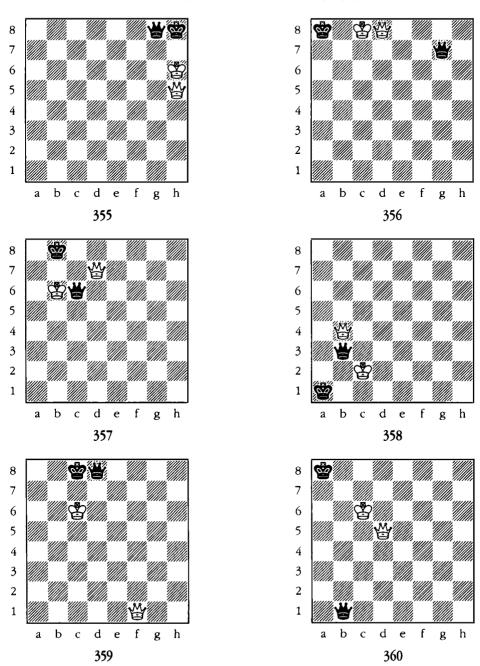

White to move. Make a draw.

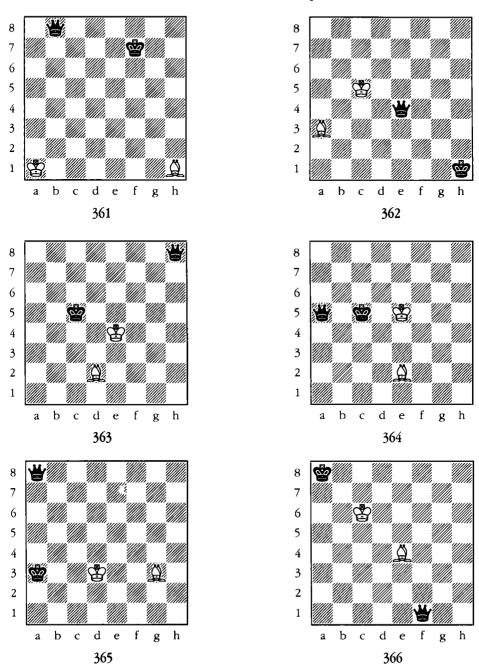

Black to move. Checkmate in two moves.

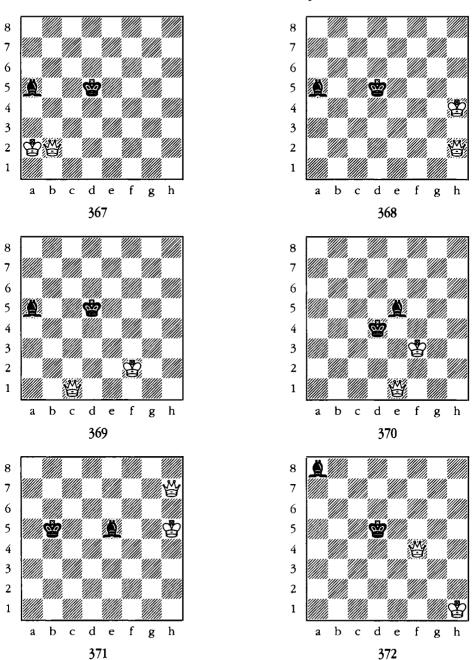

White to move. Checkmate in two moves.

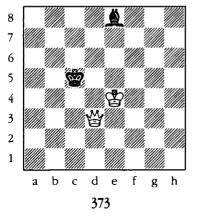

Black to move. Black wins the bishop in two moves.

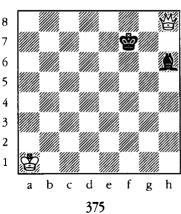

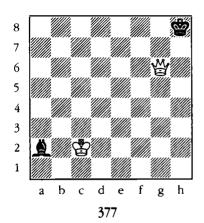

White to move. White wins the bishop in two moves.

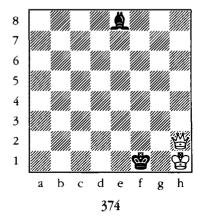

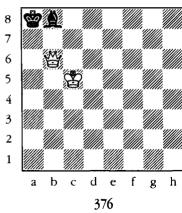

Black to move. Make a draw.

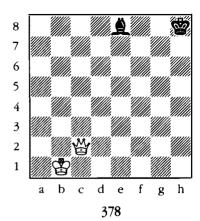

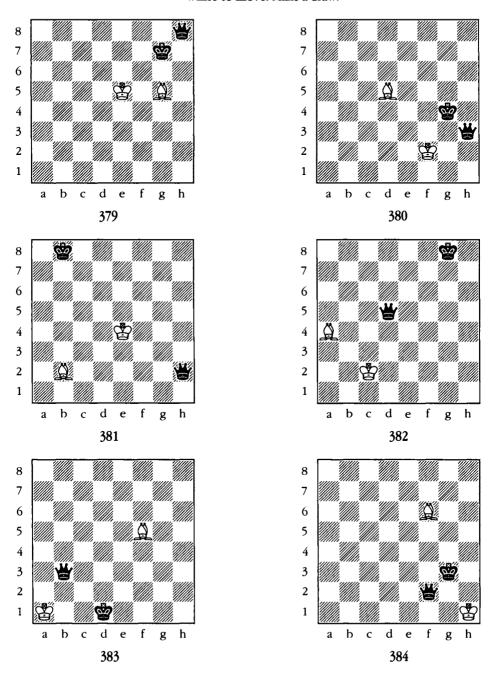

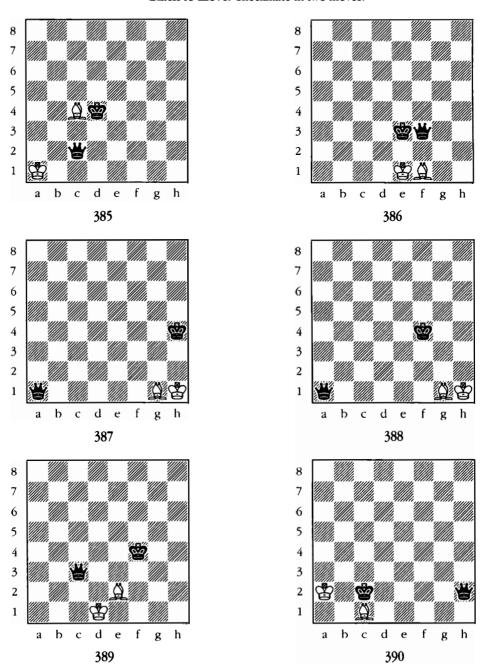

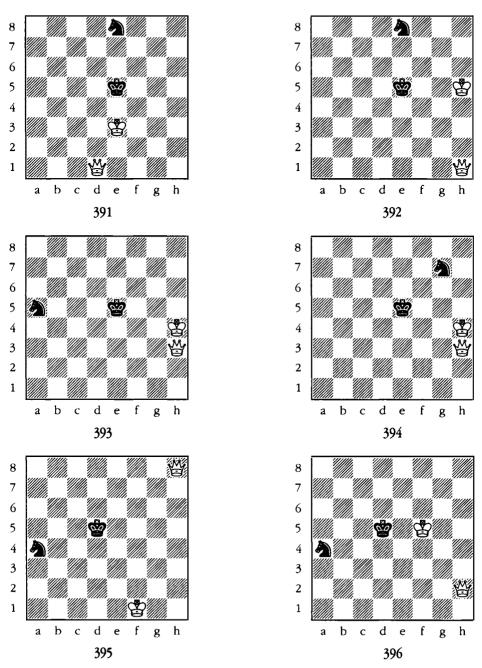

White to move. Make a draw.

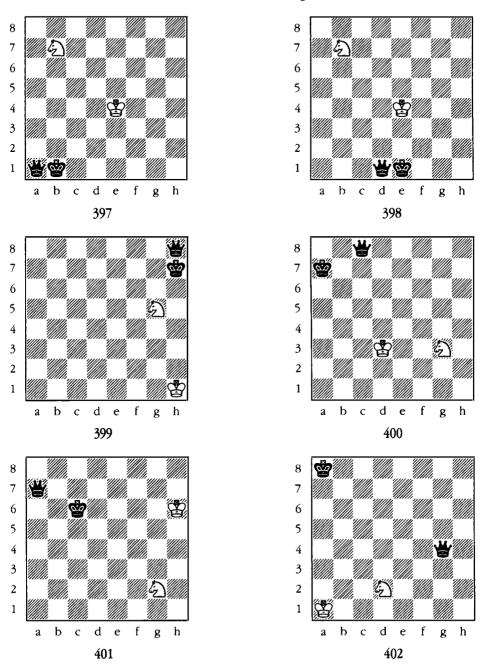

Black to move. Checkmate in two moves.

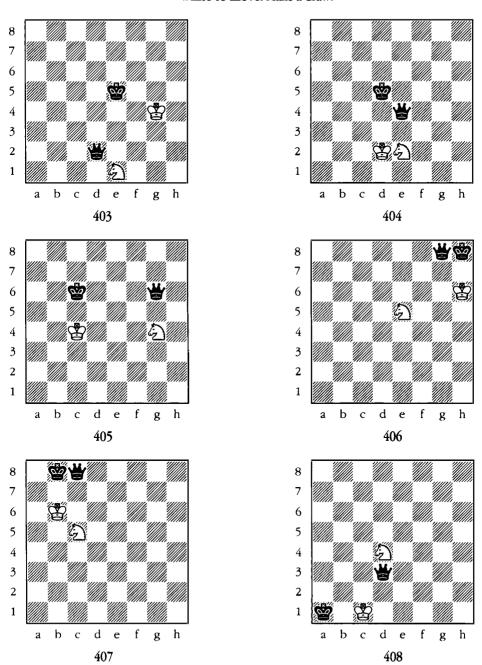

White to move. White wins the knight in two moves.

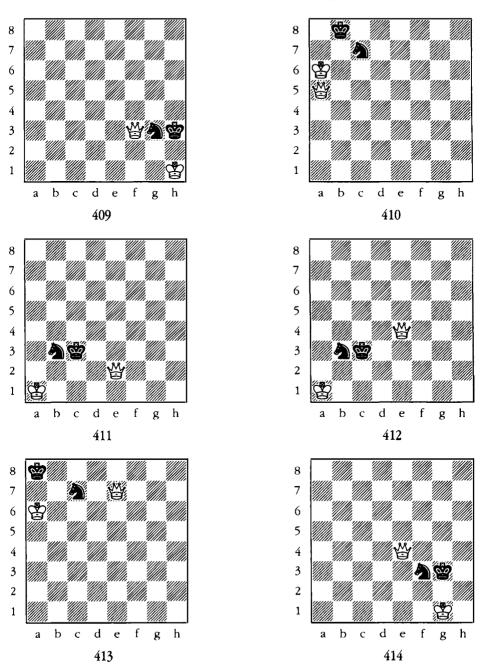

Black to move. Black wins the knight in two moves.

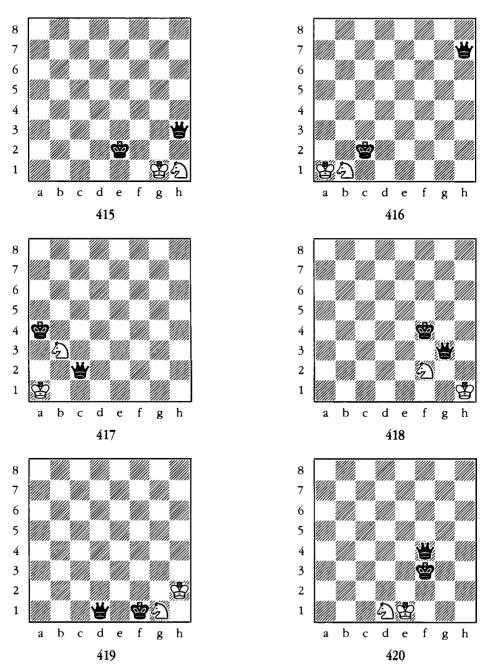

White to move. Make a draw.

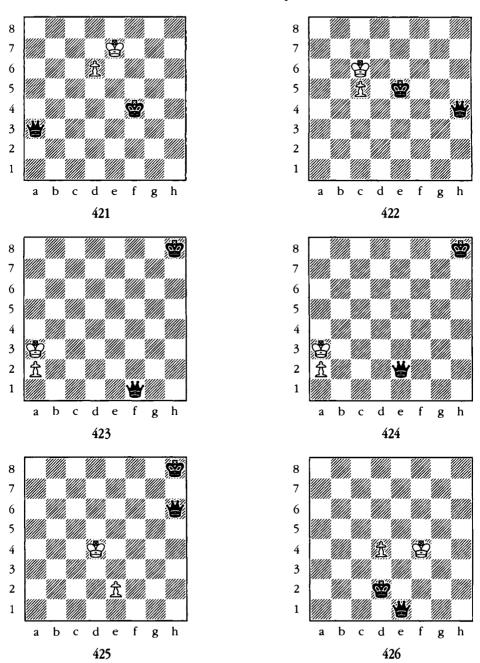

White to move. Find the best move.

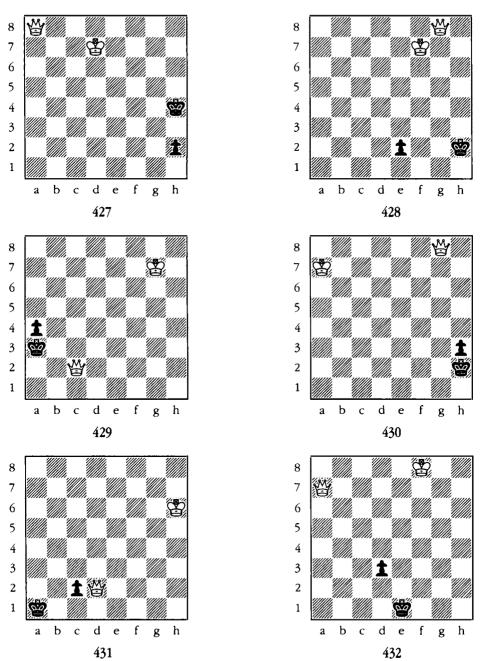

Black to move. Checkmate in two moves.

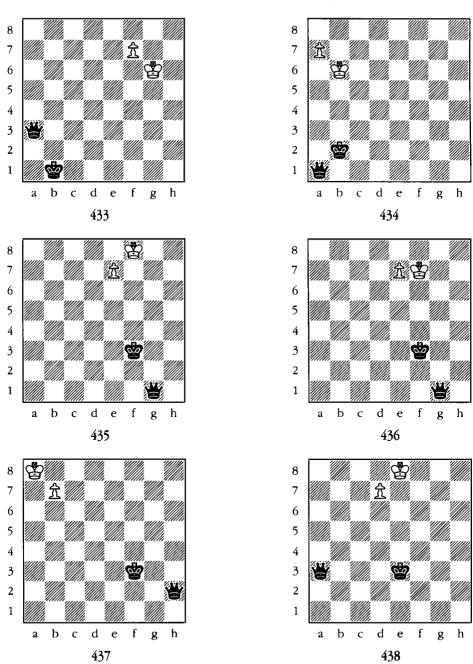

Black to move. Black wins the pawn in two moves.

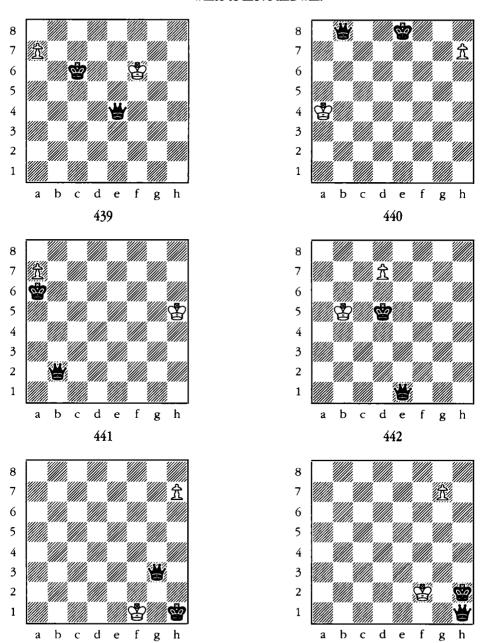

White to move. White wins the pawn in two moves.

Black to move. Find the best move.

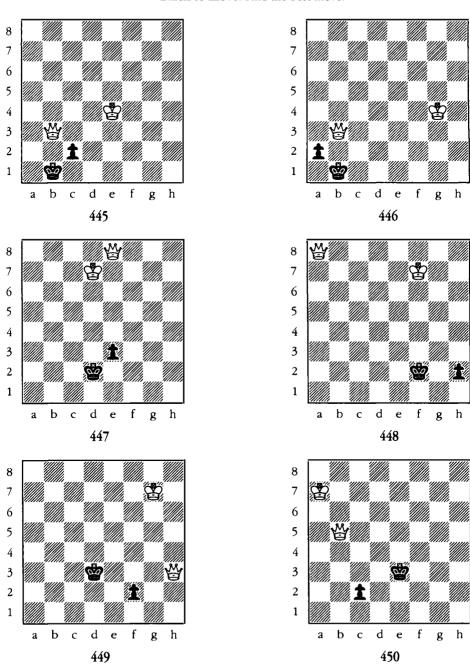

White to move and win.

Chess Camp is a new training system for beginning chessplayers, and for the parents and coaches who teach them. Starting with simple problems to illustrate key concepts, and then progressing to more complex positions, the student will learn by doing, methodically integrating new information with previous knowledge while building effective thinking habits at the board.

In this fourth volume, *Elementary Endgames*, the student will: 1) learn how to deliver fundamental checkmates such as a king and a rook against a lone king; 2) discover how be avoid stalemating the opposing king, and how to induce stalemate when threatened win checkmate; and 3) develop not only an understanding of concepts such as passed pawis and king opposition, but also a sense of confidence in the final phase of the game.

Igor Sukhin has been using the game of chess for more than two decades be teach children. His books have been selected repeatedly as recommended reading by the Russian Department of Education.

The author of the acclaimed children's chess book *Gary's Adventures in Ches Country* (also published by Mongoose Press), Sukhin has written more than 10 titles, with over a million copies currently in print.

# Note for Coaches, Parents, Teachers, and Trainers

After working through the first books in this series, the student has learned about the relative strength of the pieces, mastered typical methods in attack and defense, and learned how to checkmate in one move. This book presents the student with more difficult problems.

Delivering checkmate in two moves is essentially a three-stage process. The winning side has to find an attacking plan which would allow "capturing" the enemy king in no less than three moves. Moreover, the player must account for the best defense and find a way to overcome it.

When a chessplayer is carrying out a two-move checkmate, the opponent often has several ways to defend. However, checkmate follows each time. This is where the student will make use of his or her one-move checkmating skills. In order to solve such problems, the student needs to see the final mating structure; barring that, the puzzle might pose some difficulties.

This fifth volume sets several goals: a) to review checkmating skills; b) to teach the student to feel the harmony of the pieces; c) to teach how to overcome the best defense; d) to get the student into the habit of thinking in terms of calculation.

The book is divided into two distinct parts. In the first part, the student checkmates without sacrificing material, while in the second part the student needs to find a combination. Usually, authors of tactical manuals classify their material by combinational theme (*i.e.*, combinations with the theme of distraction, or blocking). Unfortunately, players don't get such "hints" during an actual game. That is why, in this book, the problems are structured by what pieces the attacking side has (for instance, the attacker checkmates with two rooks, two bishops, etc.).

Problems where the attacking side has not more than five pieces and pawns comprise the largest part of this book. These problems teach key ideas applicable also to problems with more chessmen. Solving problems with a limited number of attackers should allow the student to find checkmate in a variety of situations.

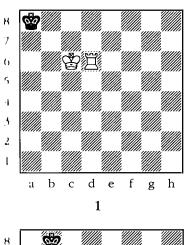

Very often the first move is a check. This cuts down on the number of variations the student has to consider. There are a few problems which do not begin with check. In this case the first move creates a strong threat, which the defender is unable to parry, and puts the defending side in a state of *Zugzwang*, when all moves only make the position worse. The later problems are more difficult, yet more beautiful. Learning to solve such problems will advance the student's appreciation of the harmony of the pieces, and will aid in mastering the deeper secrets of the game.

Chess Camp is a new training system for beginning chessplayers, and for the parents and coaches who teach them. Starting with simple problems to illustrate key concepts, and then progressing to more complex positions, the student will learn by doing, methodically integrating new information with previous knowledge while building effective thinking habits at the board.

In *Two-Move Checkmates*, the fifth volume in the Chess Camp series, the student will be introduced to the elements of planning, aiming at a goal beyond the current move; start to understand the need to consider the opponent's possible defenses; practice visualizing the board more than one move ahead; and discover the seemingly paradoxical idea of winning by sacrificing material.

Igor Sukhin has been using the game of chess for more than two decades to teach children. His books have been selected repeatedly as recommended reading by the Russian Department of Education.

The author of the acclaimed children's chess book *Gary's Adventures in Chess Country* (also published by Mongoose Press), Sukhin has written more than 100 titles, with over a million copies currently in print.

Defensive Tactics	
Saving the king	83
Saving the queen	87
Saving a rook	95
Saving a minor piece	100
Practice	106-109
Bolutions	110-114

## Note for Coaches, Parents, Teachers, and Trainers

This book of chess problems challenges the student to practice typical tactical ideas. There is a great number of such motifs in both attack and defense. Some of these ideas - including the "cross" (a type of double pin), the unstoppable attack, closing the trap, the skewer, the x-ray attack, removing the guard, reinforcing the attack, and many others are not always given the kind of attention they deserve.

Many books cover typical attacking methods, but very few provide adequate coverage of defensive techniques. This can be explained from a psychological standpoint: it is more exciting to look for winning moves than it is to try to defend a bad position. However, in order to become a great player, the student needs to know how to both attack and defend. That is why learning typical defensive methods is no less important than knowing attacking methods.

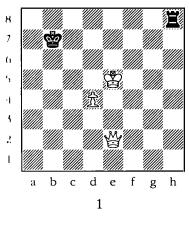

Learning the typical ways to defend is not easy. Therefore, in this book most problems are arranged by topic, which will serve as a hint for the student. The next volume in this series, however, will offer problems with no hints, so as to reinforce the skills acquired while reading this book.

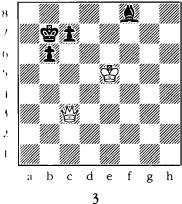

To become a great player, the student needs to learn both skills: how to attack and how to defend.

Chess Camp is a new training system for beginning chessplayers, and for the parents and coaches who teach them. Starting with simple problems to illustrate key concepts, and then progressing to more complex positions, the student will learn by doing, methodically integrating new information with previous knowledge while building effective thinking habits at the board.

Volume 6, *Tactics in Attack and Defense*, presents 618 problems and exercises introducing the advancing student to more complex tactical themes such as skewers, deflection, the trapped piece, and removing the guard; and illustrating key defensive techniques including perpetual check, interposition, and the counterattack.

**Igor Sukhin** has been using the game of chess for more than two decades to teach children. His books have been selected repeatedly as recommended reading by the Russian Department of Education.

The author of the acclaimed children's chess book *Gary's Adventures in Chess Country* (also published by Mongoose Press), Sukhin has written more than 100 titles, with over a million copies currently in print.

# Note for Coaches, Parents, Teachers, and Trainers

By this point in the *Chess Camp* series, the student has acquired experience in solving problems to master both typical tactical techniques for gaining a material advantage (the double attack, discovered check, and so on) and defensive methods (escaping from attack, counterattacking, etc.). In previous volumes, the material was grouped by theme.

Now the student must use his or her acquired skills in conditions where the theme of the attacking or defensive maneuver is unknown. This corresponds more closely to the reality of a chess game, in which you don't immediately know which specific aspect of the position will be the defining one (a pin; the poor position of a piece; something else). Students themselves must carefully analyze the positions that have been created, get a feel for their peculiarities, and work out which specific method of play needs to be used to win material or defend the position.

The contents of this book are classified by opening type. This will help the beginning player to familiarize himself with the fundamental tactical ideas that are characteristic of a particular opening, as well as with some patterns to be found in the treasure trove of the chess arts. The tactical blows most commonly encountered in the games of beginners are presented with a greater number of examples (in different openings) than are other, rarely encountered tactical ideas.

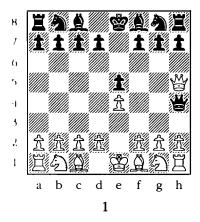

The examples include both very simple, one-move problems and positions in which a beautiful maneuver will not be found right away. Some attention has been given to rare opening systems, such as openings where the queen comes into the game early. These kinds of positions occur frequently in the games of inexperienced players, but they are not always given the amount of attention they deserve in the vast chess literature.

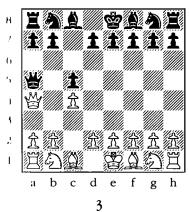

When solving the problems in which a defensive maneuver needs to be found, above all the student must see the threat itself (check, double attack, etc.), and — based on that — start to look for the best defensive move (or maneuver). This defensive idea may be: 1) a counterattack in which you manage to defend and to acquire a material advantage; 2) a defense that preserves material equality; 3) a defense in a difficult position, when even after the defensive maneuver your opponent's position remains preferable (but a quick loss is likely if you fail to find the best move).

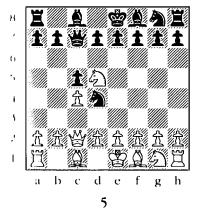

# **Silly Games**

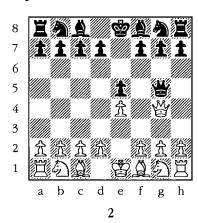

# Copycat (mirror-image) games

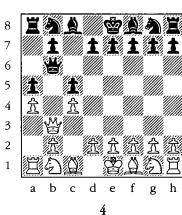

Wanting to take the game to a draw, Black is copying White's moves. Punish him! White to move. Win the queen.

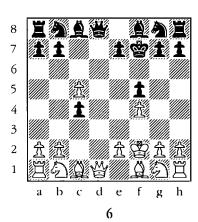

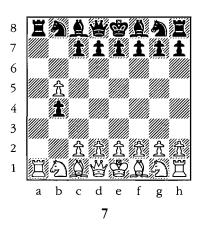

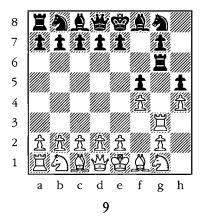

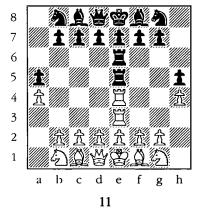

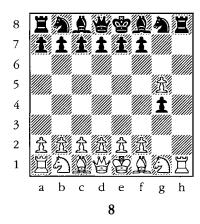

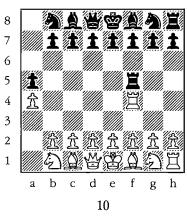

#### White to move. Win a rook.

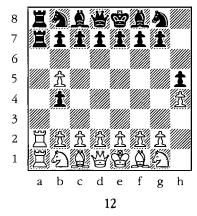

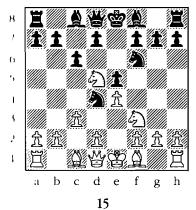

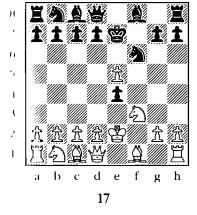

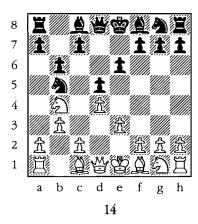

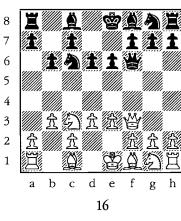

### White to move. Win a knight.

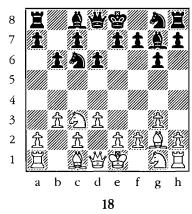

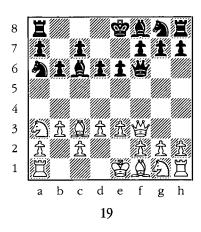

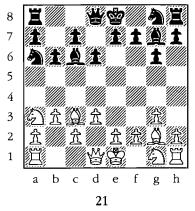

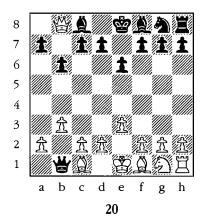

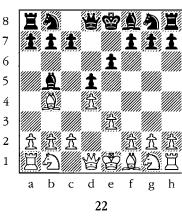

#### White to move. Win a bishop.

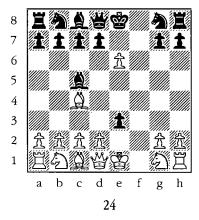

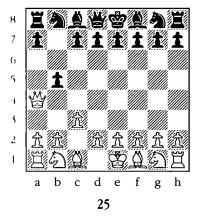

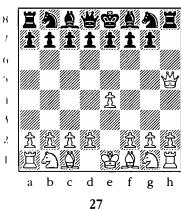

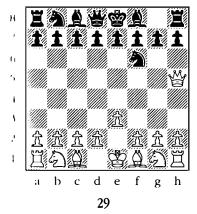

# **Silly Games**

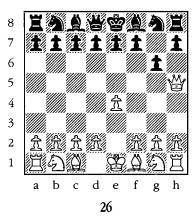

# Winning a piece on moves 2-4 of the game

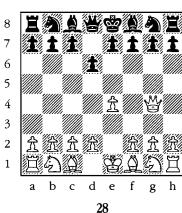

Black to move. Win the queen on the second move of the game.

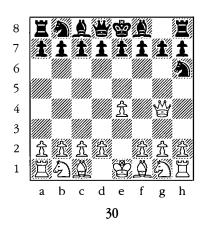

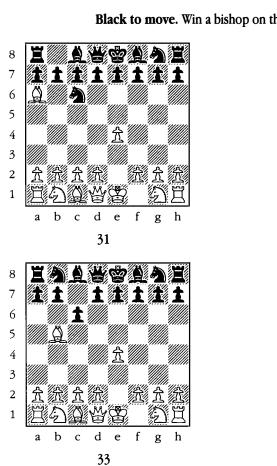

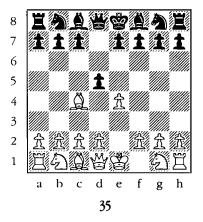

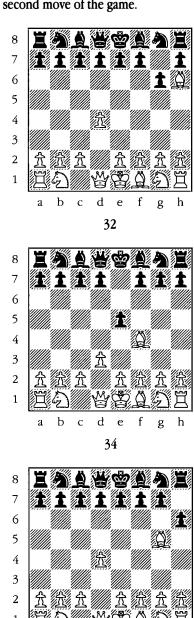

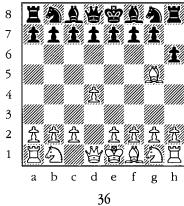

### Black to move. Win a bishop on the second move of the game.

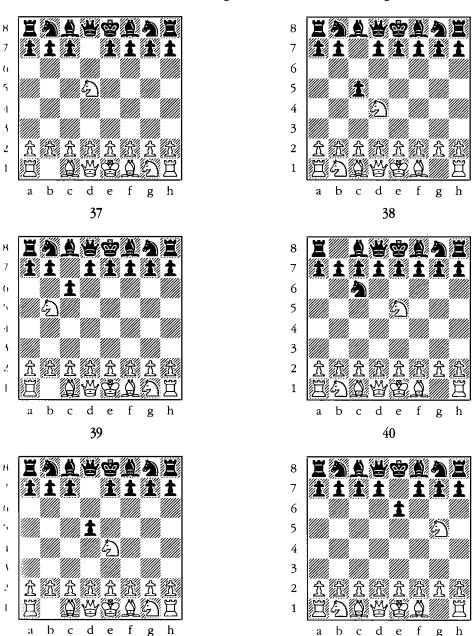

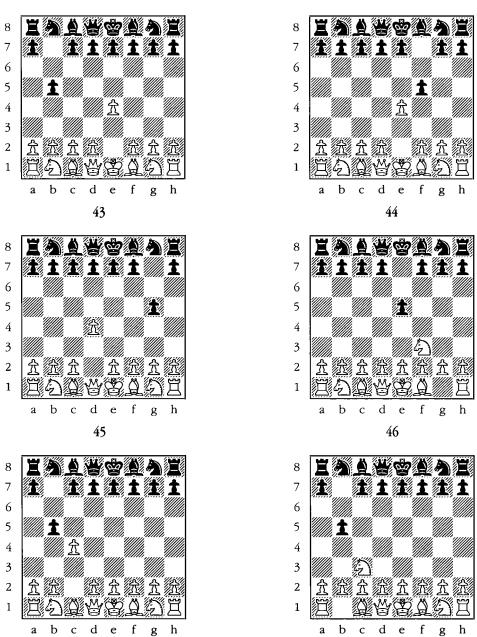

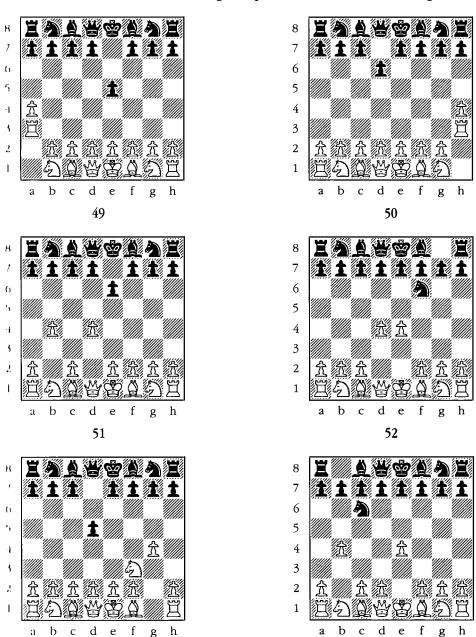

### Black to move. Win a knight on the second move of the game.

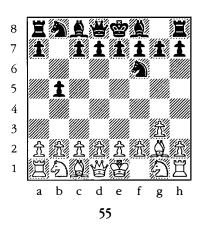

### White to move. Win a pawn on the second move of the game.

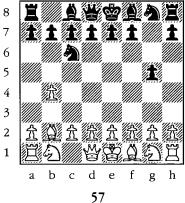

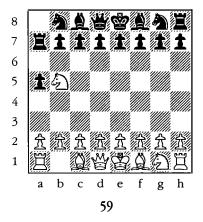

### Black to move. Win the exchange or a pawn on the second move of the game.

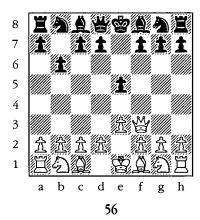

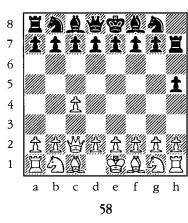

#### White to move. Win a rook on the third move of the game.

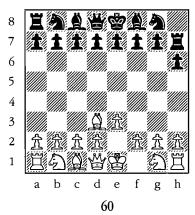

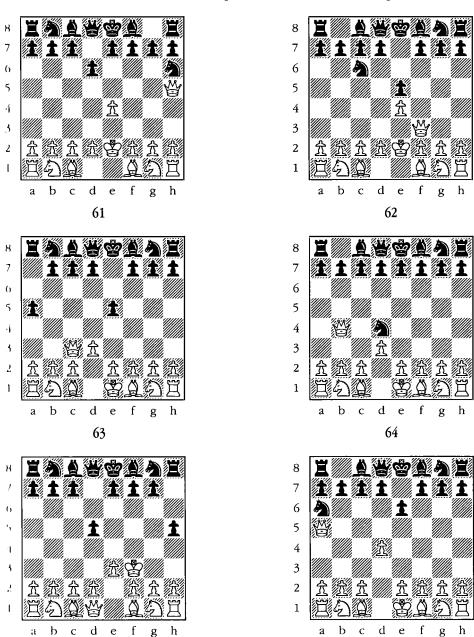

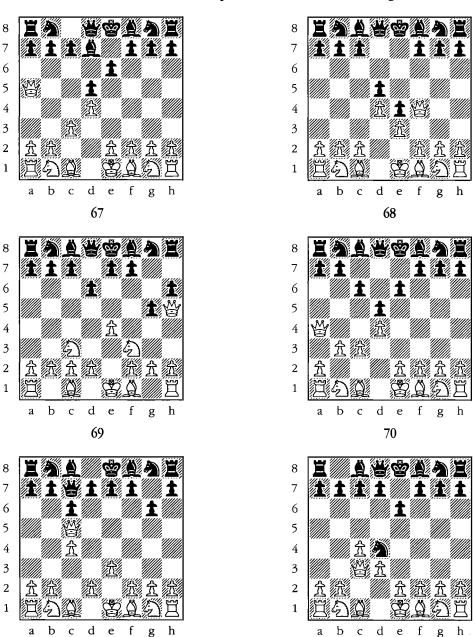

### Black to move. Win the queen on the third move of the game.

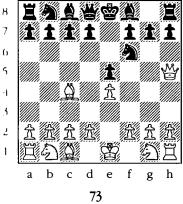

### Black to move. Win the queen on the fourth move of the game.

Chess Camp is a new training system for beginning chessplayers, and for the parents and coaches who teach them. Starting with simple problems to illustrate key concepts, and then progressing to more complex positions, the student will learn by doing, methodically integrating new information with previous knowledge while building effective thinking habits at the board.

The seventh volume in this series, *Opening Tactics*, sets problems in more lifelike conditions, as they arise from standard openings and the winning tactical idea is not given away. Thus, the student will: 1) enhance his or her ability to think independently in real positions; 2) start to absorb typical themes from the chess openings; and 3) learn the need to take the opponent's threats into account.

**Igor Sukhin** has been using the game of chess for more than two decades to teach children. His books have been selected repeatedly as recommended reading by the Russian Department of Education.

The author of the acclaimed children's chess book *Gary's Adventures in Chess Country* (also published by Mongoose Press), Sukhin has written more than 100 titles, with over a million copies currently in print.
